THE REGENCY AUCTION 37

Auction Room: Barnes

Thursday, March 26th at 5:30PM ET

Welcome to Regency Auction 37 and the City of Brotherly Love!

This is our second auction that is not being held in conjunction with the PCGS Members Only Show. We are so excited to present this incredible offering to market in this auction! One of our best selections ever, this auction, containing 429 lots, is diverse, fresh, and very high-end overall.

The sale starts out with our anchor collection, The Seattle Collection. Formed over the last 20 years ago, mostly 10-15 years ago, with just a few more recent additions. This collection features several old holder coins, and coins that have not been evaluated for regrades. Complete sets of two cent, three cent silvers, three cent nickels, Shield nickels, Liberty nickels, and related patterns. Our catalogers, Greg Cohen and Liz Coggan, have marveled at the freshness and quality. Clearly this collection was carefully assembled by a dedicated collector. Highlights abound in this wonderful collection, with many that rank among the finest graded.

At the conclusion of the Seattle Collection, we continue the sale with very cool type coins in all series, from a choice Connecticut copper to half cents, large cents, Buffalo nickels, Walking Liberty half dollars, and everything in between. We also have two delightful proof sets available, an 1868 Proof Set that is complete from 1C to \$1, and being sold individually, and an 1884 Proof Set being sold as a single lot. A small but impressive selection of Morgan dollars, gold and commemoratives close out the sale. Specific highlights include:

LOT 11. 2C 1872 PCGS MS65+ RD CAC from the Seattle Collection
LOT 70. 5C 1880 PCGS MS65 from The Seattle Collection
LOT 155. 1C 1870 PCGS MS66+ RD CAC

The quality of the coins we present to the collecting public is the absolute finest being offered in auction in the market, and this sale continues that tradition. We would like to thank all of our consignors for trusting us to bring their coins to market, allowing us to present such a wonderful offering to our buyers. We know that as you flip through the pages that follow, you will surely find something that speaks to you. Good luck in what is sure to be an exciting and important auction.

Happy Hunting,

Julie Abrams
President

LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize, accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

- a. Coins and currency listed in this catalog graded by PCCS, NGC, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.
- b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence.
- c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.
- d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.
- e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.
- f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.
- g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the

Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of LRCA authorized to do so.

h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey; and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale.

Auction participants expressly waive any right to trial by jury.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

OUR TEAM

Laura Sperber
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

Originally hired as a Staff Accountant, he was quickly promoted to be the number two person in the Finance Department for the company.

Matthew was brought onto LRCA in September 2017 as Controller for both LRCA and Legend Numismatics. He was promoted initially to Executive Vice President in May of 2018, and again to CEO in January of 2020. Since he has been with the company, Legend Rare Coin Auctions has seen its business expand to seven Regency Auctions per year, and enjoyed three consecutive years of revenue growth.

Julie Abrams
President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAI, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company, as well as continuing her role as CEO for Teletrade.

In 2004 she joined Stacks-Bowers, she worked to develop an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

THE SEATTLE COLLECTION

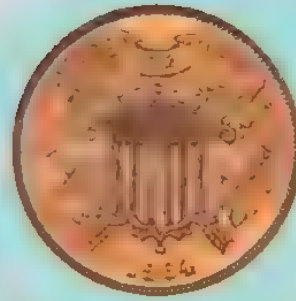

The Seattle Collection collector has been an avid student of numismatics since the early 1970s, when he started collecting with the blue Whitman albums, collecting coins from circulation. His first serious foray into the hobby was when he worked in a grocery store and had all the cashiers keeping their eyes out for silver coins in their registers, which he would purchase from the till at the end of the day. After a couple of years, he had accumulated quite a bit of silver, and decided to sell it at a local coin show in order to purchase other silver coins. Unfortunately, he did that at what turned out to be the height of the silver bubble, and some of those coins are still not worth what he paid for them today (which the collector says was a lesson well learned)!

In the late 1990's, he started collecting rare coins. He started with some of the series which are for sale in this auction; two cent and three cent pieces, liberty and shield nickels, and also flying eagle and Indian head cents.

The Seattle Collector has a love for coins that have a history to them. This is why he was attracted to the short-lived 3 cent series, as the controversial nature of their circulation appealed to him. This intrigue eventually led him to collect pattern coinage for the series he collected, as they represent the "what could have been" of American numismatic history.

Not just a history buff, the Seattle collector also had an eye for quality coins, as the sets we have for sale in the pages that follow were carefully assembled over a period of decades, and many of them were at or near the top of the pop when they were purchased.

The Seattle Collector is ready now to see these coins go to new homes, and new owners who will continue the tradition of preserving our nation's history through its coinage for future generations. We at Legend Rare Coin Auctions congratulate him on the amazing collection he has built, and thank him for entrusting its sale to us.

**LOT 1**

2C 1864 LARGE MOTTO. PCGS MS65 RD CAC
 AMAZING, deep red fields are free of specks, flecks and discoloration. GORGEOUS and premium quality for the assigned grade. Razor sharp motifs! Intense, dazzling luster.

PCGS 280; NGC 116, CAC 58. This coin has to be in the top 10% of specimens with a CAC sticker. It is that nice! No CAC examples have sold of late, but there have been two sales of MS65+ CAC graded coins and the price continues to rise. An example sold in March 2019 for \$1,275 and another piece sold in August 2019 for \$1,650. We see no reason this piece isn't a candidate for a + designation as well as the CAC sticker! Bid generously!

PCGS# 3578 | ESTIMATE: \$800+

LOT 2

2C 1864 SMALL MOTTO. PCGS MS65 RB
 A highly DESIRED issue among collectors. Likely 10 TIMES SCARCER than its Large Motto counterpart, especially if you compare the number of pieces graded by PCGS and NGC for the Large Motto, versus the Small Motto varieties of the date and grade. Generous amounts of MINT RED accent subdued, frosty fields. Keenly struck with all of the design elements struck to full advantage. Under a strong loupe, a few light toning specks are noted for accuracy. The first denomination and year to bear the motto IN GOD WE TRUST on the obverse.

PCGS 57, NGC 53. The last non-CAC example sold in April 2017 for \$3,290, but CAC specimens have sold in the high 2,000 to low \$3,000 range.

PCGS# 3578 | ESTIMATE: \$2,750+

**LOT 3**

2C 1865 PLAIN 5. PCGS MS65 RD
 Sharply struck and boldly lustrous with flaming mint red color, this early GEM 2 cent piece has a great eye appeal. The devices are razor sharp on both sides, the obverse has a touch of reflection in the luster, especially in the central shield devices. Some light, iridescent toning and some very minor flecks are seen when viewed closely with a light and a glass.

PCGS 208, NGC 91. PCGS has graded just three MS65 RD examples with the Plain 5 designation. The last Plain 5 in PCGS MS65 RD sold in June 2015 for \$1,293. The current PCGS Price Guide value is listed at \$1,750. The eye appeal is excellent and we think this one will go very nicely in any set of RD 2 cent pieces.

PCGS# 38249 | ESTIMATE: \$1,000+

LOT 4

2C 1866 PCGS MS65 RD CAC
 A coin of great MERIT. Not only is it blazing red with deeply frosted fields and needle sharp motifs, it is also devoid of contact marks. Only under very strong magnification can a couple of tiny fly specks be seen. In our opinion, the minor denominations, 2c, 3cs, 3cn and half dimes are getting so cheap, that they represent fantastic buying opportunities for the discerning collector. This coin is simply a case in point.

PCGS 49, NGC 17; CAC 6. A CAC example sold in January 2020 for \$2,280. A shrewd buyer would bid liberally for this beauty!

PCGS# 3590 | ESTIMATE: \$1,800+

LOT 5

2C 1867 PCGS MS65 RD

WOW, what a beauty! The design details look etched from granite. DEEP MINT RED graces highly lustrous, mark-free surfaces! A couple of faint fly specks are noted with close scrutiny. Housed in an old green label PCGS holder.

PCGS 26; NGC 9. In September 2018 a piece traded for \$2,950 and another fetched \$2,640 in July 2019. Plan to bid enthusiastically if you hope to be the new owner!

PCGS# 3593 | ESTIMATE: \$2,500+

LOT 6

2C 1868 PCGS MS65 RD

A wonderfully lustrous GEM example which ranks among the HIGHEST graded at PCGS; only seven coins have graded higher. Sharply struck up, this rose-red colored coin has a delicate blush of deeper red on the reverse. A couple of planchet flakes are noted as are some minor flecks visible with a glass. The eye appeal is pleasing.

PCGS 19, NGC 9. There are just seven finer, all 66 RD. The current PCGS Price Guide value is listed at \$3,500 and the auction records are all over the place, averaging \$4,235 for the last 10 examples, which go back to 2006! The last MS66 RD sold for \$23,500 four years ago! What an important and underrated rarity!

PCGS# 3599 | ESTIMATE: \$2,000+

LOT 7

2C 1869 PCGS MS65 RD

A vibrant GEM with very nice eye appeal. Rich mint red luster glows with bold golden highlights. Mostly well struck with some light flecks here and there, none are distracting.

PCGS 32, NGC 19. The most recent APRs range from \$1,680 to \$3,000 and the current PCGS Price Guide value is \$2,850. Just 8 coins are graded finer. This will be a lovely addition to any set of this obsolete denomination.

PCGS# 3605 | ESTIMATE: \$2,000+

LOT 8

2C 1870 PCGS MS64+ RD

A brilliant RED example, which borders on the GEM grade. Pale orange and rose highlights the reverse, while the reverse is a richer orange-golden red. A few ancient ticks and flecks are noted on both sides, which account for the assigned grade, but the eye appeal is still very pleasing.

PCGS 2, NGC 0. Neither coin has sold in auction. A PCGS MS64 has sold for \$1,440 in June 2018 and in March 2019 a PCGS MS65 RD sold for \$3,600. In MS64+ the PCGS Price Guide value is listed at \$3,500. Fresh to the market from this extensive collection we know it will see stiff competition when it crosses the block.

PCGS# 3608 | ESTIMATE: \$2,000+

LOT 9

2C 1870 PCGS MS65 RD CAC

While the mintage was of decent size at just under a million pieces, the 1870 is incredibly RARE in GEM Red grades. This MS65 RD is among the FINEST graded, just a single MS66 RD is graded higher. This is a gorgeous, original RED example, housed in an old green tag holder. The wonderful mint red color, amplified by a bold, radiant brilliance, glimmers all over with some delicate peach and apricot hues toward the obverse peripheries. Totally original surfaces show just a few tiny, stray marks which is all we see keeping it back from an even higher grade.

PCGS 18, NGC 9, CAC 3. In the last decade there have been four appearances of a PCGS/CAC MS65 RD, ranging from \$4,080 to \$11,163. The presently offered coin was NOT CAC approved in its last appearance, when it realized \$4,700 six years ago. The current PCGS Price Guide value is listed at \$5,250 and the CAC CPG value is listed at \$5,620. The single MS66 RD has never appeared in auction, and is not CAC approved. If you demand only the FINEST in CAC approved examples this is as fine as you can get. Good luck!

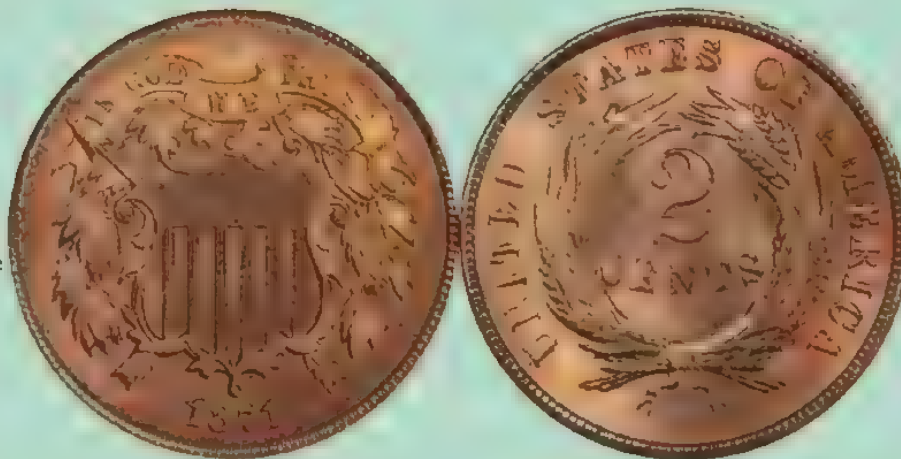

PCGS# 3608 | ESTIMATE: \$4,000+

LOT 10

2C 1871 PCGS MS65+ RD CAC

WOW! What a wonderful example of this conditionally rare date! Rarely seen with full red coloration; but couple that designation with the GEM grade, CAC approval, and bold eye appeal, this 1871 2C gives you the full package!

This is an interesting coin, almost a tale of two sides, if you will. The obverse luster is fully prooflike with full watery mirrored reflection. The reverse, conversely is a rich, satiny sheen. Despite the different textures, both sides offer a bold red color, sharply rendered devices and surfaces with a minimal number of flecks or traces of contact. The eye appeal is exceptional in every way!

PCGS 17, NGC 13, CAC 5. There are just two in MS65+ RD and seven finer. The current Collectors Universe value is listed at \$10,000 and keep in mind, that there are NONE with CAC graded finer. 2C 1872 PCGS MS65+ RD CAC

This is an absolutely amazing GEM example of this very challenging issue. The 1872 2 cent piece was the final year struck for circulation, and only 65,000 were produced. Most did not retain their mint red coloration, and any RED is a major condition rarity. The presently offered coin clearly ranks among the finest without even looking at the Population Report; a fact that is confirmed by the PCGS Population figures, only 2 are graded MS65+ RD and four are finer, all MS66 RD.

Incredible, brilliant RED mint luster rolls vividly on both sides of this exceptionally high end coin. The obverse boasts a hint of semi-reflectivity that accents the wonderfully smooth, clean, radiant surfaces. Every detail is sharply struck, crisply rendered by a precision blow from the dies. Even with a strong glass we are hard pressed to find a single mark, fleck, or line of any consequence. The eye appeal is simply stunning in every way!

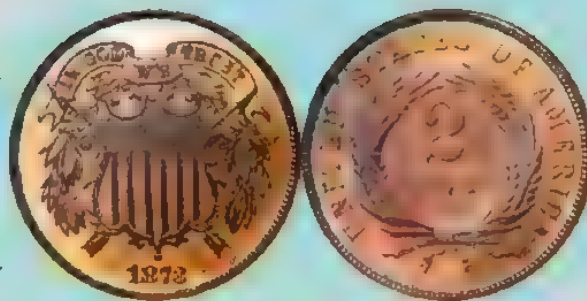

PCGS 9, NGC 1, CAC 3. There are two graded MS65+ RD, and this one sold for \$36,719 in January 2013. More recently an NGC MS65 RD CAC (not +) sold for \$40,800 in February 2019. The current CAC CPG value is \$42,400 (n MS65 RD). This coin will see very strong bidding from anyone working on a SUPERB 2 Cent collection.

LOT 12**2C 1873 CLOSED 3. PCGS PR65 RD**

A lovely GEM Proof example, struck the final year of this short lived denomination, and it is high end quality for the eye appeal. This Proof only date saw only 600 coins struck, of which, this PR65 RD ranks high among those graded at PCGS.

The mirrors are bold, and highly reflective with a strong RED color. Sharply struck up, both sides have crisp definition. Very eye appealing, we are unsure why CAC did not bean this lovely example. Housed in an OGH.

PCGS 20, NGC 8. The present coin sold in June 2013 for \$7,350; more recently one sold in June 2018 for \$6,600. The current PCGS Price Guide value is listed at \$5,500. Very rare any finer, this coin will see strong bidding.

LOT 13**2C 1873 OPEN 3. PCGS PR65 RD**

The final year of this short lived series was struck only in Proof. Two date logotypes were used, one with the Close 3 and the other with the Open 3. In higher grade, the Open 3 variant is scarcer than the Close 3.

Highly reflective mirrored fields are brilliant red, a color trait that is decidedly rare in all grades, especially so in in GEM. Sharply struck, the devices show crisp definition and surfaces that are near perfection, devoid of any serious flecks or marks. A bold eye appeal will delight any collector.

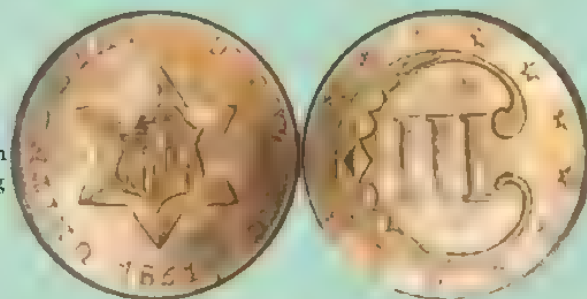

Only 500 were struck. PCGS 7, NGC 6. The most recent sold three years ago for \$6,169 and a month before that, one sold for \$9,988. The current Collectors Universe value is listed at \$8,500. RARE any finer, there are just 6 reported in PR66 RD at PCGS, which sell for \$25,000-\$30,000 in auction, making the present example a great value in comparison!

INTENSE, rich mint bloom and luster grace clean surfaces. Toned in pretty golden, ice blue, and tangerine, with splashes of amber in select areas on the reverse. A fresh and ORIGINAL piece. Die striations, not scratches, are noted in the fields. A minute pin scratch is present from the rim to the O of OF and is only seen under strong magnification

PCGS 217, NGC 177, CAC 44. The only recent auction record for a PCGS CAC graded piece was a coin that sold for \$700 in an ebay auction in August 2019. It is significant to note that of the hundreds of coins graded MS65 by both grading services, only 44 have cut the muster to receive the coveted "green bean". Keep that paddle up if you want to take this one home!

**LOT 15****3CS 1851-O PCGS MS66 CAC**

One look at this New Orleans jewel and you will fall in love! This is the only year that any mint other than Philadelphia struck a three cent silver. Boasting a healthy mintage of 720,000, these are common enough in lower Mint State grades, but become scarce in MS65 and RARE any finer. Pearly opalescent luster swirls in the fields, accenting Premium Quality GEM surfaces that are dusted gently with rose, lilac, pale gold, and peach iridescent toning. Even from arms' length, the luster blooms vividly, giving this totally original, high end 51 O trime a truly gorgeous look.

PCGS 32, NGC 13, CAC 20. Just 4 are graded finer, all MS66+. The average APR for the last 10 examples comes to \$5,797 and the PCGS Price Guide value is listed at \$5,500, and the value doubles in MS66+. PCGS 226; NGC 190, CAC 55. Two sales of CAC stickered pieces are noted. One for \$625 in August 2019 and another for \$492 in January 2020. The eye appeal of this coin blows away the other two. We expect spirited bidding for this beauty!

The only thing we see is an itty bitty break in luster near the U of UNITED and only with a strong loupe!

PCGS 135, NGC 68, CAC 28. A CAC PCGS example sold in December 2019 for \$1,680. If you are looking for the PERFECT example of the date and grade, your search is over, but we are betting you will have to pay strongly to add this one to your collection!

This satiny lustrous GEM has a thick frosty texture in the fields. The surfaces are brilliant and virtually untoned on both sides, with just a hint of golden iridescent tone that appears when rotated in a light. Sharply struck from boldly clashed dies, this beauty has a stunning and cool look!

PCGS 18, NGC 9, CAC 9. The most recent PCGS/CAC example realized \$6,000 in the 2020 FUN auction. Prior to that, the Stone Collection coin, NGC MS65 CAC sold for \$9,375 in May 2018. We challenge you to find a mark anywhere on this BLAZING GEM! Remarkably well struck for an issue that is notorious for its weakness in striking detail at the date or in the lines of the shield or both! Happily, this piece is a welcome exception to all of those issues. Incredibly lustrous and eye appealing with mint bloom graced by just a trace of champagne gold toning. WOW! Why this coin is not in an MS66 holder is a mystery to us. MS66 graded pieces trade for over \$10,000! When you consider value, this could be the coin of the sale!

PCGS 33, NGC 17; CAC 14. Nothing recent for auction records, just two sales in October 2015 for \$2,233 and another in July 2016 for \$1,998. In our humble opinion, this coin is heads and tails above the one with the auction records. GET READY TO RUMBLE for this coin is worthy of a premium bid!

SUPERB and fully Prooflike, this is the **SOLE MS67 PL** graded at PCGS and is one of the most visually appealing examples of this low mintage Civil War issue. Only 12,000 circulation strikes were produced.

At first glance you would think this vibrantly reflective jewel was a Proof striking, but then, when you see the sharp clashing you realize that it is not. The obverse has a bold, almost CAMEO like appearance with the devices fully frosted. A band of iridescent toning frames the lower periphery of the obverse, while the reverse is drenched in a wonderful cobalt-turquoise and rosy-orange toning. The eye appeal is amazing overall, and this is a great looking beauty that is surely going to be at home in one of the **FINEST** of trime collections.

Both sides offer a thick, frosty mint bloom from below a speckled blue and gold patina. Just a baker's dozen are graded finer, with just two graded MS67 as finest, (we sold the most recent for a record \$14,100 in December 2017. This exceptional coin represents a great value in our mind, and is bound for a nice collection of this really cool series.

Not the most common date in this series, it is indeed quite scarce in MS65 or finer grades. Totally original surfaces show a frosty mint bloom under golden-tan accents on pleasing steel-gray surfaces. The eye appeal is bold and this date is quite difficult to find any finer.

PCGS 27, NGC 25. This coin last sold in an August 2006 auction, realizing \$1,150, which happens to be the current Collectors Universe value. We don't know why CAC did not bean this GEM, it is totally original and pleasing for the assigned grade. Fewer than two dozen have ever graded higher at PCGS. Good luck.

Sometimes we wonder how a coin like this does not get "beaned" at CAC. We like this coin a lot for the grade and it has a warm satiny glow and some light golden hues. A tick or two are noted with the aid of a glass, but they do not bother the eye appeal.

PCGS 37, NGC 8. None have sold in major auction since 2017. The current Collectors Universe value is listed at \$1,050. Only 16 are graded higher.

An exceptional GEM among the FINEST graded, after 33+ years, PCGS has seen just two coins graded higher. The present GEM is totally original, with a bold luster that radiates under a dusting of pale patina. Sharply struck with only a tiny mark found with the aid of a strong glass. Regardless, the eye appeal is excellent.

Not only is this coin GORGEOUS, it is also super neat! Struck with an errant 1 from the date punch protruding from the front of Miss Liberty's neck. A prize for the variety specialist!

It is important to note that there are only 3 of the variety that grade finer at PCGS, all of which are MS67, and one of the pieces sold in October 2015 for \$19,388! We anticipate some spirited bidding to ensue for this rarity!

Ex Childs and Bruce Scher Collections.

A very pleasing coin that was part of both a great old time collection and a wonderful former #1 PCGS Registry Set. Both parts of the pedigree should attract lots of attention. Pleasingly satiny with a good GEM quality luster. Some minor striking weakness is seen in the center portions of the III on the reverse, otherwise, the devices are nicely rendered. There is some planchet roughness seen on Liberty's cheek and only a minor fleck or two scattered about, otherwise the eye appeal is very nice.

PCGS 33, NGC 18. RARE finer, with just 14 graded from MS65+ to MS66+. PCGS 5, NGC 8, CAC 2. This marvelous GEM does not appear to be either NGC/CAC coin that sold, the only CAC-approved records, each being over seven years old, bringing \$9,400 and \$9,988. OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. This magnificent, PQ GEM is a toning lovers dream!

Mingled shades of gold and pale apricot dominate, blending to periwinkle, rose and soft green toning at the peripheries on the obverse, while the reverse has a soft golden hue. The lovely surfaces are aglow with a brilliant luster. Razor sharp in strike this beautiful coin has full, bold definition on both obverse and reverse. Pretty as a picture as they say, this stunning coin will fit in any top flight set!

Like the 1883 and 1884 three cent nickels, the circulation strike mintage was tiny, only 1,000 were struck, far fewer than the Proof mintage of 3,790. As a KEY in all grades and a condition rarity at this lofty state of preservation this is a GREAT coin for any collection of three cent nickels.

Brilliant, satiny mint luster radiates all over on this GEM. Both obverse and reverse are remarkably smooth and devoid of any issues of any kind. The devices are quite sharp, offering fully defined details. Totally original, this GEM is housed in a first generation PCGS slab. We don't understand why CAC did not bean this impressive MS65.

PCGS 15, NGC 5. The Seattle Collector bought this coin from the February 2011 Long Beach Auction, where it sold for \$17,250. We haven't even mentioned the intense BEAUTY of hints of baby blue, lilac and gold toning that grace thickly frosted fields and motifs. A couple of well concealed marks are noted.

PCGS 74; NGC 33; CAC 19. No recent auction sales of CAC graded pieces. Non-CAC graded pieces sold for \$985 in May 2019 and \$602 in October 2019. This fabulous coin deserves careful consideration and aggressive bidding!

Sharply struck, this totally original GEM has a glorious visual allure.

PCGS 27, NGC 19. The last NGC-graded MS66 was CAC approved and sold for \$1,440 in March 2018, prior to that, two non-CAC examples sold for \$720 and \$764 back in 2017. A fresh and original example of this first year of the nickel series. Short lived, the with Rays reverse was only struck in 1866 and part of 1867, the busy nature of the design proved difficult to strike and were removed. The present coin has a warm satiny lustrous glow that accents well struck design features and clean, defect free surfaces. The soft patina is totally original and visually appealing.

PCGS 180, NGC 173, CAC 41. The most recent brought \$1,320 in June 2018 and prior to that we sold one in our September 2016 Premier Session, for a hammer price of \$1,550. The current PCGS value is \$1,350 and the CAC CPG value is \$1,620. Scarce any finer, worthy of a strong bid.

A pleasing example of the first year of the type without the Rays on the reverse. Both sides show exceptional luster and nicely struck up devices. We note some minor lines on the reverse, perhaps from an old gentle wiping, which accounts for it not being endorsed by CAC. Even with the minor flaw, the eye appeal is wonderful.

PCGS 83, NGC 107. The average NGC-graded coin has brought \$564 going back to 2014 and the current Collectors Universe value is listed at \$650. A neat coin in an old holder.

PCGS 16, NGC 5, CAC 8. This coin sold 14 years ago for \$4,600, at a time when the population was only 5, and none finer. While today the Collectors Universe value is listed at only \$2,500 and the CAC CPG value is \$2,750, this coin will see very strong bidding from the specialist collector. Booming mint luster is slightly subdued on the reverse due to some gold, steel gray and ice blue overtones. **UNDERRATED** date.

The 1880 Shield nickel is the undisputed KEY date to the series in all grades. Only 16,000 were struck for circulation, and not only is it rare in all grades, it is excessively so in GEM Mint State, and virtually unknown any higher.

A strong satiny luster radiates all over, accenting well struck devices. While in some cases there is some confusion between semi-reflective Mint State coins and Proofs, there is zero confusion with this one. The surfaces are frosty with a soft glow and radial cartwheels. A pale peach, pewter and gold iridescent tone is gently dusted across the GEM quality surfaces. This is a great example for the collector looking to complete their set.

PCGS 7, NGC 4. This example sold back in June 2013 for \$73,496 and the current PCGS Price Guide value is listed at \$70,000. While more recent auction prices were lower, this coin has a great look and should bring a strong price when it crosses the block. Depths of MINT BLOOM which accent creamy, nearly immaculate fields, cannot be measured on this beauty! Better than average strike for the issue. Interesting obverse die cracks. One toning spot beneath the I in IN is noted for accuracy.

PCGS 218; NGC 162; CAC 37. No CAC graded auction records, however a non-CAC piece sold for \$508 in October 2019. Please note there are very few pieces that have obtained the coveted "green bean." Bid liberally, this coin deserves it!

**LOT 83****5C 1883 NO CENTS. NGC MS65**

This piece looks PROOFLIKE, the mirroring of the fields is so intensely contrasted with the heavily frosted devices. Keenly struck. Some light striations as made are on the reverse. A minute tick is seen under magnification in the field in front of Liberty's nose.

**LOT 87****5C 1886 NGC MS65**

Like the 1885, the 1886 Liberty nickel is a conditionally RARE date in Mint State, especially in GEM grade and finer. This MS65 graded example has a rich, satiny mint luster that blooms all over, accenting the lovely pastel iridescent toning. Well struck throughout, this fresh example has a wonderful eye appeal and is kept from a finer grade by a single tiny fleck or two.

PCGS 54, NGC 24. The most recent NGC-graded example was CAC-approved and sold for \$5,175 in July 2017, prior to that, a non-CAC example sold in the 2017 FUN auction for \$6,463. LOT 95**5C 1894 PCGS MS65 CAC**

If you are someone who has been collecting Liberty Head nickels for a while, you will appreciate the WONDERFUL quality of this date run offered in this sale. Think of how many frogs you have discarded due to ugly toning, milk spots, bagmarks, etc, to get to the prince (or in this case PRINCESS). This piece is the CAT'S MEOW of 1894 nickels! It has everything going for it! Stunning luster is enhanced by beautiful cascading color in shades of rose, ice blue, tangerine and lemon yellow. Crisp, fully struck motifs. One small break in luster to the right of the lower portion of the V is all that is worth mentioning.

**LOT 100****5C 1899 NGC MS66**

A brilliant GEM example, a wonderful representative of the date/grade. Smooth surfaces are adorned with a bold mint luster that radiates on both obverse and reverse. Showing some minor bluntness of strike at the lower left portion of the wreath can be ignored, as the rest of the design is well struck up and the surfaces are devoid of any flaws of consequence. The eye appeal is lovely.

PCGS 79, NGC 42. The current Collectors Universe value is listed at \$750 and the most recent NGC-graded coin brought \$552 in March 2019. NGC has graded just 10 examples finer, and the last MS67 sold in June 2013. Another nice, fresh Lib nickel.

A lovely, satiny GEM. Sharply struck, this pleasing 1901 nickel has a delicate blush of iridescent gold at the rims, and just a few tiny ticks which account for the assigned grade. We are dumbfounded as to why CAC did not bean this one.

PCGS 196, NGC 159. The last non-CAC NGC-graded example sold for \$423 in September 2016 and the current Collectors Universe value is listed at \$375. Housed in a slightly older holder, this coin is fresh to the market and should bring a healthy bid.

ELEGANT is the word to describe this beauty! Soft tangerine, baby blue and gold toning graces deep, mint bloom and luster. Superb strike. Gorgeous quality and eye appeal. One tick on Liberty's chin away from MS66 status. Housed in an old green label holder.

PCGS 247; NGC 175; CAC 48. An underrated date with a CAC sticker, as evidenced by the small quantity of pieces with green beans versus the amount that have been graded in MS65! It's hard to believe that the finest graded example of this date is an MS66+. With a mintage of over 26,000,000 pieces you would think more examples would exist in pristine condition. With that in mind, it makes this presently offered specimen even more special and **UNDERRATED** in its GEM status! Crisp definition, especially on the left corn ear, which is typically weak. Beautiful waves of sky blue and peach toning grace lustrous fields. A few tiny flea bites are noted for accuracy.

PCGS 40; NGC 9; CAC 14. No CAC auction records, but a non-CAC example did sell in October 2019 for \$552. A great opportunity to pick up a tough issue in the grade. A generous bid will get it bought!

LOT 116**3C 1863 J-321. PCGS PR65 RB CAC**

This is a very rare and seldom encountered true die trial, struck in copper from the regular issue Proof dies, and is considered to be R-7-, with perhaps 7-12 known in all grades. Combined, PCGS and NGC have graded nine examples which might include some duplication; Pollock lists eight, including two in the Connecticut State Library and one in the ANS. Highly reflective surfaces gleam with a strong, watery mirrored texture. Pleasing color, including the majority of the surfaces

boasting the original red mint color, with faded accents of azure and violet that really pop in a brilliant light source. A few scattered micro-flecks are seen with the aid of a strong glass, which do not impact the overall SUPERB quality and visual allure.

PCGS 1, NGC 1, CAC 1. This is the **ONLY** one in PR65 RB, recently crossed over from NGC to PCGS. Off the market for a decade, last selling as NGC PR65 RB without a CAC sticker in April 2010, where it realized just shy of \$10,000. The PCGS Price Guide only goes to PR64 RB, which is listed at \$8,500. If you specialize in three cent silvers, and want to extend your collection, these RARE patterns seem to be a bargain!

PCGS# 70478 | ESTIMATE: \$8,000+**LOT 117****3C 1863 J-322. PCGS PR62 CAC**

This is an extremely RARE R 7+ die trial struck from the regular Proof dies, in aluminum with a plain edge. These were produced in the 1870s and sold in sets that included the Seated Liberty quarter, half, and dollar that were muled 1863 obverses with the With Motto reverses. There are six currently graded between PCGS and NGC, and Pollock lists three in his reference. From our July 2018 sale of the Steven Cook Collection, where we described it as: Generally very pleasing with an icy look. Taking in just the obverse you see a coin that is finer than you would expect of a 62 grade. The reverse has some streaks that were in the planchet, as made at the mint. Housed in an OGH

PCGS 1, NGC 0, CAC 1. Selling in July 2018, it realized \$2,585. Prior to that, this coin was first offered in Stack's September 1997 sale where it realized \$3,300 and more recently it sold for \$2,943 (prior to being CAC'd). The current Collector's Universe value is listed at \$3,750.

Ex Lemus Collection.

A Rarity-5 die trial, using the regular 1865 Proof dies, struck in copper with a plain edge. Totally original, this GEM has a pleasing patination that is seen on smooth, flashy fields. Hints of red color are seen mellowing to an even brown, with accents of violet and blue. A pleasing piece from the first year of this obsolete denomination, this coin has an excellent pedigree.

PCGS 2, NGC 4. Last sold in the 2009 FUN auction, which featured the extensive Queller/Lemus Collection of patterns, this coin was earlier in the Corrado Romano Collection, sold by Stack's in June 1987, lot 837. This coin realized \$2,760 over a decade ago, and none have sold in nearly six years! NONE are graded higher at NGC in the BN category. This coin has a lot to offer the collector, and is worthy of a premium bid.

LOT 119**3C 1865 J-414. PCGS PR64****CAC**

Ex Denali Collection.

This is a VERY RARE die trial struck in Oroide using the regular Proof dies. Considered R 7+, with perhaps 4-6 known in all grades, which matches the combined PCGS and NGC Population figures which come to 4 graded examples. The Oroide alloy is a blend of 19 parts copper and 1 part aluminum, which gives the metal its distinctive golden tone.

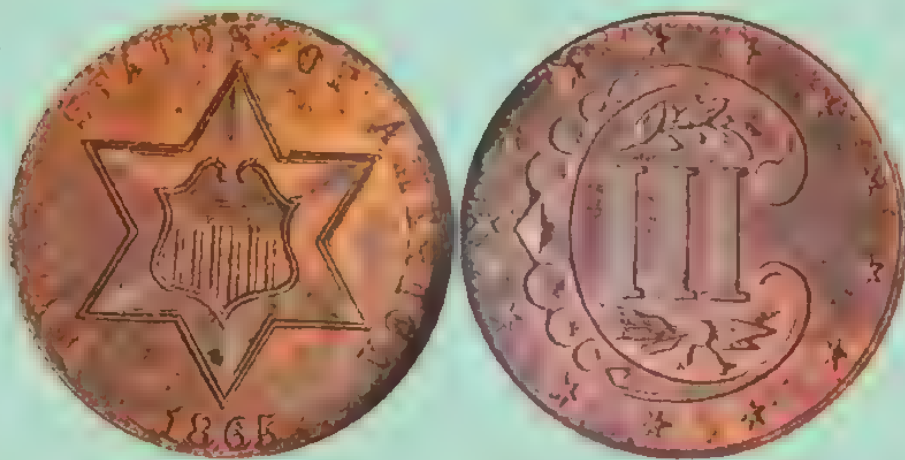

Sharply struck, the lustrous Proof surfaces glow brilliantly on both sides. The oroide alloy has delicately toned with an apricot peach hue that is quite delightful to behold. Some scattered flecks, natural to the reactive nature of the metallic blend are noted, but there are no serious flaws. Struck from a cracked and clashed state of the dies. Very cool and VERY RARE.

PCGS 1, NGC 0, CAC 1. The last time this coin sold was in March 2012, realizing a record \$8,625. Today, the Collectors Universe value is listed at \$6,500. There is just a single PCGS PR65 finer, a coin that has never sold in auction.

This is an extremely RARE, R-7+ die trial struck in copper with a plain edge. An estimated 4-6 are thought to survive per the Judd rarity scale, but between PCGS and NGC there are eight in all grades and designations.

Flashy, watery mirrored surfaces show ample original mint red color that mingles with a dusting of dappled periwinkle, magenta, and blue hues. The devices are sharply impressed with just a single lint mark to the left of the date, which will forever identify this GEM as the Queller/Lemus coin.

From Heritage's 2009 FUN Auction, featuring the Queller/Lemus Collection. Earlier obtained privately from Stack's; ex 1998 ANA auction, lot 5074; ex Kagin's 50th Anniversary Sale, May 1978, lot 1275; ex Robert Hughes ad, July 1977.

PCGS 0, NGC 1. This GEM realized a record price of \$9,200 in the 2009 FUN auction, and no other RB has ever sold in auction. As the FINEST graded example, this coin will fit in beautifully in any advanced set of trimes, Patterns, or box of 20 rarities. Bidding will be intense, so good luck!

LOT 121**5C 1865 J-417. PCGS PR64 RD CAC**

This is a wonderful transitional Pattern, that shows the adopted Shield design, dated 1865, and the regular reverse die for the 1866 With Rays nickel. These extremely rare novodels were likely struck in the 1870s for sale to collectors. Struck in copper with a plain edge, J-417 is a R-7- issue, with fewer than a dozen known in all grades; the combined PCGS and NGC Populations are 13, making the R-7- seem very accurate, considering crossovers and resubmissions.

Blazing RED mirrors beam brilliantly on both s.des. The color is a bold and flaming brick hue with just a few micro-flecks noted for the sake of accuracy. The crisply rendered devices are sharp and the eye appeal is exceptiona. for the assigned grade.

PCGS 2, NGC 1, CAC 2. This coin last sold in auct.on back in September 2007 as an NGC PR64 RD. It was recently submitted for crossover and CAC. We note the following APRs as a guide for bidders: a PCGS PR63 RD sold in April 2017 for \$5,875; this coin brought \$6,900 as an NGC coin; and an NGC PR65 RD sold in November 2006 (!) brought \$7,763. The current Collectors Universe value is listed at \$6,500 and that level will prove low when the hammer finally falls. A great coin for anyone working on an advanced nickel collection! Good luck!

Another RARE Pattern Shield nickel, mating an 1865 dated obverse with the No Rays reverse adopted in 1867, these are believed to have been struck in the 1870s for sale to collectors. Rated as R-6+, with 13-20 believed to exist in all grades

Pale, totally original golden hues are dusted over reflective, nickel silver surfaces. The design elements are boldly struck up with a bold definition. It is interesting to not that the reverse die was so heavily polished that several letters are partially effaced at the tops. A very cool and rarely seen Pattern. Housed in an old green tag holder.

PCGS 6, NGC 1, CAC 2. This GEM realized \$7,050 in October 2014 and the current Collectors Universe value is listed at \$7,500. Worthy of a great cabinet of Pattern coinage, or a stunning assemblage of Proof Shield nickels.

5C 1866 J-489. NGC PR66 CAC

One of the **FINEST** graded examples of this R-6- Shield nickel pattern, an intriguing variation where the ball at the base of the shield divides the date and the reverse has the "Dutch" 5 in the wreath reverse. Listed as R-6-, there are 13-20 estimated to survive in all grades.

Flashy, chrome-like reflective fields beam with an exquisite depth for the metal. There is a faint blush of iridescent silver-white tone that attests to the wonderful originality of the piece. Sharply rendered, all the details stand out wonderfully against the smooth surfaces.

PCGS 4, NGC 2, CAC 1. Last sold for \$3,600 in the 2018 FUN auction; prior to that, one sold for \$4,230 in the 2013 FUN auction. The current Collectors Universe value is listed at \$5,600. With none finer, this is a great coin for any serious Pattern nickel set.

This is a **RARE** pattern, struck in 100% copper, featuring the whimsical "Dutch" 5 reverse. A low R-7 Pattern, fewer than a dozen are known in all grades.

Deeply reflective, toned copper surfaces have a warm chocolate brown that boasts a lovely teal and cobalt blue with some tinges of original mint red. Sharply struck up, the design types are quite bold.

PCGS 2, NGC 2. Long off the market, this is not the one that sold in our July 2018 Regency Auction. The current Collectors Universe value is \$4,200. Rarely seen, we believe this coin will delight any Pattern or nickel specialist.

Another really cool Shield nickel pattern, featuring the ball that divides the date on the shield and a short 5 in an olive or laurel wreath on the reverse. Struck in copper with a plain edge, J-495 is rated R-7+, with 4-6 known in all grades.

This lovely, mahogany brown with red clay hues that are just a real pleasure to look at. The surfaces show a wonderful reflection, particularly on the reverse, where there are tinges of gold and blue that add to the exceptional eye appeal.

PCGS 2, NGC 0, CAC 2. This coin realized \$7,475 in July 2009. Prior to that, it sold in Superior's October 1992 auction for \$6,875. The current Collectors Universe value is \$8,000 and we think it should bring somewhere close to that today. Good luck!

A GEM example of this R-5 transitional Pattern nickel, pairing an 1866 dated obverse die and the No Rays reverse adopted in 1867.

Offering a bold, CAMEO contrast on both sides, the fields show an exceptionally flashy brilliance and seriously deep, clear reflection. The sharply struck up design elements have a great frosty texture that contrasts nicely. There are no serious marks or flecks can be found anywhere, just some minor specks can be seen with the aid of a strong glass, attesting to the originality of this GEM. The eye appeal is very high end! This coin is incorrectly numbered as PCGS # 60703; the # for CAMEO is 860703.

PCGS 6, NGC 2, CAC 5. (For PCGS # 860703). This coin brought \$4,113 in September 2014, and a decade earlier, it realized \$4,370. The current PCGS Price Guide value is \$5,500. What a special coin worthy of any advanced Shield nickel or Pattern collection.

Struck on a broad copper planchet with a reeded edge. Rated as R-7+, with just six currently seen at PCGS and NGC in all grades.

A wonderfully preserved GEM with light mirrors in the fields. The unstruck areas at the rims have a satiny texture. Nicely struck, the surfaces are mostly red with some iridescent toning distributed over the devices. There are a few old flecks, but the eye appeal is quite nice.

Ultra deep, beaming mirrors beam all over on this **SUPERB GEM**. Thickly frosted devices stand out boldly against the highly reflective fields. They are icy smooth

This is an old friend. Our sister firm, Legend Numismatics, handled the Denali Collection of 1870 Patterns in 2010.

Flashy Proof fields offer a lovely watery reflection bringing out an impressive array of totally original toning. The devices are sharply struck up and frosty. The surfaces are totally devoid of any flaws and the eye appeal is exceptional.

PCGS 1, NGC 0, CAC 1. Only one other example is graded higher a PR66. This coin sold for nearly \$10,000 in the 2014 FUN auction and the current PCGS Price Guide value is listed at \$9,500. A wonderful and RARE pattern.

Struck in nickel with a plain edge, this coin is R-6-. This is the FINEST example extant. Bold, watery reflection in the fields, accented a pale blue iridescent tone that is a true delight. Well struck and very nicely preserved, this coin has a great look.

Tied for FINEST graded example of this Rarity 6 pattern Liberty Head nickel at NGC. Longacre's Coronet Head of Liberty design, similar to that on the three cent nickel is feature on the obverse, while the reverse has a large V and CENTS in the wreath. The V is in retrograde, with the thick arm on the right, rather than the left. Struck on a 100% copper planchet.

This is a highly reflective, sublime quality GEM. The hard copper fields are smooth and free of any distracting lines. A lovely iridescent blue overtone mingles with coppery brown hues below. Sharply struck up, the eye appeal is unaffected by the few microflecks we see with a strong glass.

PCGS 0, NGC 2. The most recent NGC PR66 BN sold in January 2006, bringing \$3,220. More recently we sold an NGC PR65 BN for \$2,820 in our May 2018 sale of the Steven Cook Collection. This is a very pleasing GEM example of this R-7- Liberty nickel pattern by Longacre. Struck from the same dies as the J-1051 above, this one struck in aluminum with a plain edge. The planchet had many flaws, including a small lamination on the reverse rim. Highly reflective surfaces shine through a dusting of pale iridescent tone that attests to the originality of this well struck rarity. NOTE: There are a number of scuffs on the holder, not on the coin.

PCGS 1, NGC 1, CAC 1. This coin last sold in June 2014 for \$4,700 and the current Collectors Universe value is listed at \$5,500. A single PR66 is finer and it has not been seen in auction for 15 years. This is a rarity worthy of a strong bid.

5C 1871 J-1053. NGC PF64

Here is another really cool Longacre Pattern Liberty Head nickel, struck on a nickel planchet, with a plain edge. Listed as Rarity-6+, it is quite scarce indeed.

Highly reflective mirrored fields beam wildly all over. While these are not listed as restrikes, looking at this one, it appears to have been a later strike from this die pair with some minor rust in the fields, a bulging die, and a spidery die crack connecting UNITED STATES OF AMERICA on the obverse. There is an area of light haze on the obverse field, which is typical of this alloy, and we note a touch of high point weakness on the obverse devices, normal for nickel strikings. Overall, appealing and difficult to locate.

PCGS 2, NGC 2. This coin has sold twice in the last decade for about \$1,600 and the current Collectors Universe value is \$3,000. What a great opportunity of any collector of nickels, or patterns.

The **FINEST** graded example of this **VERY RARE** pattern issue, we think this is the one from the March 1981 Bowers and Ruddy auction, lot 618, though the half tone image is hard to match exactly. A **HIGH RARITY-7**, there are just two graded by PCGS in any grade, and this one is very high end. Struck in aluminum with the regular issue dies, this was part of a copper and aluminum off-metal set.

GEM quality everything identifies this excessively rare die trial. Deeply mirrored fields are beaming with bold reflection that accents the highly frosted devices on both sides. The eye appeal is simply stunning.

PCGS 1, NGC 0, CAC 1. Neither this one, nor the Cat Daddy-Bob Simpson PR64 DCAM have sold in auction (the Cat Daddy Collection was sold in Stack's November 2007, and the coin did not make reserve). Ex Eric P Newman Collection, earlier ex Col. Green Collection.

This is an incredibly **RARE** pattern shield nickel, struck from the regular issue dies, in copper with a plain edge. Considered to be **RARITY-8**. While the population data at both services combined show four coins other than this one, this is the only CAC approved one.

Rich red color mingles with mellowing golden brown hues over the satiny surfaces. Interestingly the fields are not mirrored reflective. The details are razor sharp in definition from an exacting impression from the dies. Also adding to the intriguing nature of this coin is the high wire rims on both obverse and reverse, especially so on the obverse. There are no spots or traces of contact anywhere to distract the eye, this coin has a great look and is essentially tied with the Simpson coin for **FINEST KNOWN** honors.

PCGS 0, NGC 1, CAC 1. This coin was last sold in December 2013 for \$9,400 and in the first Newman Collection sale, in April 2013 it realized \$11,163. In PR65 RB, the current Collectors Universe value is \$10,000 and is unpriced in 66 RB. Very reflective **RED** surfaces gleam from below a dusting of minor speckled toning which attests to the originality. This coin is essentially of **FULL GEM** quality and eye appeal, we are not sure why CAC did not approve it.

PCGS 1, NGC 0. This coin has appeared in auction a few times, the most recent in October 2015, realizing \$4,700. The current Collectors Universe value is listed at \$6,500 and this issue is **VERY RARELY** seen ever, this coin will end up in another great collection of patterns. Good luck!

LOT 146**LESHER 1900 AB BUMSTEAD. TYPE****1. HK-788. PCGS MS64**

PCGS has misattributed this near GEM Leshner dollar. It is really a Type 2, HK-789 (PCGS # 19002). The difference is the absence of scrollwork to the sides of the fasces on the Type 2

This is a gorgeous, high end example, tied for FINEST graded. Moderately Prooflike luster blooms all over on both sides of this impressive beauty. Light blue and rich rose hues are draped on both sides. Sharply struck up, this example has a great look.

Joseph Leshner was a Colorado pioneer and owner of a silver mine. He struck these tokens, which each contained a full ounce of silver, with a face value of \$1.25, which could be redeemed at various merchants in the area. Bumstead, who was a Grocer in Leshner's hometown of Victor, CO was his largest customer, and thus many Leshner dollars are from this issuer. Running afoul of federal authorities, soon after he began striking these "souvenirs", the Secret Service put an end to the issue.

Between the two Bumstead types, PCGS has graded five and NONE FINER, CAC has approved 2. Again, this coin is misattributed by PCGS, which is why we include info on both types combined. This piece sold for \$6,463 in the 2017 FUN auction. No Type 1 has ever sold in auction, making this the FINEST available. We love the look of it, and its historic place in numismatics makes it a very interesting private issue, popularly collected by specialists in Territorial pieces. Good luck!

Miller 43.1-Y, W-4250. This is the only die variety that features the misspelled CONNFC legend. Considered to be R-2 as a variety, this lovely AU coin is likely in the condition census for the variety. Pleasing glossy brown surfaces are smooth and hard, devoid of the typical roughness or issues that plague Connecticut coppers. Both sides are well struck and well centered, imparting a great visual allure.

PCGS 4, NGC 0, CAC 1. This coin sold in 2017 for nearly \$2,000. This one is worthy of a very strong bid, it rivals the PCGS MS61 example that sold in the Robert Martin Collection (November 2019), ex Eric P. Newman Collection, at \$3,840. We can see this one bringing a similar price.

C-2, noted by the closeness of ST in STATES on the reverse. A lovely, boldly lustrous GEM. Brilliant original mint red accents the violet tinged brown surfaces. Radiating mint blooms all over that swirls with strong cartwheels. Sharply struck with fully rendered devices. Exceptional surfaces devoid of any serious marks or carbon flecks of any kind. Likely from a hoard discovered by Elmer Sears around 1935, which Walter Breen noted to have contained "fiery mint red Uncirculated" coins.

The current Collectors Universe value is \$3,900 and the current CAC CPG value is \$3,120. We sold an example in July 2017 for a then record of \$6,169. What a lovely GEM example for the Coronet half cent type. Well struck devices stand out against smooth lustrous surfaces that are toned in a soft brown, pale iridescent blue accents and a wealth of golden-red that clings to the protected areas of design types. A few tiny ticks keep this GEM in the current grade, but the eye appeal is certainly higher.

PCGS 41, NGC 57, CAC 26. There are three graded MS65+ at PCGS and just five finer (all MS66 BN). The current PCGS Price Guide value is \$1,500 and with its great look, we think that level will be exceeded when the hammer falls. A great type coin.

A warm, medium chocolate brown toned S-123, an R-4 variety that was one of the three varieties that turned up in the famed Nichols Hoard.

Identifiable by the 6 berries on both sides of the wreath, the high position of the final 0 in the denominator, the high placement of the date, and the cut on Liberty's cheek which Breen opined was a piece of another die that fell out and damaged the die.

Boldly lustrous with wonderful surfaces, this coin is a delight for any type or early copper collector. Well struck and devoid of any serious marks, there are just a few little imperfections in the planchet, which were mint made. The eye appeal is excellent. Hints of mahogany red-brown really pops when rotated in the light. We love CHOICE early large cents, and the present example is high end and borders on the GEM grade.

PCGS 38, NGC 5, CAC 16. The current Collectors Universe value is listed at \$20,000 and the CAC CPG value is \$19,400. The three most recent PCGS/CAC examples sold in the \$14,400 to \$17,625. Very scarce any finer, just 14 are graded higher in the BN category, this one is at a great value range for most advanced collectors. We anticipate strong bidding for this beautifully preserved near-GEM.

A low pop GEM. A blanket of warm brown color kisses satiny surfaces. Fully struck design details with broad rims. Some traces of darker toning are noted around the stars and the letter E of UNITED. No contact marks! A small area is noted where the design was struck through grease in the die on the neck near the lower hair curls. Part of the method of manufacture, not a detracting feature.

PCGS 57; NGC 54; CAC 32. We sold a CAC example in September 2018 in our Regency Auction, the Naftzger coin for \$2,174 and another piece sold in January 2019 for \$1,320. Worthy of aggressive bidding!

1C 1860 POINTED BUST. PCGS MS66+ CAC

Among the **FINEST** graded examples of this variant, just two coins are graded higher. This is a stunning example, featuring a bold, semi-Prooflike, flashy red luster on the obverse and a beautiful satiny mirror frost on the reverse. Sharply struck on both sides, the obverse devices stand out with a nearly cameo like look at certain angles. The vibrance of the surfaces is captivating and gives this **SUPERB** coin a great look, especially for a Copper nickel cent, which usually comes with a pale gold, almost washed out look, this one is wonderfully original and naturally toned. What a great looking; it is amazing that there are two graded higher!

PCGS 14, NGC 2, CAC 8. There are 4 in MS66+, and two finer. While the most recent sold for \$7,200 in October 2019, we sold one in May 2017 for \$12,000 hammer. The current PCGS Price Guide value is listed at \$11,500 and keep in mind that a 67 will cost \$35,000+ today. Good luck!

Tied for FINEST graded! This is simply a stunning SUPERB coin; even if this coin was RAW, you would easily be able to see that this has to be one of the FINEST.

Brilliant, blazing mint red color radiates all over on both sides. Bold cartwheels roll along the smooth, silky red surfaces. Every detail is sharply struck, with full crispness on both sides and the surfaces are essentially pristine. The eye appeal is simply amazing.

There was a regular PCGS MS66 RD CAC that sold in the 2019 ANA auction for \$19,200, and the current PCGS Price Guide value is listed at \$25,000. WOW! One of the key issues in GEM grades, and in MS66 RD, this coin is a very rare issue that is always in demand from collectors. This is a stunning example in an amazing state of preservation.

This cataloger believes this coin has been safely stored since the day it left the bank. The surfaces are of exceptional quality, totally uncommon for this issue. A strong glowing luster beams from all over. Both sides are a bold, original GEM Mint red color devoid of any toning, discolorations, or flecks of any kind. Miss Liberty and the details are fully struck and stand out. The eye appeal is fabulous!

An ever popular series, the 09-S has a low mintage, the majority of which saw extensive use in commerce has left very few GEM survivors, especially in this lofty state of preservation for collectors to choose from.

PCGS 27, NGC 8, CAC 11. The most recent example realized \$11,750 in our September 2019 Regency Auction, and prior to that, one sold for \$21,600 in the 2018 ANA auction. OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 164**1C 1909-S V.D.B., LINCOLN. PCGS MS66+ RD CAC**

A spectacular, bank roll fresh SUPERB GEM example of one of the most famous coins in the entire U.S. series. Rich and vivid brilliant original RED color shines on both sides. A fiery copper luster blazes on the obverse and reverse, showing off the varying hues of red. The strike is about as strong as we have EVER seen for the issue. Immaculate quality surfaces abound, indeed, unless you use some ridiculously strong glass, you cannot find a single mark, tick, dot, fleck or spot anywhere on either side. This coin looks the same today as it did the moment it fell from the dies.

PCGS 268, NGC 39, CAC 30. There are 27 graded MS66+ and just 15 of this important KEY date issue have ever graded finer. The last MS66+ RD CAC sold for \$18,600 in the 2020 FUN auction. The current PCGS Price Guide value is listed at \$24,000. Keep in mind that any MS67 RD is a \$50,000+ coin. A superb coin for any Lincoln cent set. A very important opportunity for any collector. Good luck!

**LOT 165****1C 1919-D PCGS MS66 RD CAC**

The 1919-D is a major condition rarity in this high a grade, precious few survive with the combination of GEM grade and RED color. Housed in an old green tag holder, this beauty is totally original with delicate iridescent toning dusted over brilliant mint red color, accenting strong luster and a razor bold strike. The eye appeal is absolutely stunning.

PCGS 13, NGC 1, CAC 3. One of those CAC-approved examples is the 66+ that we sold in June 2019 for \$8,225 and in regular MS66 RD, NO CAC approved coin has ever sold. The current MS66 RD PCGS Price Guide value is listed at \$5,000 and the current CAC CPG value is \$10,000. A mere eight coins are graded higher, making this an exceptional coin for any advanced Lincoln cent Registry Set. Good luck!

LOT 166**1C 1925-D PCGS MS65 RD CAC**

The 25-D cent was struck to the tune of more than 22.5 million pieces, but most examples, like many earlier dates were not kept in roll quantity with brilliant red surfaces, so any full red GEM is truly rare. Fewer than 100 have been graded by PCGS after over 33 years of grading. This example is quite lovely, with rich red color that is enlivened by a lustrous brilliance. The surfaces are free of any distracting marks, and a strong glass reveals nothing but a single tiny fleck in the obverse field. Sharply struck and the eye appeal is high end.

PCGS 84, NGC 12, CAC 15. The current PCGS Price Guide value is listed at \$4,000 and the CAC CPG value is listed at \$6,250. The last one to sell realized \$3,600 in the 2020 FUN auction and was not CAC. EXTREMELY RARE any finer, with just 11 in MS65+ RD and 2 in MS66. The value jumps to \$9,000 in MS65+ and \$75,000 in MS66 RD. This is a great coin for any Lincoln cent collector looking to fill this hole or upgrade their set.

LOT 167

1C 1943 BRONZE. PCGS MS61 RB CAC

Legend Rare Coin Auctions is honored to present this classic 20th century numismatic treasure. This awesome coin is truly legendary and recognized by collectors and dealers alike as one of the most sought after and famous of all 20th century rarities. The 1943 Copper or Bronze cent has been the subject of millions of phone calls to coin shops over the years and a date that has us all digging through pocket change and rolls of pennies from the bank with the hopes that we would be lucky enough to find one!

Well luck has shined on us because this presently offered coin is the REAL DEAL, and is truly among the FINEST KNOWN extant specimens. There are 20 enumerated in the combined PCGS and NGC Population data, accounting for upgrades, upgrades, and the like, perhaps 10-15 distinct examples are known in all grades, mostly circulated, ranging from XF45-AU58.

During World War II, various metals, namely copper and nickel were needed for military purposes, including munitions and were therefore commandeered for that purpose, causing the mint to look for other metals that could be used in the production of Lincoln Cent coinage.

In 1943, the copper and tin in the bronze planchets used for the ubiquitous cent were needed for war production. Some experimentation took place in 1942, with the silver colored zinc coated steel cent of 1943 being issued for circulation. It does seem that some 1942 planchets were left over in the coinage hoppers which were then struck in 1943, and released accidentally. The first one to be discovered was received in change from a school cafeteria in March 1947 by Don Lutz, Jr. That coin recently graded AU53 by NGC and sold in the 2019 FUN auction, see more below.

The presently offered MS61 RB is very high end for the grade, and while we make no guarantees, we think this coin is undergraded, the eye appeal is certainly much better than what you would expect for a 61. Additionally, the technical grade is fantastic in all aspects including strike, luster and aesthetic appeal.

This sharply struck coin is the second FINEST numerically graded by PCGS (behind the MS62 BN coin that has an extensive provenance to 1957 and is currently impounded in the Bob Simpson Collection). Easily identified as the James Schirripa Collection coin, with its tiny spot by the L in LIBERTY and small mark next to the C in CENT. Rich orange color with some violet-blue patina over smooth brown surfaces.

With a coin of this rarity and fame, the numismatic grade doesn't matter, the opportunity to add such a RARE coin does not come up that often! Do you realize if you become the proud new owner of this classic rarity, you take your place in history as one of only a handful of collectors throughout the world to have the privilege to do so? This isn't just a coin, this is a national treasure that represents an era in history when the free world defeated the oppression and imperialism of Japan and totalitarianism of Nazi Germany! A time when people came together to save lives, fight for freedom, and advance the good of mankind. In your hand will be the coin that forever symbolizes all of this struggle and triumph, and arguably the greatest generation in American history.

PRICE, TERMS, & LOCATION: This coin does not have an auction record anywhere. We sold a PCGS MS61 RB coin in May 2018 at Legend Auction for a record \$329,000. As the ONLY RB graded, this coin carries a Collector's Universe value of \$425,000. With just a single PCGS MS62 finer, a coin that will not likely be offered anytime soon, as it is impounded in the Bob Simpson Collection, this is the BEST PCGS graded coin available! We KNOW our record could fall when this important American numismatic treasure crosses the block. Good luck!

A simply stunning SUPERB GEM, a coin that ranks among the top half dozen examples of this date graded by PCGS and it is always a marvel to look at tiny jewels that have survived in such a stunning state of preservation. The eye appeal and technical qualities do not disappoint!

Sharply struck devices, this coin has complete, bold definition to the design types, the dies are gently clashed and the reverse has a bisecting die crack. A soft, delicate iridescence attests to the originality of this SUPERB GEM. Pale blue, light gold, soft peach-rose, and other pastel hues blend nicely on the satiny smooth superb surfaces.

PCGS 2, NGC 1. No PCGS-graded example has ever sold in auction. The only APR data we can provide for this marvelous coin is a PCGS MS66+ CAC that sold for \$9,664 we sold in May 2019 and a PCGS MS68 CAC that sold in June 2014 for \$64,625. The current PCGS Price Guide value is listed at \$21,500, and it would not shock us if this coin hammered at that level or more! This is an exceptionally high end quality GEM example from this low mintage year. Only 4,000 trimes were produced for circulation. This incredible survivor is bested by just a few examples at PCGS, but few can match this coin's originality and high end visual allure.

Sem.-PL luster reigns on the obverse while the reverse is frosty. Sharply struck on both sides, the smooth and clean surfaces are awash in pastel pinks, greens, blues, and golds, which are particularly vivid when viewed in the light, especially on the obverse. The eye appeal is quite special, a very attractive and beautifully toned little jewel.

PCGS 6, NGC 8, CAC 3. The last PCGS/CAC example sold in our December 2016 Regency Auction, where it realized \$13,513. The CAC CPG value is listed at \$14,500 and the current Collectors Universe value is listed at \$15,500. VERY RARE any finer, there are seven higher. Only 1,000 circulation strike trimes were produced in 1872 and they are, unsurprisingly RARE in any Mint State grade. Even in a modest grade like MS63 offered here, only two PCGS-graded examples have sold in auction, ever! The present CHOICE example is richly toned with warm pewter lilac hues that are accented by satiny fields and dusted over the sharply struck devices. Graded long ago, this coin remains in an old green tag holder, and we are not sure why CAC did not bean this lovely coin.

PCGS 4, NGC 7. The most recent one sold in the 2018 ANA auction for \$4,320 and prior to that, this coin sold way back in 2005! With Gems bringing five figures, this example is a great value for anyone looking for a totally original example. Above average mirrors beam boldly from all over. The mirrors are exceptionally clean save for a few strong die polishing lines (Mint made). The clarity and flash of the mirrors are way above average. The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

Whoa! What an exceptional SUPERB GEM! It looks like a common 1938-D, not a 1926! Tied for second FINEST graded, this is a remarkably preserved, stunning coin that were it not for a touch of iridescence, you would think the coin was struck today!

Exquisite surfaces are essentially pristine, showing off a billowing mint luster that is vibrant that accents the exceptional strike and brings out a magnificent visual allure that cannot be easily replicated.

PCGS 62, NGC 16, CAC 15. There are nine graded MS67+ and just a single MS68 graded higher. The most recent example to sell in auction brought \$11,400 in March 2019 and the current PCGS Price Guide value is listed at \$11,500. The single finer MS68 has never sold in auction and would bring a world record price if it did. The present coin is worthy of placement in world class Buffalo nickel collection. Good luck, as we know bidding will be fierce!

Truly a lovely GEM example. Satiny lustrous surfaces bring out a glowing brilliance on both sides. MS65s are the ideal grade coin for most collectors as this date is quite difficult to obtain any finer. The devices are nicely struck and boldly defined. A dusting of iridescent toning attests to the originality of the surfaces.

PCGS 88, NGC 28. The most recent example sold for \$2,640 in November 2019 and before that, one sold for \$3,600 in the 2019 ANA auction. The current PCGS Price Guide value is \$3,750. A popular date that is very rare any finer.

A lovely, nicely preserved near GEM example of this conditionally challenging issue. Housed in an old green tag holder, this coin has a pleasing, pastel iridescent toning on both sides, the light hues brought out by a rich mint luster that glows brilliantly on the fields. Some minor weakness of strike is seen and a few tiny marks are seen on either side, which are the cause of the assigned grade. The eye appeal is decent for the grade.

PCGS 281, NGC 160. This date does not generally come nice, as only 21 have ever gotten CAC approval. This is an above average example that is fresh to the market. The average price realized for a non CAC PCGS graded coin has brought \$2,663 over the last 10 examples. The current PCGS Price Guide value is listed at \$3,750. From our sale of the Maybach Collection, January 2019, lot 103, where it was described as:

"This is a very eye appealing GEM example of this classic Buffalo nickel issue—one of the most famous issues in all of American numismatics. Highly lustrous surfaces beam from all over with a wonderful multi-colored iridescent pastel toning seen on both sides,

especially on the obverse. Generally well struck, there is just a touch of the typical weakness known for the date, as the reverse die was worked over to take off some clashmarks. Indeed that is how this variety was created, when an overzealous filing with an emery board took off the some of the clashmarks, as well as the Buffalo's right front leg. Generally visible only with a strong glass is a tiny cut and a few minor ticks on the reverse."

PCGS 55, NGC 54. The current PCGS Price Guide value is listed at \$24,000 and this coin brought \$20,563. There are just 24 graded higher, this famed 20th century rarity is bound for a really nice set of Buffalo nickels.

Everything about this coin is special. Sharply struck and vibrantly lustrous, the surfaces are awash in a bold, seductive mix of pinks, golds, blues, greens, and oranges. Mother Nature really did some amazing art here. The color is really off the charts!

LOT 232

5C 1913 TYPE 2. PCGS PR68

Monumental quality for this early Proof Buffalo. Only 1,514 pieces were struck and this stellar example is tied with the absolute finest known today.

The currently offered PR68 is tied for FINEST graded at PCGS and it is a beautifully toned coin that is totally worthy of its lofty designation. The eye appeal is exceptional and it is a perfect combination of nickel blue to the centers and framed in varying shades of gold, yellow and crimson on both sides! The strike is bold throughout, as expected for a Proof, and this is the second style issued in 1913, with the straight and level ground. The original design was altered slightly after Mint officials realized the Type 1 with raised ground allowed the letters FIVE CENTS to wear down quickly, and vending machine owners believed the original design may be deemed a counterfeit by their machines. Thus as has been the case with several newly designed coins, changes quickly came about to appease various groups.

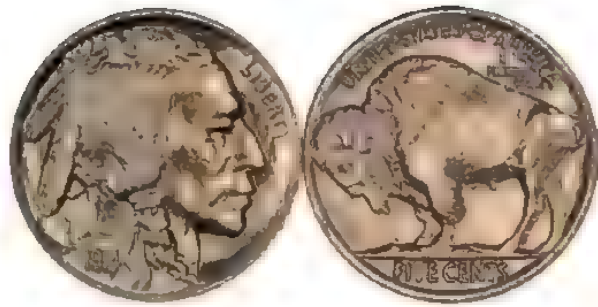

The Buffalo Nickel design was created by James Earle Fraser, an artist from outside the Philadelphia Mint. Fraser took images of three aging chiefs and developed a composite portrait. The chiefs used were Iron Tail (Custer's opponent at Little Bighorn), Two Moons, and John Big Tree. The desired result was a Native American that could not be attributed to any one tribe. For the reverse Fraser used an American bison named Black Diamond, then living at the Central Park Zoo in New York City.

PCGS 11, NGC 5. The most recent example sold for \$30,000 in October 2018, and the current PCGS Price Guide value is listed at \$35,000. NONE ARE GRADED FINER, making this a superb example for any set. We have long said that the Proof Buffalo nickel collection is a really neat project, a small number of coins that do come nice, in various grades, up to and including PR68. It would not be wrong if this coin were to ever be in a PR69 holder (WE MAKE NO PROMISES). Killer deep mirrors beam intensely all over. You need Ray Bans on to view the coin. A full MONSTER ring of neon like violet/green/gold hugs the peripheries and opens into sizzling lilac centers. Mother Nature could not have done any better. There are ZERO spots or imperfections to be found even using a strong glass. All of the details are sharply struck. The eye appeal is both memorable and jaw dropping!

BEAUTIFUL CAMEO contrast between razor sharp, thick, frosted devices and radiant, highly mirrored fields. A small mark on Liberty's thigh and one on the reverse are all that keep this coin from a higher grade. SUPERB!

Just 800 Proofs were coined this year. Shrouded in numismatic interest, 1859 represents a transitional year for both the half dime and dime when the UNITED STATES OF AMERICA legend was replacing the stars obverse and new wreath design for the reverse was employed

An off-center strike, measuring 10-30% is defined as a coin that was struck only partly between the dies and was struck either above or out of the collar. The struck part will show a partial strike and the unstruck area will amount to up to 30% of the overall planchet area. 10C 1921-D PCGS MS66+ FB CAC

Tied for second FINEST graded at PCGS, it is a SUPERB example of this important KEY date! While a key date in all grades, it is also a major condition rarity! Boasting a brilliant, snow white luster, surfaces are exquisite and offer virtual perfection in preservation. Not even the tiniest ticks can be found to distract the eye, and the luster is full and fresh. The devices are sharp, the central band is fully split and rounded and Liberty's hair details are fully rendered with full, crisp definition. Essentially untoned, there is just a touch of very light iridescent, silver white tone attesting to its originality.

The American economy took a short but sharp stumble in 1921 as the businesses converted back from producing war goods to peacetime activities. Farm prices fluctuated downward. These economic machinations dropped the demand for new coins so several dates saw much lower mintages than commonly seen in this era. This Denver Mint 1921 dime is destined to be a major highlight of an advanced collection and will certainly well represent this elusive issue as close to perfection as can be imagined.

**LOT 281****25C 1932 PCGS MS66+ CAC**

REFRESHINGLY beautiful! This date is often encountered with milk spots, dark, splotchy toning or other issues that inhibit the eye appeal. We can't stress how much this example is the complete opposite of those issues! Creamy luster and mint bloom accent well preserved surfaces. A tick on Washington's chin and one on the eagle's right shoulder are noted under powerful magnification. Faint hints of noney gold tone add to the eye appeal. Underrated in this lofty state of preservation.

PCGS 331; NGC 97, CAC 74. Recent auction records are from July 2019 where an example sold for \$1,260 and another in December 2019 for \$1,417. A big spread in price to MS67 and this coin could see that grade, so bid liberally!

Stone original and sporting UNSPOILED LUSTER. Toned in a pretty rainbow hued crescent on the obverse, with slight amber and soft gold reverse patina. A tiny tick on Washington's nose is noted under strong magnification. Of the 12.3 million coined, it is significant that this is one of the finest extant!

PCGS 77; NGC 131; CAC 29. Of the 77 PCGS graded specimens, only 17 are MS67+. Recent sales of CAC approved coins were \$2,040 in August 2019 and \$1,320 in November 2019. A battle among Registry Set contenders is sure to ensue on this great coin!

FATHOMLESS depths of luster are accented by a vibrant halo of fiery orange, sky blue and lemon yellow hues which graduate to a softer gold tone centrally. Immaculate surfaces. A companion piece to the 1945-D in the same grade, also offered in this sale. In fact, they look like they came from the same mint set.

PCGS 86; NGC 160; CAC 33. Of the total population, PCGS has only graded 16 pieces as MS67+. Two auction records are noted. June 2019 for \$2,650 and November 2019 for \$1,680. A generous bid will be required to secure this beauty!

**LOT 284****25C 1950-S PCGS MS67+ CAC**

This coin is MOOSE! The color is enough to make even the heartiest soul swoon! Intense crimson, royal blue, neon orange, lemon yellow and baby blue toning graduate across the surface in lovely rings of fire! The luster is spectacular and is not diminished in spite of the richness of the toning. Under careful inspection a mark is seen on Washington's cheek bone and a couple of ticks can be seen in the left wing detail.

PCGS 144; NGC 230; CAC 56. Only 28 coins have been graded MS67+ at PCGS. We sold a pretty toned example in our September 2019 Regency 34 sale for \$2,703. Another piece sold in November 2019 (white) for \$1,080. The winning bidder will have to pay up in order to procure this beauty!

Among the absolute **FINEST** graded 51-D quarters, this frosty lustrous **SUPERB GEM** is sharply struck up and offers virtually untoned (we note a touch of color at the rims) and unmarked surfaces. Virtually perfect, the fields show no marks, flecks, or any other flaw to the naked eye. True Set Registry quality!

PCGS 87, NGC 139, CAC 31. PCGS has graded 31 in MS67+ inclusive of duplicate submissions trying for the ultra rare 68 grade (pop 2). The most recent example with CAC approval sold in April 2019 for \$4,800 and we sold one in September 2015 for \$7,344. The current PCGS Price Guide value is \$5,000 and though neither MS68 has ever sold in auction, the Price Guide value is listed at \$15,000. Tied for **FINEST** PCGS graded, this exceptional quality **SUPERB GEM** stands out with an intriguing melange of blue, violet, olive, rose, gold, and apricot hues that bathe both sides. Clearly this coin was lovingly cared for since it likely came from a Mint Set, where the original holder married with Mother Nature to impart the awesome palette of color. Sharply struck and magnificently preserved, the lustrous surfaces bloom all over!

PCGS 300, NGC 471, CAC 80. **NONE ARE FINER** at PCGS. Two sold in December 2019 for \$960 and the current Collectors Universe value is listed at \$2,000. This one is truly exceptional and will realize a very strong price when the hammer falls. Good luck!

This coin looks like it came straight from an old time mint set, was handled with kid gloves, and sent directly to PCGS to be graded! The toning is **STONE ORIGINAL** and is intermingled in varying shades of amber, fiery orange, gold and ice blue over undiminished luster. A couple of tiny, well concealed tick marks are only noted under the power of a strong loupe.

PCGS 28, NGC 76, CAC 15. A piece sold for \$1,440 in November 2018. Only 7 coins grade finer! Looking at the price jump to an MS67+ and knowing how nice this example is, we feel this coin will fetch a handsome price!

This SUPERB GEM has more to offer than just high grade, indeed, the assigned grade is nearly meaningless when the toning on both sides is viewed and admired. Beautiful colors dominate the obverse, offering a blend of deep purple and shades of gold and pink, while the reverse is framed by concentric bands of rainbow color. There is a single tiny mark on the obverse field that we are noting for the sake of full disclosure.

PCGS 36, NGC 50. The current PCGS Price Guide value is listed at \$900, but with its absolutely stunning color this one will far exceed recent prices realized and published values. Good luck!

LOT 290**50C 1794 PCGS VF35 CAC**

O-101. This is a very pleasing example of this first year of issue. Perennially popular in all grades, the 1794 half dollar represents the only larger silver coin obtainable by most collectors (any problem free, collector grade 1794 dollar is a six figure rarity).

Evenly toned, with wonderful original dove and pewter silver-gray hues over just moderately circulated surfaces. A few tiny ticks are seen scattered, mixed in with some minor planchet adjustment marks, none of which have any serious impact on the visual allure. Of the 23,464 half dollars struck in 1794, experts estimate approximately 600 survive in all grades, most of which show serious problems, extensive circulation, or a combination of the two. Attractive VF or finer examples, especially with CAC approval are always in strong collector demand.

PCGS 25, NGC 21, CAC 8. The current PCGS Price Guide value is listed at \$22,500 and the most recent example sold in the 2020 FUN Auction for \$19,200. This very pleasing coin will see active and spirited bidding, and find itself in a fantastic type or half dollar collection when the bidding ends. Good luck!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

This is a very pleasing CHOICE example for the grade. Pleasing and original with a rich olive-gray in the fields and a lighter silver-gray at the highest points. This distinct Red Book variety is represented by just a single die pair, O-109, which happens to be the most common variety of the year. A great find for anyone working on a set of Red Book varieties. The present coin was struck from a clashed intermediate die state, where some die cracks are noted, but the milling about the reverse is still intact. A pleasing example that shows light to moderate wear on both sides, and traces of original glossy luster that remains in the protected areas of the design type. Soft blue and dove-tan patina on both sides. Cool die cracks are seen by the date and the stars are drawn to the edge.

PCGS 59, NGC 13, CAC 17. The most recent example sold in a December 2019 Online Only Auction for \$1,600. The current PCGS value is listed at \$1,650 and the CAC CPG value is \$1,750. Pleasing, original examples are always in demand.

A very intriguing GEM 1896 Barber half that ranks highly on the PCGS Population Report. The 1896 half dollar, despite a mintage of 950,000 is quite rare in MS65 or finer grades.

At first glance, the highly reflective fields, especially on the obverse suggest a Proof striking. Indeed, the devices are sharply struck and the rims show a wire "fin", similar to that on Proofs. However, we have compared this coin to actual Proofs, and the definition of the central details on the obverse are clearly softer, the depth of strike in the hair curls, laurel leaves, and facial details are not as crisp. The reverse details likewise show some softness in the feather details. Both sides are richly toned and the eye appeal is truly special. The lustrous surfaces show full Prooflike reflection on the obverse, and semi-PL luster on the reverse. There are a few minor lines and ticks under the toning, none of which have an impact on the naked eye appeal and are only visible with the aid of a glass.

PCGS 2, NGC 3. The last non-CAC PCGS MS66 sold nearly a decade ago, realizing \$9,775 and the current PCGS Price Guide value is listed at \$17,500. This is a seriously beautiful, multicolored tone UBER quality SUPERB GEM. Tied for FINEST graded, but not only is this one of the FINEST graded examples, we truly doubt that another one could match this one in terms of its bold, totally original toning and stunning visual allure!

Beautifully toned on both sides, the coin clearly sat unmolested, untouched in an old envelope where Mother Nature did her magic! Shades of tangerine, lemon-yellow, lime-green and brilliant lilac-silver are vivid and the colors are accented by a strong, original mint luster that beams boldly throughout! Sharply struck, the devices stand out with crisply defined design elements. We have seen very few Walkers that look like this, this is an AMAZING coin! If you are looking for a toned example for type, this is it!

PCGS 7, NGC 2, CAC 4. The last toned Walker we offered in this grade was a more common date (1942 PCGS MS68 CAC Pop 6/1) from our sale of the Valley View Collection, December 2019, which brought \$28,200. That coin was superb, but this coin is truly spectacular and with NONE finer, this is it for the FINEST toned example and truly most visually appealing!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 336

50C 1964 S.M.S. PCGS SP67+

A truly special modern rarity. One of the greatest non-error modern issues of the U.S. Mint and its greatness comes from the mystery of its creation.

After the assassination of President Kennedy, officials at the mint rushed to create a numismatic tribute to him, thus ending the Franklin half dollar and the beginning of the Kennedy half dollar. Since the Franklin half dollar had not been in use for the required 25 years, an act of congress authorized the redesign. Indeed, just a few days after the events in Dallas, mint director Eva Adams had Gilroy Roberts, the Chief Engraver to prepare models depicting the slain president. In January 1964, the first 1964 J.F.K. halves were struck, amounting to a total production of over 429 million circulation strikes between Philadelphia and Denver and nearly four million Proofs. Somewhere along the line about a dozen Specimen strikings were produced. These are clearly different in style to either those struck for circulation or Proofs. The devices on these Specimens are sharply struck, with exceptionally bold definition in the hair and the rims are high up and fully squared and the fields show extensive die polishing marks in the reverse fields. The obverse details include a small tick off the crossbar of the 4, a feature that has never been observed on any other 1964 half dollar, Mint State or Proof, showing that these dies were used for this small production and that is it. Whether these are die trials for the new design, or a bridge to the Special Mint Set pieces struck 1965-67, we do not know for sure. The first example of these specially produced half dollars appeared in Stack's June 1991 auction, where a full 1964 set with special prepared dies was offered in lot 591. What is suspected is that these sets were made special for Eva Adams for distribution as gifts or for herself, and were sold to New York dealer Lester Merkin sometime shortly before her death in August 1991 and his in June 1992. The remaining sets that he had purchased were sold in Stack's auctions from 1991 to 1995; a total of 9 sets made their way into the market that way. Today, about a dozen Specimen 1964 half dollars are known, making this the RAREST of all JFK half dollars, and the rarest non-error modern coin of the U.S. series.

Between PCGS and NGC there are 23 examples graded, which no doubt include crossovers, upgrades, resubmissions, etc. This spectacular coin is one of the two graded SP67+ at PCGS, the same grade as the D. Brent Pogue Collection coin, and is the median grade for PCGS-graded specimens. The surfaces are brilliant with its unique satiny texture that sets these wonderful rarities apart from their Mint State and Proof counterparts. There is a single minor mark on the ST of STATES, which will forever identify this important coin.

PCGS 2, NGC 1. In the past couple of years, these have taken off, as Registry collectors have fiercely gone after the precious few that have appeared in auction. A PCGS SP67 sold in April 2019 for \$108,000 and an SP68 sold in the 2019 ANA auction for \$156,000. The current PCGS Price Guide value is listed at \$115,000, and it would not shock us if this SUPERB coin brought that or more when the hammer falls.

LOT 340**T\$1 1873-CC TRADE.****PCGS MS63 CAC**

What an amazing 1873-CC! Our sister company Legend Numismatics has handled the very best of these and they have viewed this magnificent FRESH coin and told us, for an MS63 there can be NONE finer.

Virtually perfect surfaces do not reveal even the tiniest scrapes or problems. Even if you use a glass, you will find a few widely scattered microscopic ticks. A moderate luster beams all over (which is typical for the date). Both sides enjoy a totally original deeper pewter color. Miss Liberty and the details are well struck. We believe the reverse is what keeps this coin from a full MS64 designation. There are Mint made adjustment marks on the Eagle's lower left leg. Overall the eye appeal is fantastic!

PCGS 22, NGC 7, CAC 2. PCGS has graded possibly 9 higher while CAC has beamed 3 higher. The last PCGS CAC MS63 to sell in auction brought \$32,900 in November 2014. The current PCGS CAC value is \$30,200. Legend Numismatics has seen the majority of 73 CC TD's that have been graded and have taught us well about the series. We would definitely recommend this coin over a few MS64's we have seen (NO CAC of course). A true quality 73-CC TD is VERY rare!

We can not stress enough what an opportunity this is for any CAC or Trade Dollar Collector!

Totally original, this beauty offers a gentle powdering of clear gold and lilac patina enhances the stunning eye appeal of this PQ trade dollar. A totally pleasing XF-grade Carson City trade dollar. Retaining a wealth of detail, both sides show nothing but the most unobtrusive traces of contact, obtained during its use in Far East trade. Great eye appeal for the grade, this coin will delight any type or date collector working on an everyman set.

PCGS 32, NGC 9, CAC 10. The last one sold nearly three years ago, bringing \$1,175 in April 2017. The current Collectors Universe value is listed at \$1,050 and the CAC CPG value is listed at \$1,310. Much scarcer in all grades than the 534,000 mintage would suggest, this date is very popular among collectors.

What a great looking first year of issue for the San Francisco mint Morgan dollar. This SUPERB coin has a razor sharp strike, imparting a rich frost on the devices and the surfaces have a blazing mint brilliance. The obverse is essentially blast white silver with a strong radiance. A band of rainbow toning that covers about 10% of the upper portion of the reverse gives this beauty an excellent look.

Unlike the San Francisco Mint issues of 1879-1882, very few examples of the original mintage of 9,774,000, survive in such a lofty state of preservation.

PCGS 36, NGC 32. The most recent example brought \$7,800 in the 2020 FUN auction, and the RanJack coin sold in our July 2018 auction for \$7,931. The current PCGS Price Guide value is \$10,000, and there are just four coins graded higher, only one of which, an MS68, has sold, realizing nearly \$36,000 in the 2009 FUN auction! Truly a MAGNIFICENT coin, this 88-O offers an impressive, swirling cartwheel luster that rolls brilliantly across both sides. Sharply struck up, the details are wonderfully rendered for a New Orleans mint Morgan,

with just a touch of weakness just above Liberty's ear. A blush of rainbow iridescent toning crosses the obverse from about 9:00 to 2:00. Pale blue and peach russet mingle with gold giving this coin a great, bag fresh look. Pale toning is dusted across the reverse, again attesting to the wonderful originality and adding much to the absolute SUPERB eye appeal. A PQ SUPERB GEM that is tied for second FINEST graded! Incredible quality for the date, which is rarely seen in MS67 or finer grades. Despite a large mintage, compared to other dates, the population is quite low. Fewer than three dozen have graded MS67 or finer, just two are graded higher than this one, both MS68.

Brilliant, satiny mint luster radiates boldly over the ultra smooth, clean surfaces. Totally original, there is a pearlescent luster in the centers, framed by gold, blue, and rich orange color at the obverse periphery. Nicely struck with just a touch of typical softness to Liberty's curls above her ear. Clearly this coin has been cared for since it left the mint. Boasting a classic, old time collection look, the eye appeal is excellent!

\$1 1928 PCGS MS65+ CAC

The 1928 is the lowest mintage in the series, and the key date in all grades. Though available in all grades to MS65, it becomes quite difficult to find in MS65+ or finer. Sharply struck and stark brilliant silver white surfaces have an impressive satiny bloom that delights the viewer. A tiny tick on the reverse is the only flaw we can find, and only using a strong glass. Wonderfully eye appealing, this coin would fit into any wonderful Peace dollar set.

PCGS 417, NGC 104, CAC 76. There are 35 in MS65+ and fewer than two dozen graded higher. The most recent example to sell in auction (at the time of this writing) brought \$6,463 in our December 2019 Regency Auction. The current Collectors Universe value is listed at \$8,500 and this one with its excellent eye appeal will sell for a strong bid. If you are building a high end set, you do not want this one to pass you by!

\$1 1935-S PCGS MS66+ CAC

A truly brilliant, exceptionally well preserved GEM example of this final year of the Peace dollar series. A full, rolling cartwheel luster flows brilliantly over the magnificently preserved surfaces. The fields are satiny smooth and virtually flawless and the sharply rendered devices are frosty and have a likewise essentially pristine look. The eye appeal is high end and this is tied for second finest graded.

PCGS 221, NGC 63, CAC 54. There are 28 in 66+ and just 3 finer. The current Collectors Universe value is \$12,000 and the average APR for the 6 PCGS/CAC examples that have sold in auction is \$11,186. Also, none of the MS67s have ever been approved by CAC, so if you demand all CAC-approved coins, you will not find one numerically higher. The bidding will be as intense as the luster for this one! Good luck.

\$1 1971-D NGC MS68

This is the ULTIMATE copper-nickel clad Ike dollar that exists! Despite being a modern series, this is the ONLY MS68 example graded by either service of ANY date, 1971-78. These were struck from shallow, low relief dies, which have many wide open expanses of open space in the design, which were open for many contact marks. While 40% silver-clad Ike dollars are plentiful in lofty grades, thanks to being struck and placed in collector packaging, those struck for commercial use were not. Even in MS67 most dates are either unknown or extremely rare, making this the FINEST for type purposes.

Lustrous, clean surfaces beam with a brilliance that enhances gorgeous toning on both sides. Sharply struck devices stand out boldly. The eye appeal is SUPERB! As this series is about to celebrate its half-centennial next year, we suspect interest will grow and this exceptional quality coin will elevate any type or specialized set to another level entirely!

PCGS 0, NGC 1. There are no comparable prices or price guide values; to the collector who demands the absolute FINEST, bid away! YOU WILL NOT FIND ANOTHER! Good luck!

LOT 374**1C 1868 PCGS PR65+ RD CAM**

An impressive GEM Cameo Proof Indian cent that makes us scream- WOW! This coin really pops, both sides are exceptional in every way. Deeply beaming copper mirrors have a deep, beaming flash that captivates the eye from across the room. The contrast is bold, visually stunning, imparted by thickly frosted and sharply defined design elements. A dusting of iridescent toning can be seen at certain angles, and a tiny fleck or two can be detected with a strong glass, but none of this impacts the excellent eye appeal.

Only 600 Proofs were struck. PCGS 1, NGC 0. There are just five coins graded finer. The most recent PCGS graded PR65 CAM had a CAC sticker and sold for \$6,600. In 65+ CAM, the Collectors Universe value is listed at \$7,500. It would be hard to find another that comes close to the eye appeal of this impressive coin, regardless of price.

1884 PROOF SET

Legend and Legend Auctions have always had a deep love for matched original Proof sets. We consider them to be the final frontier of numismatics. To have an original matched set that has been together for over 100 years is incredible.

This is the epitome of a matched set. You do not have to imagine if the colors match; they clearly do. The overall quality is HIGH END while the eye appeal is pretty. We cannot say we see this date at all. We do not remember handling one in years.

The mintage of this set is 8/5. We'd guess maybe 10-25 sets if even still exist intact.

1C 1884 PCGS PR65BN CAC. A GEM original coin. While its mostly brown you can see other colors when you twirl the coin. CAC pop 17. CAC value: \$455

3CN 1884 PCGS PR66 CAC. Technically this coin should be a PR66+. All we can find is one old small tick. The rest of the coin is perfect. This has a golden brown hue. CAC pop 45. CAC value: \$598

5C 1884 PCGS PR65 CAC. Lightly toned in a golden brown hue. The mirrors are clean and still have some flash. No problems here. CAC pop 31. CAC value: \$500

10C 1884 PCGS PR65 CAC. Only one old lint mark visible. The services are pretty much perfect. Like the others this coin is evenly toned. CAC pop 12. CAC value: \$975

25C 1884 PCGS PR66 CAC. Very clean and flashy mirrors. The toning is equal to the other coins. This is a really nice GEM! CAC pop 10. CAC value \$1,880

50C 1884 PCGS PR64+ CAC. We think just a few light lines robbed this coin from being a PR65. It sure has the look. The color-matched to the others. CAC pop 8. Collectors Universe Value: \$2,150 (CAC does not have values for + grades so we'll use regular PR64).

\$1 1884 PCGS PR64 CAMEO CAC. We will not allow a coin like this to be plucked from a set like this. It is really high end and have some really cool eye appeal. This coin also offers the most powerful mirrors (they do have that killer watery roll) of any coin in the set. NO question this coin is part of the set. CAC pop 9. CAC value: \$4,500

The total CAC value is \$11,058; but this is with no published value for the 50C 64+ (we used a regular PR64). You can go offer \$25,000 and you most like will NOT find another matched original set as nice as this. Immaculate surfaces are super impressive. The ONLY fault we could find (and it took a strong glass and lots of looking) is a small possible thin line or even cut (?) on the head.  Ex S.S. Central Amer.ca.

From the second recovery of gold coins from this famed shipwreck. While in this second round many double eagles were salvaged, small gold coins, many of which were earlier issues appear to have been what the ill-fated passengers and crew were carrying with them. LRCA is pleased to have been consigned a trio of coins from this second recovery encapsulated with a pinch of California gold dust.

This Type 2 gold dollar had quite the adventure in its existence. It went from the mint in Philadelphia and made its way around, either to California, Panama, or Cuba before being in someone's pocket when the S.S. Central America hit a massive hurricane, faltered and sank to the bottom of the ocean. Light circulation is seen on the surfaces, but there is a wonderful surviving mint luster that glows on both sides. Free from any serious abrasions, we just see some minor lines from its brief time in commercial channels.

A very historic piece and would make a very cool addition to any collection of gold coins, or a specialized collection of shipwreck coinage (this is a very interesting pursuit).

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

\$2,50 1872 PCGS PR65 DCAM

All Proof gold coins struck prior to the mid 1880s are major rarities, even more so in GEM states of preservation. In 1872, only 30 Proof quarter eagles were struck, of which, John Dannreuther estimates that perhaps 12-14 are known in all grades. Among those are the Smithsonian and ANS specimens, likely impounded for all time. This leaves perhaps 10-12 examples for collectors. The combined PCGS and NGC populations are 22 pieces graded, which includes coins that were never taken off the populations, as coins gained the CAM and DCAM designations.

The present GEM is among the FINEST graded at PCGS in any designation, and is tied at the Top of the Pop in the DCAM designation. Deep, beaming golden mirrors are the epitome of flashy vibrance. Aside from a tiny mint made planchet flake and a tiny lint mark or two, the surfaces are exquisite and devoid of any post mint issues. The razor sharp devices have a thick frost that creates a SUPERB cameo contrast, deep and beaming. The eye appeal is simply amazing, we are not sure why CAC did not bean this beaming GEM.

While we cannot find a pedigree to this example, famous collectors who have owned examples include: Harry Bass, Louis Eliasberg, John J. Pittman, Amon Carter, Garrett, and Ed Trumpeter. Your name can now be added to that roster of collectors who have owned one.

Only 30 were struck. PCGS 3, NGC 1. The only PCGS PR65 DCAM to sell in auction brought \$38,400 in the 2020 FUN Auction. This is a different example. The current Collectors Universe value is listed at \$55,000. With none graded higher, this piece is bound for one of the greatest collections of proof gold ever. Good luck!

LOT 395**\$2.50 1908 PCGS PR67**

One of the VERY FINEST graded by PCGS and this coin is a SPECTACULAR quality GEM! A deep, orange-gold hue is evenly distributed over the sheer perfection of surfaces of this immaculate PR67. Sharply impressed incuse design elements. The color is incredible and the surfaces do not reveal any imperfections seen on either side, even with the aid of a strong glass.

The matte surface is completely different from anything done at the Philadelphia Mint before. Up until this time proof coins had always been "shiny", with the fields offering mirror reflectivity and the devices offset by frosted texture. Here on this 1908 Quarter Eagle the fields and devices were completely uniform in color and texture. A strong loupe reveals minute interlocking facets that create the "sandblast" texture and appearance. When examined under a light, these facets flash and twinkle like a galaxy of stars! Of course this radical change, introduced at other world Mints soon after 1900, was met with stiff resistance in America, as collectors had grown used to the bright and flashy proofs of the past. Hence sales declined year after year starting in 1909 through the end of Proof production. Today with the benefit of time and artistic appreciation, modern collectors highly covet these exceptional matte proof coins, especially when they are found so perfectly preserved!

Representing the first major Quarter Eagle design change since 1840, only 236 Proofs were struck in 1908. The surfaces on this SUPERB GEM are virtually perfect, with the classic mustard hue and finely granular matte surface undisturbed! A high fin or wire edge is seen around most of the coin, both obverse and reverse. An absolutely extraordinary example of this rare Proof coin.

PCGS 8, NGC 30. The most recent example to sell in auction realized \$40,800 in the 2020 FUN auction, prior to that, we sold one for \$58,750 in the November 2018 Regency Auction. The current PCGS value is listed at \$60,000 and NONE are graded finer at PCGS. This rarity is bound for a great set! Good luck!

\$2.50 1910 PCGS PR66 CAC

A simply impressive GEM example of this very popular Proof Indian \$2.50. The quality is off the charts, and the eye appeal is simply stunning. .

Ranking near the top of the PCGS Population Report, this coin has the initial visual appeal of a SUPERB GEM! The delicate satin finish is totally intact, uninterrupted by any surface disturbance or flaw that we can see with our powerful loupes. Every detail is fully embossed in the surfaces, and crisply defined throughout the incuse design. The rich, totally original yellow-gold color is as fresh and pleasing as the day it came off the dies. We note just a single tiny mark hidden on the reverse for the sake of full accuracy, but it does not impact the bold visual allure.

The mintage of 1910 Proof quarter eagles was reported at 682, a whopping sum for any Proof gold coin. It is said that many of these may have been spent by their owners as no 1910 circulation strike quarter eagles were produced until the end of the year. Obviously the number of coins that went into circulation, or melted as unsold were never taken out, or there could have been a mistake in reporting. The current combined PCGS and NGC populations come to about 200 pieces, and the recent Proof Gold reference by John Dannreuther suggests that 90-110 survive.

PCGS 11, NGC 29, CAC 13. The most recent example to sell in auction realized \$40,800 in November 2019. The current CAC CPG value is listed at \$51,400 and the PCGS Price Guide value is listed at \$48,000. RARE any finer, just four have been graded higher by PCGS. Worthy of a strong bid and a coin that will be at home in any great cabinet of 20th century gold.

LOT 397**\$3 1861 NGC AU53 CAC**

Only 5,959 \$3 gold pieces were struck as the Civil War began in 1861, and this is a delightful AU53, lightly circulated with boldly defined devices and ample surviving luster in the fields. A few stray lines are seen, but the eye appeal is wonderfully original and high end for the AU53 grade. Most have been conserved, as evidenced by the tiny CAC approval rate.

PCGS 33, NGC 32, CAC 4. No CAC approved example has ever sold in auction, and the most recent NGC-graded coin brought \$4,406 in March 2014. Both the CAC CPG and Collectors Universe values are listed at \$4,500 and this coin will bring close to that--the eye appeal is great!

\$5 1834 CLASSIC. PLAIN 4. PCGS MS64+ CAC

About as fine as you can ever realistically ever hope to obtain for your collection, this borderline GEM Classic Head half eagle ranks high up on the PCGS Population Report and there is just a single CAC-approved coin finer.

This coin has a stunning, totally original look. Brilliantly lustrous with a thick, satiny frost that glows majestically on both the obverse and reverse is distinctly Prooflike with a bold flash. Both sides are a killer original brilliant yellow gold color with some deeper gold hues that come to life when viewed in a light. There are NO spots or discolorations, and even using a strong glass all you can find are a few tiny microscopic ticks.

The Classic Head series is an oft overlooked transitional series that connects the early, old tenor gold coins of 1795-1834 and Christian Gobrecht's Liberty Head or Coronet design. Starting in the 1820s, the bullion value of the gold content exceeded the \$5 face value. While there were a relatively large number of early fives struck, most of these never circulated, rather exported for its metallic content, melted down, and returned as specie, making a tidy profit for the owner. In 1834, the weight was reduced, and William Kneass's Classic Head design was introduced. These charming coins were issued at a time when the first branch mints opened and saw extensive circulation. High grade examples are rarely seen.

PCGS 43, NGC 42, CAC 12. There are seven graded MS64+ and just seven finer. The most recent example to sell was the Coronet Collection coin we sold in October 2019 for \$37,600 (this is NOT that coin). The current PCGS Price Guide value is listed at \$32,500 and remember how RARE these are any finer, a CAC approved GEM would approach high five figures in today's market. Perfect for type this coin will see intense bidding. Good luck!

\$5 1836 PCGS MS63+ CAC

Visually stunning, this lovely coin has a rich golden luster that has a radiant flash on both sides. Sharply struck up devices are fully frosted and show crisp, complete definition on both sides. Aside from a few microscopic ticks and a line or two that are widely scattered across the surfaces, the eye appeals off the charts for the assigned grade. Wonderfully original, this early type is difficult to find so nice!

\$5 1837 PCGS MS64+ CAC

OMG! This coin is so the real deal. We'd rank it MS64.8+++ every time! In ful. MS65, these are so exceedingly rare.

Outstanding surfaces are smooth and clean.† Only on the reverse is there a small scuff/frost break that you can see with a glass (which is all that we can find that keeps it from MS65). This coin oozes with as much originality as we have ever seen. It looks like it was carefully stored for a very long time. A moderate glowing luster beams from all over. Both sides enjoy a rich and totally original deep gold with pale greenish gold highlights. There are NO discolorations or spots. The eye appeal is terrific!

PCGS 9, NGC 5, CAC 4. This is one of just two graded MS64+ by PCGS. PCGS has possibly graded only 4 coins higher. There is NO record of this MS64+ selling in a major auction. The current PCGS Price Guide value is \$57,500 and it is critical to note: an MS65 (NON CAC) sold for \$100,625 way back in 2010. ALL posted numbers for this coin are incorrect.

The rarity of this date and higher in this grade is extreme. If a PCGS CAC MS65 were ever to show up, it would sell for \$125,000+ today. If you are trying to build a GEM set, this coin is a perfect fit!

\$5 1893-CC PCGS MS64+ CAC

We are pleased to have been consigned a exciting piece that is tied for FINEST graded (and deservedly so). We fully agree this coin is a borderline MS65!

Tangy surfaces are clean overall. Only when using a strong glass can you find some tiny scattered ticks. Nothing .s serious. Hints of faint semi-prooflike mirrors can be seen when the coin is tilted. A full booming luster beams from al. over. Both sides are a brilliant deeper yellow gold color. There are NO spots or discolorations. Miss Liberty and the details are fully struck. The eye appeal is fantastic!

PCGS 7, NGC 9, CAC 3. The current Collectors Universe Value is \$30,000 while the PCGS CAC Value is \$31,500. This is the only appearance in auction since 2015. Opportunity knocks loud here! Good luck!

\$5 1897 PCGS MS65 CAC

Though generally common in grades up to MS64, CAC-approved MS65s are truly quite RARE! This example is totally original, offering a "dusty/crusty" tannish gold color that matches coins from old time holdings, like European banks and old collections housed in paper envelopes. Sharply struck and satiny, this very pleasing looking coin will delight anyone who loves totally original gold coins for their set.

PCGS 35, NGC 79, CAC 11. We sold the most recent example in our December 2019 Regency Auction, realizing \$2,056. The current PCGS Price Guide value is \$2,250 and the CAC CPG value is \$2,620. Only a dozen coins are graded finer at PCGS, only 4 of which have attained CAC approval. Worthy of a great gold type set or date set.

Very high end for the assigned grade, this lovely Choice AU 91-CC eagle has a look that is suggestive of a higher grade. We would not have flinched if it was graded AU58 (no guarantees). Nearly full mint luster gleams all over on the barely worn surfaces. We note just the lightest touch of friction. Every detail is razor sharp in strike and the eye appeal is great!

PCGS 339, NGC 231, CAC 6. Just two PCGS/CAC examples have sold in auction, the most recent bringing \$1,560 in the 2018 ANA auction. The CAC CPG value and the Collectors Universe value are very similar \$1,940 and \$1,950 respectively. Housed in an OGH, this coin will delight any gold type or \$10 eagle collector.

This is a lovely 91 CC in an old green tag holder. Boldly lustrous surfaces abound with sharply struck devices and just a trace of circulation on both sides, manifesting itself as just some minor traces of contact. Totally original this coin has a great look.

PCGS 444, NGC 559, CAC 30. The average APR for CAC-approved PCGS AU58s is \$2,235, based on nine that have sold in auction between 2013 and 2019. We sold the two most recent examples, one for \$2,350 and the other for \$2,530, well above both the PCGS and CAC CPG values listed at \$2,000 and \$2,120 respectively. A great coin for a wonderful collection.

\$10 1901-S PCGS MS65+ CAC

This is a totally original and lustrous GEM example of this date. Sharply struck with a bold radiating cartwheel luster that accents a rich, orange-gold tone overall with areas of deeper reddish-copper. The surfaces are exceptionally clean, with just a few stray contact marks noted on either side, none of which detract from the excellent eye appeal.

PCGS 1343, NGC 1340, CAC 158. There are 91 graded in MS65+. VERY scarce any finer, the most recent PCGS/CAC example sold for \$3,290 in our December 2019 Regency Auction and the CAC CPG value in MS65 (no +) is \$3,720. What a great coin for any type set or date run of this long lived series, it is high end and very visually appealing.

PCGS# 8749 | ESTIMATE: \$2,800+

LOT 406**\$10 1930-S PCGS MS64+ CAC**

One of the RAREST dates of the series. A combination of lower mintage (96,000) and mass meltings later in the decade, make this a very tough date for collectors in any grade. Interestingly, there is a cluster of examples graded MS64, which makes us believe that there have been a number of resubmissions of the same coin in hopes of getting a "+" or a 65 grade.

The present borderline GEM is PQ, a REAL MS64+, truly deserving of its + status and CAC approval. Rich, frosty satin luster glows and gleams all over with a velvety texture on both sides. The golden color is thick and original with deeper honey hues in the reverse fields. Intense examination with a powerful loupe reveals a tiny tick or two, but none are individually distracting to the eye. Indeed, this coin is extremely eye appealing and has a really bold look.

PCGS 45, NGC 25, CAC 7. There are 9 listed as MS64+ on the PCGS Population Report, none of which have ever sold in auction. A regular (non +) PCGS MS64 CAC sold in the 2019 FUN auction for \$72,000. The MS64 CAC CPG value is \$87,100 in MS64 (no +), and the current PCGS Price Guide value is listed at \$85,000 and in MS65 the value jumps to \$100,000. A great coin for anyone working on a set of Indian Head eagles.

\$20 1854 LARGE DATE. PCGS AU58 CAC

Of the two date variants struck in 1854, the Large Date is the rarer, and regardless, this early date Type I double eagle is conditionally challenging in this fine a grade and VERY RARE in Mint State.

This is an impressive, "GEM" AU example that is totally original. A "crusty" original, deep, orange-gold patina. The hues are pleasing and brought out by a soft, satiny luster that can be seen in a light. The surfaces show just a touch of friction and some minor contact marks on both sides. The eye appeal is very pleasing.

PCGS 15, NGC 22, CAC 10. The current PCGS Price Guide lists a value of \$23,500 and the CAC CPG value is \$23,000. The most recent PCGS-graded CAC approved AU58 realized \$19,200 and that was six years after the other most recent example sold. Clearly these do not appear with frequency. There are half a dozen examples have ever graded finer, only one MS61 has ever sold in auction. Since most examples are NOT original and have been dipped, stripped, and conserved this is a real numismatic endangered species and should bring a strong price.

SSCA**

Ex S.S. Central America

What an unbelievably superb 57-S! We absolutely rank this coin an MS66.9+! Considering this was covered with muck, the conservators did an incredible job. If it was not in a Ship Wreck holder we assure you, it would be impossible to know it was under the sea for 155+ years.

The surfaces shame all other coins; they are borderline perfect. Only when you use a strong glass can you find a minor frost break or tiny tick. You'd still expect that on a huge coin like this. A full booming intense luster can guide in the Space Shuttle! Both sides are a GEM Yellow gold color. There are NO spots or discolorations. Miss Liberty and the details are sharply struck and offer generous frost. The eye appeal is spectacular!

The Shipwreck pop for this coins is 9 with only four higher. The regular NON Shipwreck pop in MS66+ 0! CAC has beamed a total of 53 pieces in MS66. (They do not separate out + graded coins or Ship Wreck coins.) If you are building a GEM Type set, you know until this wreck surfaced, there was no such thing as a choice or GEM \$20 1857-S. In MS66+ and MS67, its pretty much still that way. We can not stress enough the MONSTER quality of this SUPERB GEM. It is also \$110,000 less than the MS67, even though it is that close to being one! In the 2014 dive (the final dive) 3154 coins were salvaged. All the coins are now graded and accounted for. This is a magnificent \$20 as well as being a genuine historical piece of treasure!

This stunning piece is not only SUPER HIGH END, but looks like the sun in a PCGS holder!

Sensational original "skin" can be seen all over. The surfaces look clean, but do have some visible light frost breaks and a tick or two. This coin is much closer to a 63 than an MS62. Even when using a strong glass, nothing stands out. The luster is really strong and glows hard from all over.

Mother Nature could not help herself here, she gave this coin a magnificent layer of orange gold by the peripheries and regular gold in the centers. There are NO spots or discolorations. Miss Liberty and the details really stand out with full strikes and lots of frost. The eye appeal is tremendous!

PCGS 18, NGC 11, CAAC 4. There are 4 in PCGS MS62+ and fewer than a dozen examples have graded finer at that service after 34 years of operations. No MS62+ has ever sold in auction, but the only PCGS/CAC MS62 to ever sell in auction sold in April 2018 for \$20,400. Clearly the Price Guides are not accurate for this coin! No MS63 has sold in 15 years! Needless to say, this date is VERY RARE in such a lofty state of preservation or finer. Expect strong bidding here!

Glowing, radial mint luster glows with a strong satiny brilliance. The reverse has a full rolling cartwheel. Sharply struck up, the devices are bold and crisp which is accentuated by the wonderful color on the surfaces. The eye appeal is excellent.

PCGS 16, NGC 2, CAC 2. There have been no CAC approved examples sold in auction; that's right, NO MS60, MS61, or MS62 CAC has ever sold in auction. The current CAC CPG and PCGS Price Guide values are both listed at \$17,500. A lovely Type II Double eagle and worthy of a strong b.d.

\$20 1926-S PCGS MS65+

A lustrous GEM example of this key date Saint.

Sharply struck and nicely preserved surfaces, both sides are generally clean and free of any serious marks.

Well struck, there is no weakness in any of the design elements. The color is pleasing and this coin has a good eye appeal.

The double eagle issue of 1926-S suffered from the usual indignities of its brethren from the Denver and San Francisco Mints of this period. Most of the production struck ended up housed in United States Treasury vaults awaiting eventual orders. The commercial orders for these coins never materialized and after 1933 the coins were gathered up and shipped off to Fort Knox to be melted into gold bricks. So, despite a mintage of 2,041,500 pieces this is today a rather scarce issue, with the total numbers certified just under 1,500 pieces in all grades between the two major grading services. Virtually all of the known surviving examples of this date and mint are Mint State, or very close to it.

PCGS 2, NGC 0. There are just four examples graded finer at PCGS. Neither MS65+ has ever sold in auction and the last MS66 sold a decade ago for \$69,000.

Recent MS65 examples have sold in the \$15,600 to \$22,800. In 65+, the Collectors Universe value is listed at \$43,000. This is a very rare coin that is worthy of a strong bid from anyone still missing this late date Saint in their set.

LOT 423

50C 1936-D SAN DIEGO. PCGS MS67 CAC

Richly toned and offering a bold visual allure. Totally original envelope toning on both sides, the hues accenting the bold luster and sharply struck devices. The eye appeal is excellent.

PCGS 113, NGC 57, CAC 67. We sold the most recent example in our September 2019 Regency Auction for \$1,058. The current PCGS Price Guide value is listed at \$950 and the CAC CPG value is \$975. RARE any finer, this is a really nice piece for any carefully chosen set.

PCGS# 9372 | ESTIMATE: \$900+

LOT 424

50C 1935 SPANISH TRAIL. PCGS MS67+ CAC

This is such a cool type. This cataloger remembers looking at the Red Book and this type, with its cow skull obverse design as a young collector and how different it was. Only 10,008 were struck, and this SUPERB MS67+ is bested by just eight coins at PCGS. Vibrant mint luster blooms all over with exceptional quality, satiny smooth surfaces. Sharply struck, the design elements stand out nicely and the eye appeal is very high end.

PCGS 211, NGC 120, CAC 67. There are 32 in MS67+ and just 8 in MS68 finer. The most recent example sold in auction for \$6,600 in the 2019 ANA auction and the current PCGS value is \$3,500. This one is very high end and worthy of a premium bid. Bound for a great Commem set!

PCGS# 9376 | ESTIMATE: \$3,800+

LOT 425

50C 1925 STONE MOUNTAIN. PCGS MS67 CAC

If ORIGINALITY is your wheelhouse, take a second look at this cherry piece! Intense, creamy luster is graced by amber halo toning that fades to gold as it glides over the surfaces. Bold design elements. Two teensy marks in the fields are only noticeable under magnification.

PCGS 317; NGC 183, CAC 111. A beautifully toned example sold in our Regency Sale 35 in December 2019 for \$1,528 and another piece sold in October 2019 for \$960. Fresh, original pieces like this are getting harder to come by. Worthy of a strong bid.

PCGS# 9378 | ESTIMATE: \$550+

LOT 426

50C 1925 VANCOUVER. PCGS MS67 CAC

This is a beautifully toned and high end SUPERB GEM example of this early, classic commem. Boldly lustrous surfaces have a warm satin glow throughout. Both sides have a beautiful peripheral tone, shades of blue and gold come together, especially on the obverse, giving this truly SUPERB Vancouver half dollar a marvelous look!

PCGS 78, NGC 50, CAC 38. The most recent example to sell in auction brought \$1,880 in our June 2019 Regency Auction 33. As nice as that one was, this one is much nicer! Indeed it is closer in look to the one that sold in June 2019 for \$2,880. The current PCGS Price Guide value is listed at \$2,500 and the CAC CPG value is listed at \$3,000. Just 20 examples are graded finer, and the value jumps to \$5,000 in 67+. We anticipate very strong bidding on this exceptional GEM!

PCGS# 9399 | ESTIMATE: \$1,800+

LOT 427

50C 1950-S BOOKER T WASHINGTON. PCGS MS66 PL CAC

This is the ONLY PCGS PL example graded in any grade. Blazing, brilliant silver surfaces have a bold reflection in the fields. Untoned and sharply struck, this coin is very high end and destined for an advanced collection.

PCGS 1, NGC 16, CAC 3. There are no prices for any PL pieces sold in auction. This is a coin that will delight any collector who wants their commems to have something extra special. Good luck!

PCGS# 89422 | ESTIMATE: \$350+

LOT 428**\$1 1838 J-84.****RESTRIKE. PCGS****PR64 CAC**

Of the three Gobrecht dollar dates, 1836, 1838, and 1839, the 1838 is the scarcest. A very small number of Originals were struck, the dies then stored away until the late 1850s where they were then restruck for collectors.

Struck in Die Alignment III, like the majority of the known examples. For the design, the obverse has Gobrecht's name removed from the rocky base although faint traces remain when closely examined. The obverse now has thirteen stars surrounding Liberty, representing the original colonies, and the starry field with 26 stars of the reverse has been removed, and the eagle flies in the open field surrounded by legends and the denomination below, with the eagle flying level. The restrike J-84s are listed as Rarity-5 with an estimated mintage of 31-75 pieces.

Struck in Die Alignment III, like the majority of the known examples. For the design, the obverse has Gobrecht's name removed from the rocky base although faint traces remain when closely examined. The obverse now has thirteen stars surrounding Liberty, representing the original colonies, and the starry field with 26 stars of the reverse has been removed, and the eagle flies in the open field surrounded by legends and the denomination below, with the eagle flying level. The restrike J-84s are listed as Rarity-5 with an estimated mintage of 31-75 pieces.

This is a very impressive borderline GEM. Every detail is razor sharp in definition, standing out against watery reflective mirrored fields. Both sides are awash in a gorgeous blend of blues, golds, and peach hues, with teal and lilac accents. A single microscopic line can be seen in the field with effort by Stars 4 and 5, the only thing that keeps this from an even loftier grade.

Part of the fun of owning these coins is the potential to help discover new pieces in the puzzle. Over the years, many different theories surrounding the many variations of Gobrecht dollars have been offered. Extensive research has been done on this particular issue to determine where it was produced in relation to the other Gobrecht Pattern Dollars. Two major beliefs have developed. One camp of experts (Walter Breen and Robert Julian) believe that the die alignment I pieces were the originals, followed by die alignment IV and III being the Restrikes of the J-84 pattern. Another camp (John Dannreuther, Craig Sholley, Saul Teichman, Jim Gray and Mike Carboneau) believe the originals were first struck in die alignment IV. Research continues, and with each passing year, further examination of these rare coins shed a little more light with each opportunity to compare different pieces. One famous example of this pattern in the Simpson Collection shows clearly the undertype of an 1859 silver dollar being used to strike the 1838 J-84 Pattern!

PCGS 9, NGC 11, CAC 2. The most recent PCGS PR64 CAC example to sell in auction realized \$88,125 in the 2017 FUN auction (a coin that is now on the market listed at \$110,000). The current Collectors Universe value is listed at \$72,500 which seems very cheap for a CAC approved coin. We believe that this marvelous coin offers a lot for any advanced collector, and this coin will spark lots of bidding activity. Keep in mind that this high end coin ranks among the FINEST examples, behind a handful of coins graded PR65, including:

The Amon Carter; TradeDollarNut; Simpson Collection example;

The Blue Moon Collection coin, sold Stack's Bowers March 2017;

The Ed Rector Collection coin, last sold at the 2018 ANA Auction;

The Bruce Morelan Collection coin, which sold for \$146,875 in our October 2019 Regency Event;

The example that sold in August 2009 Bowers & Merena, lot 1699 for \$126,500.

The Norweb-Gardner Coin was graded NGC PR65, and realized a record for the variety when it sold in April 2008 for \$149,500.

\$1 1879 J-1626. PCGS PR63

The image displays two views of a 1909-S Buffalo Nickel. The left view is the obverse, showing the profile of a bison facing left, with the words "LIBERTY" and "IN GOD WE TRUST" inscribed. The right view is the reverse, showing a bison standing in a field, with the words "ONE CENT" and "S" (mint mark) visible. The coin is dark and shows signs of wear.

PCGS# 62004 | ESTIMATE: \$2,000+

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. On the left side, there is a vertical margin line, creating a narrow left margin. The paper appears to be from a notebook or a standard ruled document.

1 2C 1864 LARGE MOTTO. PCGS MS65 RD CAC

Estimate 800.00 - 1,000.00 USD

FROM THE SEATTLE COLLECTION AMAZING, deep red fields are free of specks, flecks and discoloration. GORGEOUS and premium quality for the assigned grade. Razor sharp motifs! Intense, dazzling luster. PCGS 280, NGC 116, CAC 58. This coin has to be in the top 10% of specimens with a CAC sticker. It is that nice! No CAC examples have sold of late, but there have been two sales of MS65+ CAC graded coins and the price continues to rise. An example sold in March 2019 for \$1,275 and another piece sold in August 2019 for \$1,650. We see no reason this piece isn't a candidate for a + designation as well as the CAC sticker! Bid generously! Cert. Number 3692311 PCGS # 3578.00

2 2C 1864 SMALL MOTTO. PCGS MS65 RB

Estimate: 2,750.00 - 3,000.00 USD

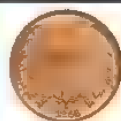

FROM THE SEATTLE COLLECTION A highly DESIRED issue among collectors. Likely 10 TIMES RARER than its Large Motto counterpart, especially if you compare the number of pieces graded by PCGS and NGC for the Large Motto, versus the Small Motto varieties of the date and grade. Generous amounts of MINT RED accent subdued, frosty fields. Keenly struck with all of the design elements struck to full advantage. Under a strong loupe, a few light toning specks are noted for accuracy. The first denomination on and year to bear the motto IN GOD WE TRUST on the obverse. PCGS 57, NGC 53. The last non-CAC example sold in April 2017 for \$3,290, but CAC specimens have sold in the high 2,000 to low \$3,000 range. Cert. Number 13698513 PCGS # 3580.00

3 2C 1865 PLAIN 5. PCGS MS65 RD

Estimate 1,000.00 - 1,200.00 USD

FROM THE SEATTLE COLLECTION Sharply struck and boldly lustrous with flaming mint red color, this early GEM 2 cent piece has a great eye appeal. The devices are razor sharp on both sides, the obverse has a touch of reflection in the luster, especially in the central shield devices. Some light, indistinct toning and some very minor flecks are seen when viewed closely with a light and a glass. PCGS 208, NGC 91. PCGS has graded just three MS65 RD examples with the Plain 5 designation. The last Plain 5 in PCGS MS65 RD sold in June 2015 for \$1,293. The current PCGS Price Guide value is listed at \$1,750. The eye appeal is excellent and we think this one will go very nicely in any set of RD 2 cent pieces. Cert. Number 38682870 PCGS # 38249.00

4 2C 1866 PCGS MS65 RD CAC

Estimate: 1,800.00 - 2,000.00 USD

FROM THE SEATTLE COLLECTION A coin of great MERIT. Not only is it blazing red with deeply frosted fields and needle sharp motifs, it is also devoid of contact marks. Only under very strong magnification can a couple of tiny fly specks be seen. In our opinion, the minor denominations, 2c, 3cs, 3cn and half dimes are getting so cheap, that they represent fantastic buying opportunities for the discerning collector. This coin is simply a case in point. PCGS 49; NGC 17; CAC 6. A CAC example sold in January 2020 for \$2,280. A shrewd buyer would bid liberally for this beauty! Cert. Number 16125035 PCGS # 3590.00

5 2C 1867 PCGS MS65 RD

Estimate 2,500.00 - 2,700.00 USD

FROM THE SEATTLE COLLECTION WOW, what a beauty! The design details look etched from granite. DEEP MINT RED graces highly lustrous, mark free surfaces! A couple of faint fly specks are noted with close scrutiny. Housed in an old green label PCGS holder. PCGS 26, NGC 9. In September 2018 a piece traded for \$2,950 and another fetched \$2,640 in July 2019. Plan to bid enthusiastically if you hope to be the new owner! Cert. Number 6028930 PCGS # 3593.00

6 2C 1868 PCGS MS65 RD

Estimate 2,000.00 - 2,500.00 USD

FROM THE SEATTLE COLLECTION A wonderfully lustrous GEM example which ranks among the HIGHEST graded at PCGS, only seven coins have graded higher. Sharply struck up, this rose-red colored coin has a delicate blush of deeper red on the reverse. A couple of planchet flakes are noted as are some minor flecks visible with a glass. The eye appeal is pleasing. PCGS 19, NGC 9. There are just seven finer, all 66 RD. The current PCGS Price Guide value is listed at \$3,500 and the auction records are all over the place, averaging \$4,235 for the last 10 examples, which go back to 2006! The last MS66 RD sold for \$23,500 four years ago! What an important and underrated rarity! Cert. Number 38682871 PCGS # 3599.00

7 2C 1869 PCGS MS65 RD

Estimate 2,000.00 - 2,200.00 USD

FROM THE SEATTLE COLLECTION A vibrant GEM with very nice eye appeal. Rich mint red luster glows with bold golden highlights. Mostly well struck with some light flecks here and there, none are distracting. PCGS 32, NGC 19. The most recent APRs range from \$1,680 to \$3,000 and the current PCGS Price Guide value is \$2,850. Just 8 coins are graded finer. This will be a lovely addition to any set of this obsolete denomination. Cert. Number 38682872 PCGS # 3605.00

8 2C 1870 PCGS MS64+ RD

Estimate 2,000.00 - 2,500.00 USD

FROM THE SEATTLE COLLECTION A brilliant RED example, which borders on the GEM grade. Pale orange and rose highlights the reverse, while the reverse is a richer orange-golden red. A few ancient ticks and flecks are noted on both sides, which account for the assigned grade, but the eye appeal is still very pleasing. PCGS 2, NGC 0. Neither coin has sold in auction. A PCGS MS64 has sold for \$1,440 in June 2018 and in March 2019 a PCGS MS65 RD sold for \$3,600. In MS64+ the PCGS Price Guide value is listed at \$3,500. Fresh to the market from this extensive collection we know it will see stiff competition when it crosses the block. Cert. Number 38682873 PCGS # 3608.00

	9 2C 1870 PCGS MS65 RD CAC	Estimate 4,000.00 - 4,500.00 USD
<p>FROM THE SEATTLE COLLECTION While the mintage was of decent size at just under a million pieces, the 1870 is incredibly RARE in GEM Red grades. This MS65 RD is among the FINEST graded, just a single MS66 RD is graded higher. This is a gorgeous, original RED example, housed in an old green tag holder. The wonderful mint red color, amplified by a bold, radiant brilliance, glimmers all over with some delicate peach and apricot hues toward the obverse peripheries. Totally original surfaces show just a few tiny, stray marks which is all we see keeping it back from an even higher grade. PCGS 18, NGC 9, CAC 3. In the last decade there have been four appearances of a PCGS/CAC MS65 RD, ranging from \$4,080 to \$11,163. The presently offered coin was NOT CAC approved in its last appearance, when it realized \$4,700 six years ago. The current PCGS Price Guide value is listed at \$5,250 and the CAC CPG value is listed at \$5,620. The single MS66 RD has never appeared in auction, and is not CAC approved. If you demand only the FINEST in CAC approved examples this is as fine as you can get. Good luck. Cert. Number 5363238 PCGS # 3608.00</p>		
	10 2C 1871 PCGS MS65+ RD CAC	Estimate 8,000.00 - 10,000.00 USD
<p>FROM THE SEATTLE COLLECTION WOW! What a wonderful example of this conditionally rare date! Rarely seen with full red coloration, but couple that designation with the GEM grade, CAC approval, and bold eye appeal, this 1871 2C gives you the full package! This is an interesting coin, almost a tale of two sides, if you will. The obverse luster is fully prooflike with full watery mirrored reflection. The reverse, conversely is a rich, satiny sheen. Despite the different textures, both sides offer a bold red color, sharply rendered devices and surfaces with a minimum number of flecks or traces of contact. The eye appeal is exceptional in every way. PCGS 17, NGC 13, CAC 5. There are just two in MS65+ RD and seven finer. The current Collectors Universe value is listed at \$10,000 and keep in mind, that there are NONE with CAC graded finer. If you are putting together a CAC set, you cannot find a finer example anywhere. The last CAC MS65 RD sold for \$8,225 in our March 2019 Regency Auction. Worthy of a very strong bid, and will find itself at home in any world class 2C collection. Cert. Number 38682874 PCGS # 3611.00</p>		
	11 2C 1872 PCGS MS65+ RD CAC	Estimate 30,000.00 - 35,000.00 USD
<p>FROM THE SEATTLE COLLECTION This is an absolutely amazing GEM example of this very challenging issue. The 1872 2 cent piece was the final year struck for circulation, and only 65,000 were produced. Most did not retain the mint red coloration, and any RED is a major condition rarity. The presently offered coin clearly ranks among the finest without even looking at the Population Report; a fact that is confirmed by the PCGS Population figures, only 2 are graded MS65+ RD and four are finer, all MS66 RD. Incredible, brilliant RED mint luster rolls vividly on both sides of this exceptionally high end coin. The obverse boasts a hint of semi-reflectivity that accents the wonderfully smooth, clean, radiant surfaces. Every detail is sharply struck, crisply rendered by a precision blow from the dies. Even with a strong glass we are hard pressed to find a single mark, fleck, or line of any consequence. The eye appeal is simply stunning in every way! PCGS 9, NGC 1, CAC 3. There are two graded MS65+ RD, and this one sold for \$36,719 in January 2013. More recently an NGC MS65 RD CAC (not +) sold for \$40,800 in February 2019. The current CAC CPG value is \$42,400 (in MS65 RD). This coin will see very strong bidding from anyone working on a SUPERB 2 Cent collection. Cert. Number 25501793 PCGS # 3614.00</p>		
	12 2C 1873 CLOSED 3. PCGS PR65 RD	Estimate 4,500.00 - 5,500.00 USD
<p>FROM THE SEATTLE COLLECTION A lovely GEM Proof example, struck the final year of this short lived denomination, and it is high end quality for the eye appeal. This Proof only date saw only 600 coins struck, of which, this PR65 RD ranks high among those graded at PCGS. The mirrors are bold, and highly reflective with a strong RED color. Sharply struck up, both sides have crisp definition. Very eye appealing, we are unsure why CAC did not bear this lovely example. Housed in an OGH. PCGS 20, NGC 8. The present coin sold in June 2013 for \$7,350, more recently one sold in June 2018 for \$6,600. The current PCGS Price Guide value is listed at \$5,500. Very rare any finer, this coin will see strong bidding. Cert. Number 8332868 PCGS # 3653.00</p>		
	13 2C 1873 OPEN 3. PCGS PR65 RD	Estimate 6,000.00 - 6,500.00 USD
<p>FROM THE SEATTLE COLLECTION The final year of this short lived series was struck only in Proof. Two date logotypes were used, one with the Close 3 and the other with the Open 3. In higher grade, the Open 3 variant is scarcer than the Close 3. Highly reflective mirrored fields are brilliant red, a color trait that is decidedly rare in all grades, especially so in GEM. Sharply struck, the devices show crisp definition and surfaces that are near perfection, devoid of any serious flecks or marks. A bold eye appeal will delight any collector. Only 500 were struck. PCGS 7, NGC 6. The most recent sold three years ago for \$6,169 and a month before that, one sold for \$9,988. The current Collectors Universe value is listed at \$8,500. RARE any finer, there are just 6 reported in PR66 RD at PCGS, which sell for \$25,000-\$30,000 in auction, making the present example a great value in comparison! Cert. Number 38682875 PCGS # 3656.00</p>		
	14 3CS 1851 PCGS MS65 CAC	Estimate: 700.00 - 800.00 USD
<p>FROM THE SEATTLE COLLECTION INTENSE, rich mint bloom and luster grace clean surfaces. Toned in pretty golden, ice blue, and tangerine, with splashes of amber in select areas on the reverse. A fresh and ORIGINAL piece. Die striations, not scratches, are noted in the fields. A minute pin scratch is present from the rim to the O of OF and is only seen under strong magnification. PCGS 217, NGC 177, CAC 44. The only recent auction record for a PCGS CAC graded piece was a coin that sold for \$700 in an eBay auction in August 2019. It is significant to note that of the hundreds of coins graded MS65 by both grading services, only 44 have cut the muster to receive the coveted "green bean". Keep that paddle up if you want to take this one home! Cert. Number 3713626 PCGS # 3664.00</p>		
	15 3CS 1851-O PCGS MS66 CAC	Estimate 4,500.00 - 5,000.00 USD
<p>FROM THE SEATTLE COLLECTION One look at this New Orleans jewel and you will fall in love! This is the only year that any mint other than Philadelphia struck a three cent silver. Boasting a healthy mintage of 720,000, these are common enough in lower Mint State grades, but become scarce in MS65 and RARE any finer. Pearly opalescent luster swirls in the fields, accenting Premium Quality GEM surfaces that are dusted gently with rose, lilac, pale gold, and peach iridescent toning. Even from arms' length, the luster blooms vividly giving this totally original, high end 51-O trime a truly gorgeous look. PCGS 32, NGC 13, CAC 20. Just 4 are graded finer, all MS66+. The average APR for the last 10 examples comes to \$5,797 and the PCGS Price Guide value is listed at \$5,500, and the value doubles in MS66+. This one has a stunning visual allure which will propel it to a very strong price realized when the hammer falls. Cert. Number 38676539 PCGS # 3665.00</p>		

	<p>16 <u>3CS 1852 PCGS MS65 CAC</u></p> <p>FROM THE SEATTLE COLLECTION THICK FROST and mint bloom graciously enhance choice surfaces. Strong design details are present. A gorgeous prize for the quality conscious collector! The only mark we see under a powerful loupe is a hair thin line from the top point of the star into the field. PCGS 226, NGC 190; CAC 55. Two sales of CAC stickered pieces are noted. One for \$625 in August 2019 and another for \$492 in January 2020. The eye appeal of this coin blows away the other two. We expect spirited bidding for this beauty. Cert. Number 38676540 PCGS # 3666.00</p>	Estimate 600.00 - 700.00 USD
	<p>17 <u>3CS 1853 PCGS MS65 CAC</u></p> <p>FROM THE SEATTLE COLLECTION WOW! This is the poster child of three cent silver pieces. A stunning beauty! Rich mint bloom and flashy luster accent immaculate surfaces. Nearly full white with just the faintest tinge of champagne gold lending to the originality of the coin. Why this coin is not in an MS66 or finer holder is anyone's guess. The only thing we see is an itty bitty break in luster near the U of UNITED and only with a strong loupe! PCGS 135, NGC 68, CAC 28. A CAC PCGS example sold in December 2019 for \$1,680. If you are looking for the PERFECT example of the date and grade, your search is over, but we are betting you will have to pay strongly to add this one to your collection! Cert. Number 3606138 PCGS # 3667.00</p>	Estimate 750.00 - 900.00 USD
	<p>18 <u>3CS 1854 PCGS MS65+ CAC</u></p> <p>FROM THE SEATTLE COLLECTION A thick, frosty satin luster graces both sides of this "crusty" and original trime. Dove and pewter silver surfaces have a dusting of olive, tan and gold patina that gives this coin a great look. Sharply struck from clashed dies, this coin will fit in any totally original GEM type or 3CS set. PCGS 60, NGC 27, CAC 24. There are just two coins graded MS65+ and fewer than two dozen have ever graded higher. Neither MS65+ has ever sold in auction but the Collectors Universe value is listed at \$3,500. The average PCGS/CAC MS65 brought \$3,015. Worthy of a strong bid and belongs in a great set. Cert. Number 5764036 PCGS # 3670.00</p>	Estimate 2,500.00 - 3,000.00 USD
	<p>19 <u>3CS 1855 PCGS MS65 CAC</u></p> <p>FROM THE SEATTLE COLLECTION Just a few years into production, the mintage of three cent silver pieces dropped to 139,000; this GEM ranks very high on the Population Report, just 18 are graded MS65 with a mere ten finer. This satiny, lustrous GEM has a thick frosty texture in the fields. The surfaces are brilliant and virtually untoned on both sides, with just a hint of golden iridescent tone that appears when rotated in a light. Sharply struck from boldly clashed dies, this beauty has a stunning and cool look! PCGS 18, NGC 9, CAC 9. The most recent PCGS/CAC example realized \$6,000 in the 2020 FJN auction. Prior to that, the Stone Collection coin, NGC MS65 CAC sold for \$9,375 in May 2018. Just 10 coins are graded higher at PCGS, we sold the most recent MS66 CAC for \$14,300 in December 2018. This freshly graded beauty will delight anyone working on a high ranking set; we can see it start a fierce bidding war when it crosses the block. Cert. Number 38676541 PCGS # 3671.00</p>	Estimate 5,000.00 - 6,000.00 USD
	<p>20 <u>3CS 1856 PCGS MS65 CAC</u></p> <p>FROM THE SEATTLE COLLECTION We challenge you to find a mark anywhere on this BLAZING GEM! Remarkably well struck for an issue that is notorious for its weakness in striking detail at the date or in the lines of the shield or both! Happily, this piece is a welcome exception to all of those issues. Incredibly lustrous and eye appealing with mint bloom graced by just a trace of champagne gold toning. WOW! Why this coin is not in an MS66 holder is a mystery to us. MS66 graded pieces trade for over \$10,000! When you consider value, this could be the coin of the sale. PCGS 33, NGC 17; CAC 14. Nothing recent for auction records, just two sales in October 2015 for \$2,233 and another in July 2016 for \$1,998. In our humble opinion, this coin is heads and tails above the one with the auction records. GET READY TO RUMBLE for this coin is worthy of a premium bid. Cert. Happily, this coin is the opposite of all of those issues. Deep mint bloom and flashy cartwheel luster are enhanced by wisps of champagne gold and soft rose toning. The strike is terrific and the eye appeal is sublime! Under a strong loupe, you can just make out a small toning spot near the U of UNITED. PCGS 97, NGC 96, CAC 16. 	FROM THE SEATTLE COLLECTION WOW! Have you completed your set of three cent silvers, and are looking to upgrade or add some truly UNIQUE pieces to your set? Look no further. This is a very impressive fully PROOFLIKE GEM that looks like a Proof on first inspection. The luster is off the charts, with bold, reflective fields and brilliant, swirling satiny sheen throughout. The dies were clashed, then in an attempt to remove the clashing marks, the dies were polished, imparting the mirrored reflection. Essentially untoned, there is just the slightest touch of iridescent toning. The eye appeal is off the charts, and we have been ogling this GEM since it came back from PCGS! What an amazing coin and unique opportunity. PCGS 1, NGC 1, CAC 1. Clearly this coin has not sold in auction. The last PCGS/CAC non-PL MS66 sold for \$7,201 in June 2018 and we sold a 66+ CAC for \$9,350 in our December 2018 Regency Auction. 	FROM THE SEATTLE COLLECTION SUPERB and fully Prooflike, this is the SOLE MS67 PL graded at PCGS and is one of the most visually appealing examples of this low mintage Civil War issue. Only 12,000 circulation strikes were produced. At first glance you would think this vibrantly reflective jewel was a Proof striking, but then, when you see the sharp clashing you realize that it is not. The obverse has a bold, almost CAMEO like appearance with the devices fully frosted. A band of iridescent toning frames the lower periphery of the obverse, while the reverse is drenched in a wonderful cobalt turquoise and rosy orange toning. The eye appeal is amazing overall, and this is a great looking beauty that is surely going to be at home in one of the FINEST of time collections. PCGS 1, NGC 1. Unpriced in the PCGS Price Guide in this grade. There has not been a PCGS MS67 sold in nearly a dozen years. In MS67+ (non-PL) sold for \$7,638 in the 2017 FJN auction. Take it from us, we know this series quite well. Boldly lustrous surfaces beam with a vibrant frosty luster that has traces of prooflike flash when rotated in a light. A dusting of toning at the lower obverse rim shows off hues of blue and orange. Sharply struck from unclashed dies, there are a few minor die lines. We love this GEM. FROM THE SEATTLE COLLECTION A spectacular GEM example that ranks among the top 15 PCGS graded specimens, and in terms of eye appeal, it is easily one of the most beautiful survivors of this issue. Only 4,500 examples were struck, and just five coins have graded finer than the present coin at PCGS. Both sides offer a thick, frosty mint bloom from below a speckled blue and gold patina. The blue shades range from a deep midnight blue, to cobalt, to sky blue and the gold hues range from deep orange-gold to a light indescent hue. The sharply rendered devices stand out against essentially flawless surfaces. The eye appeal is exceptional and unique, a coin worthy of any high end collection. PCGS 10, NGC 9, CAC 6. The only CAC approved example to ever sell in auction was the Stone Collection NGC graded coin that realized \$11,875 in May 2018. No PCGS graded coin has sold in over five years! FROM THE SEATTLE COLLECTION What a MONSTER! Sharply struck, the devices stand out against fully lustrous, Prooflike surfaces. Beautifully toned on both sides, this coin clearly sat for ages unmoored, where it was able to acquire blue, orange, rose, gold and teal hues that really pop in the light. The central reverse is brilliant silver with peripheral color in the shades, imparting a stunning visual allure that combines with SUPERB technical qualities. Only 1,000 examples were struck, this coin is RARE in any grade, especially in GEM and finer grades. PCGS 6, NGC 4, CAC 5. FROM THE SEATTLE COLLECTION Ex Childs and Bruce Scher Collections A very pleasing coin that was part of both a great old time collect on and a wonderful former #1 PCGS Registry Set. FROM THE SEATTLE COLLECTION A wonderful SUPERB Cameo Proof GEM that is a Proof Only date with a mintage of only 510. The surfaces are blazing and brilliant with a bold reflection in the fields. The mirrors are icy smooth with a frosty texture to the sharply struck devices. There is a touch of iridescent toning that attests to the quality and originality of this high end beauty. VERY RARE any finer, this is a SUPERB piece. PCGS 16, NGC 18, CAC 18. The most recent example sold in auction brought \$5,400 in March 2019, but we sold one in May 2018 for \$8,225. The current PCGS Price Guide value is listed at \$8,000. With just three finer at PCGS, this coin belongs in another great set! Cert. Number 6560489 PCGS # 83773.00

FROM THE SEATTLE COLLECTION Remarkable BLACK and WHITE cameo contrast. Immaculate, deeply resplendent fields contrast beautifully with needle sharp, thickly frosted design details. A tiny tick on Liberty's chin is noted merely for the sake of accuracy. A dazzling BEAUTY that is sure to please the fussiest collector. Just 2,350 Proofs were coined. PCGS 99, NGC 54, CAC 51. No CAC auction records of late. Non CAC examples have sold for \$840 in June 2019 and \$960 in September of 2019. Expect to fight for this cherry GEM! Cert. Number 21369860 PCGS # 83774.00

A pleasing example of this low mintage (just 38,000 coined) date. PCGS 48, NGC 20, CAC 13. Two auction records were \$1,140 in August 2019 and another for \$1,020 in September 2019. FROM THE SEATTLE COLLECTION This is an amazing quality SUPERB GEM example of this later date, of which only 21,000 were struck, and this one ranks near the top of the PCGS Population Report. Blazing silvery nickel surfaces beam all over with a strong vibrancy. Sharply struck up, both sides show full detail. The surfaces show a dusting of the palest of indescence and a strong glass reveals zero serious issues that would impact the eye appeal. A superb coin housed in an old green tag holder. PCGS 41, NGC 2. The PCGS Price Guide value is listed at \$2,150 and the most recent example sold for \$2,280 in an October 2019 auction sale. Just four have graded marginally finer, all MS67+. FROM THE SEATTLE COLLECTION What a wonderful coin! Rarely seen so fine, there has not been a PCGS example in this grade sold since 2012! No PCGS graded example sold since October 2012! That coin brought almost \$5,000. This coin has been off the market even longer, last selling in a 2005 auction sale. FROM THE SEATTLE COLLECTION From a low mintage of only 4,000, this is a major rarity in any Mint State grade, especially so in MS65 or finer. This GEM is oozing with vibrant brilliance that blazes all over the satiny smooth surfaces and sharply struck devices. While rotating this luster bomb in a light and looking at it with a strong glass we note a few tiny flecks, attesting to the SUPERB originality and they have zero impact on the SUPERB eye appeal. PCGS 5, NGC 8, CAC 2. This marvelous GEM does not appear to be either NGC/CAC coin that sold, the only CAC approved records, each being over seven years old, bringing \$9,400 and \$9,988. The current PCGS Price Guide value is listed at \$9,500 and the CAC CPG value is \$10,900. Only a dozen examples have ever graded higher, and the PCGS value doubles from MS65 to MS66. FROM THE SEATTLE COLLECTION This is one of the absolute FINEST KNOWN examples of this low mintage date. Only 1,700 were struck for circulation, and this one is tied for second highest graded with a single MS67 finer. This magnificent, PQ GEM is a toning overs dream! Mingled shades of gold and pale apricot dominate, blending to periwinkle, rose and soft green toning at the peripheries on the obverse, while the reverse has a soft golden hue. The lovely surfaces are aglow with a brilliant luster. Razor sharp in strike this beautiful coin has full, bold definition on both obverse and reverse. Pretty as a picture as they say, this stunning coin will fit in any top flight set! PCGS 3, NGC 4, CAC 2. This magnificent GEM is the RECORD holder, selling back in 2011 for nearly \$30,000, as an NGC MS66. The last time a PCGS graded example sold was 15 years ago! The current PCGS Price Guide value is listed at \$27,500 and the CAC CPG value is \$29,000. We expect another RECORD realized price when it crosses the block again. Good luck. Cert. FROM THE SEATTLE COLLECTION Like the 1883 and 1884 three cent nickels, the circulation strike mintage was tiny, only 1,000 were struck, far fewer than the Proof mintage of 3,790. As a KEY in all grades and a condition rarity at this lofty state of preservation this is a GREAT coin for any collection of three cent nickels. Brilliant, satiny mint luster radiates all over on this GEM. Both obverse and reverse are remarkably smooth and devoid of any issues of any kind. The devices are quite sharp, offering fully defined details. Totally original, this GEM is housed in a first generation PCGS slab. We don't understand why CAC did not bear this impressive MS65 PCGS 15, NGC 5. The Seattle Collector bought this coin from the February 2011 Long Beach Auction, where it sold for \$17,250. While the market has come down somewhat, its great eye appeal and technical quality and freshness will propel it to a level around the current PCGS Price Guide value of \$12,500. FROM THE SEATTLE COLLECTION Despite a very low mintage of 5,000 pieces this date is generally available in GEM grade, as there are 59 graded MS65 between PCGS and NGC (obviously this figure includes some duplication). A lovely satiny luster enlivens the satiny nickel surfaces. Generally smooth, there is a planchet flaw in the central reverse, but is mint made and does not detract from the assigned grade. PCGS 37, NGC 22, CAC 13. Totally fresh to the market, this GEM last sold in 2007, when it was PCGS Pop 24, none finer. Today, there are 38 finer. The current PCGS Price Guide value is listed at \$1,700 and the CAC CPG value is listed at \$1,750. A lovely coin like this will see strong bidding. Cert. Number 6583644 PCGS # 3755.00

FROM THE SEATTLE COLLECTION The combination of LOW MINTAGE, (just 31,919 business strikes were coined this year) and the low population of CAC stickered examples for the grade, make this a highly desirable piece! We haven't even mentioned the intense BEAUTY of hints of baby blue, lilac and gold toning that grace thickly frosted fields and motifs. A couple of well concealed marks are noted. PCGS 74, NGC 33, CAC 19. No recent auction sales of CAC graded pieces. Non-CAC graded pieces sold for \$985 in May 2019 and \$602 in October 2019. FROM THE SEATTLE COLLECTION The final year of the denomination saw a mintage of only 18,125, and this one is among the FINEST NGC graded examples, just three are finer at that service. Bold indescendent tone in blue, gold, and olive hues dominate both obverse and reverse, the lovely shades accented by a warm underlying lustrous glow. Sharply struck, this totally original GEM has a gorgeous visual allure. PCGS 27, NGC 19. The last NGC graded MS66 was CAC approved and sold for \$1,440 in March 2018, prior to that, two non-CAC examples sold for \$720 and \$764 back in 2017. The current Collectors Universe value is listed at \$1,250, and that value doubles in MS67. A great coin for any type or date set of this obsolete denomination. Cert. FROM THE SEATTLE COLLECTION A fresh and original example of this first year of the nickel series. Short lived, the with Rays reverse was only struck in 1866 and part of 1867, the busy nature of the design proved difficult to strike and were removed. The present coin has a warm satiny lustrous glow that accents well struck design features and clean, defect free surfaces. The soft patina is totally original and visually appealing. PCGS 180, NGC 173, CAC 41. The most recent brought \$1,320 in June 2018 and prior to that we sold one in our September 2016 Premier Session, for a hammer price of \$1,550. The current PCGS value is \$1,350 and the CAC CPG value is \$1,620. Scarce any finer, worthy of a strong bid. Cert. Number 38682853 PCGS # 3790.00

FROM THE SEATTLE COLLECTION A lovely example, one of only two dates featuring the with Rays reverse. This is a nice Gem with a bold frosty luster and sharply struck devices. The date is boldly doubled and adds an interesting variety for the collector. There is a planchet flaw on the reverse which is mint made and we note for accuracy. PCGS 41, NGC 53. The last PCGS graded example sold for \$2,040 in October 2018. More recently an NGC graded coin sold for \$2,100 in December 2019. The current PCGS Price Guide value is listed at \$2,750 and the value jumps to \$9,500 in MS66! What a great opportunity for the collector. Cert. Number 5649218 PCGS # 3791.00

	66 5C 1867 NO RAYS. NGC MS65 FROM THE SEATTLE COLLECTION A pleasing example of the first year of the type without the Rays on the reverse. Both sides show exceptional luster and nice y struck up devices. We note some minor lines on the reverse, perhaps from an old gentle wiping, which accounts for it not being endorsed by CAC. Even with the minor flaw, the eye appeal is wonderful. PCGS 83, NGC 107. The average NGC graded coin has brought \$564 going back to 2014 and the current Collectors Universe value is listed at \$650. With MS65s trading for over \$1400, we suggest you keep your hand up for this one, it could be a strong candidate for a higher grade (no promises)! Cert. 	69 5C 1870 PCGS MS66 CAC FROM THE SEATTLE COLLECTION What an impressive GEM example for the date, ranking among the FINEST graded at either service, PCGS has graded nothing finer than MS66+. Brilliant nickel silver surfaces glow with a bold, lustrous mint vibrancy on both sides. Just a touch of striking weakness keeps this PQ beauty from full definition in the shield. Every other detail is sharp. Satiny smooth surfaces are devoid of any serious traces of contact or any discolorations. PCGS 16, NGC 5, CAC 8. This coin sold 14 years ago for \$4,600, at a time when the population was only 5, and none finer. While today the Collectors Universe value is listed at only \$2,500 and the CAC CPG value is \$2,750, this coin will see very strong bidding from the specialist collector. Only seven MS66+ coins have been graded finer, making this a great coin for any advanced collection. Cert. Number 7961998 PCGS # 3797.00	Estimate: 2,200.00 - 2,600.00 USD
	70 5C 1871 PCGS MS65 CAC FROM THE SEATTLE COLLECTION This is what an old time GEM example looks like! Graded years ago and housed in an early green tag holder. Satiny lustrous surfaces bloom with a glowing radiance. Well struck and pleasing quality. Free of distracting marks and discolorations, the eye appeal is great for the grade. PCGS 37, NGC 17, CAC 14. This coin is totally fresh to the market, having last sold in 2005. The most recent PCGS/CAC coins have sold in the \$1,860 to \$2,640 range and the current PCGS Price Guide value is listed at \$2,150. The CAC CPG value is \$2,880. With fewer than 20 examples graded higher, this GEM will fit in nicely in any advanced Registry Set. Good luck. Cert. Number 6407387 PCGS # 3798.00	Estimate: 1,800.00 - 2,000.00 USD
	71 5C 1872 NGC MS65 FROM THE SEATTLE COLLECTION Although the mintage this year is high, examples in GEM grade are NOT. This coin could easily grade a MS66 in our opinion, but of course we make no promises. Not a bagmark can be found on the surfaces, just some die polish striations (as made). Booming mint luster is slightly subdued on the reverse due to some gold, steel gray and ice blue overtones. UNDEFERRATED date. PCGS 52, NGC 36. An example sold for \$960 in August 2019. Bid liberally, this coin is worth it! Cert. Number 1278135 009 PCGS # 3799.00	Estimate: 900.00 - 1,000.00 USD
	72 5C 1873 OPEN 3. PCGS MS65 CAC FROM THE SEATTLE COLLECTION Opportunities to buy this date in GEM condition are few and far between. If you are looking for an absolutely beautiful, PRISTINE example, then this is your coin! Exceptionally sharp design details are graced by full mint bloom and luster with traces of champagne gold toning. Two tiny marks are noted, one above the date and another on the reverse. WOW, what a fabulous piece. PCGS 36, NGC 12, CAC 14. A CAC example fetched \$2,160 in January 2019 and another brought \$5,160 in May 2019. If you lose out on this beauty because you don't keep bidding, you will only have yourself to blame! Cert. Number 38682858 PCGS # 5485.00	Estimate: 1,500.00 - 1,800.00 USD

Brilliant luster blooms vibrantly in the fields, accenting the lightest blush of pale gold, rose, and steely blue over the wonderful nickel silver surfaces. Sharply struck and generally clean, the eye appeal is bold. PCGS 51, NGC 21. The current PCGS Price Guide value is listed at \$1,250 and the most recent example brought \$840 in April 2019. Scarce finer, this lovely coin is great for type or date purposes and will see strong bidding. Cert. Number 38682859 PCGS # 3803.00	Estimate: 750.00 - 850.00 USD
	74 5C 1875 PCGS MS65 CAC FROM THE SEATTLE COLLECTION What a neat looking, old holdered GEM! This is what these should look like! Bold, cartwheel luster blooms brilliantly on both sides. Sharply struck up and the surfaces are totally original, the eye appeal is excellent. While we note a tiny tick or two, seen only with the aid of a strong glass, none are serious and are appropriate for the assigned grade. PCGS 35, NGC 25, CAC 10. The most recent PCGS MS65 to sell in auction realized \$3,360 and it was not CAC. This one with its great eye appeal will bring a strong bid, in excess of the \$1,400 Collectors Universe value. Cert. Blazing white luster accents keenly struck motifs graced by mint frost. Very pretty and choice. Mark free! PCGS 51, NGC 33, CAC 14. A CAC example sold in June 2018 for \$1,920. If you are looking for a choice CAC example, don't miss this opportunity! With so few CAC approved pieces out there it could be a long time before another specimen surfaces for sale! Cert. 	FROM THE SEATTLE COLLECTION The 1877 nickel is a Proof Only date, and only 610 were struck. This is a watery reflective GEM. Totally original with a speckled iridescent toning that adds to the allure. Sharply struck throughout, this coin has a great look. PCGS 127, NGC 105, CAC 20. No doubt there is much duplication in those numbers. The most recent example sold for \$3,750 in an April 2019 Internet Only auction, and prior to that, one sold in November 2017 for \$3,840. The current CAC CPG value is \$4,750 and the Collectors Universe value is listed at \$4,250. Quite scarce any finer, this fresh and original GEM will delight anyone working on this wonderful series. Bazing silver reflect on on both sides are ultra reflective and the devices are sharply struck up. Essentially flawless, this wonderful PQ GEM is very high end! PCGS 178, NGC 151, CAC 65. The most recent example sold in July 2019 for \$1,440 and the PCGS Price Guide value is \$1,600. Worth of a strong bid, and great set. Cert. Number 38682897 PCGS # 3832.00

	FROM THE SEATTLE COLLECTION A lower mintage issue, with only 25,900 struck for circulation, this date is RARE in GEM and finer grades. The present example was clearly hand selected for its great eye appeal and quality. Bold, radiating luster blooms all over, highlighting the sharp y struck devices. Totally original, both sides have some minor flecks and pale iridescent gold tone that attest to the originality of this important piece. PCGS 30, NGC 20, CAC 4. Only one CAC approved example has sold in auction, realizing \$3,565 in July 2017. The current PCGS value is \$3,600 and the CAC CPG value is listed at \$4,250. 	FROM THE SEATTLE COLLECTION The 1880 Shield nickel is the undisputed KEY date to the series in all grades. Only 16,000 were struck for circulation, and not only is it rare in all grades, it is excessively so in GEM Mint State, and virtually unknown any higher. A strong satiny luster radiates all over, accenting well struck devices. While in some cases there is some confusion between semi reflective Mint State coins and Proofs, there is zero confusion with this one. The surfaces are frosty with a soft glow and radial cartwheels. A pale peach, pewter and gold iridescent tone is gently dusted across the GEM quality surfaces. This is a great example for the collector looking to complete their set. PCGS 7, NGC 4. This example sold back in June 2013 for \$73,496 and the current PCGS Price Guide value is listed at \$70,000. While more recent auction prices were lower, this coin has a great look and should bring a strong price when it crosses the block. Very pleasing and very important, this is a coin that is bested by just two MS66s that have never sold in auction. What a great opportunity that should not be missed! Good luck! Cert. STUNNING mint bloom and bold luster grace immaculate, smooth surfaces and sharply struck design elements. Really choice. Just a whisper of ha-cyon tone that lends to the originality. PCGS 17; NGC 11. Recent auction records are \$2,820 in both January 2013 and January 2014, with nothing more recent. One would think more examples would exist in MS66 and finer grades, but alas, not so. In fact, the finest graded example at PCGS and NGC combined is MS67! We expect this coin to garner a knock down drag out fight to the finish! Good luck! Cert. Number 1271268.002 PCGS # 3811.00

Interesting obverse die cracks. One toning spot beneath the I in IN is noted for accuracy. PCGS 218; NGC 162, CAC 37. No CAC graded auction records, however a non-CAC piece sold for \$508 in October 2019. Please note there are very few pieces that have obtained the coveted "green bean." 	FROM THE SEATTLE COLLECTION Like the 1885, the 1886 Liberty nickel is a conditionally RARE date in Mint State, especially in GEM grade and finer. This MS65 graded example has a rich, satiny mint luster that blooms all over, accenting the lovely pastel iridescent toning. Well struck throughout, this fresh example has a wonderful eye appeal and is kept from a finer grade by a single tiny fleck or two. PCGS 54, NGC 24. The most recent NGC graded example was CAC approved and sold for \$5,175 in July 2017, prior to that, a non-CAC example sold in the 2017 FUN auction for \$6,463. 	FROM THE SEATTLE COLLECTION If you are someone who has been collecting Liberty Head nickels for a while, you will appreciate the WONDERFUL quality of this date run offered in this sale. Think of how many frogs you have discarded due to ugly toning, milk spots, bagmarks, etc, to get to the price (or in this case PRINCESS). This piece is the CAT'S MEOW of 1894 nickels! It has everything going for it! Stunning luster is enhanced by beautiful cascading color in shades of rose, ice blue, tangerine and lemon yellow. Crisp, fully struck motifs. One small break in luster to the right of the lower portion of the V is all that is worth mentioning. PCGS 60, NGC 51, CAC 16. 	100 5C 1899 NGC MS66 FROM THE SEATTLE COLLECTION A brilliant GEM example, a wonderful representative of the date/grade. Smooth surfaces are adorned with a bold mint luster that radiates on both obverse and reverse. Showing some minor bluntness of strike at the lower left portion of the wreath can be ignored, as the rest of the design is well struck up and the surfaces are devoid of any flaws of consequence. The eye appeal is lovely. PCGS 79, NGC 42. The current Collectors Universe value is listed at \$750 and the most recent NGC graded coin brought \$552 in March 2019. 	102 5C 1901 NGC MS65 FROM THE SEATTLE COLLECTION A lovely, satiny GEM. Sharply struck, this pleasing 1901 nickel has a delicate blush of iridescent gold at the rims, and just a few tiny ticks which account for the assigned grade. We are dumbfounded as to why CAC did not bean this one. PCGS 196, NGC 159. The last non-CAC NGC graded example sold for \$423 in September 2016 and the current Collectors Universe value is listed at \$375. Housed in a slightly older holder, this coin is fresh to the market and should bring a healthy bid. Cert. Number 1632906-007 PCGS # 3862-00	Estimate: 325.00 - 375.00 USD

	113 5C 1912 PCGS MS66 CAC FROM THE SEATTLE COLLECTION It's hard to believe that the finest graded example of this date is an MS66+. With a mintage of over 26,000,000 pieces you would think more examples would exist in pristine condition. With that in mind, it makes this presently offered specimen even more special and UNDERATED in it's GEM status! Crisp definition, especially on the left corn ear, which is typically weak. Beautiful waves of sky blue and peach toning grace lustrous fields. A few tiny flea bites are noted for accuracy. PCGS 40, NGC 9, CAC 14. No CAC auction records, but a non CAC example did sell in October 2019 for \$552. A great opportunity to pick up a tough issue in the grade. A generous bid will get it bought! Cert. 	116 3C 1863 J-321. PCGS PR65 RB CAC FROM THE SEATTLE COLLECTION This is a very rare and seldom encountered true die trial, struck in copper from the regular issue Proof dies, and is considered to be R7, with perhaps 7-12 known in all grades. Combined, PCGS and NGC have graded nine examples which might include some duplication; Pollock lists eight, including two in the Connecticut State Library and one in the ANS. Highly reflective surfaces gleam with a strong, watery mirrored texture. Pleasing color, including the majority of the surfaces boasting the original red mint color, with faded accents of azure and violet that really pop in a brilliant light source. A few scattered micro-flecks are seen with the aid of a strong glass, which do not impact the overall SUPERB quality and visual allure. PCGS 1, NGC 1, CAC 1. This is the ONLY one in PR65 RB, recently crossed over from NGC to PCGS. Off the market for a decade, last selling as NGC PR65 RB without a CAC sticker in April 2010, where it realized just shy of \$10,000. The PCGS Price Guide only goes to PR64 RB, which is listed at \$8,500. If you specialize in three-cent silvers, and want to extend your collection, these RARE patterns seem to be a bargain! Cert. Number 38670138 PCGS # 70478.00	Estimate 8,000.00 - 10,000.00 USD

FROM THE SEATTLE COLLECTION This is an extremely RARE R 7+ die trial struck from the regular Proof dies, in aluminum with a plain edge. These were produced in the 1870s and sold in sets that included the Seated Liberty quarter, half, and dollar that were muled 1863 obverses with the With Motto reverses. There are six currently graded between PCGS and NGC, and Pollock lists three in his reference. From our July 2018 sale of the Steven Cook Collection, where we described it as: Generally very pleasing with an icy look. Taking in just the obverse you see a coin that is finer than you would expect of a 62 grade. The reverse has some streaks that were in the planchet, as made at the mint. Housed in an OGH, PCGS 1, NGC 0, CAC 1. Selling in July 2018, it realized \$2,585. Prior to that, this coin was first offered in Stack's September 1997 sale where it realized \$3,300 and more recently it sold for \$2,943 (prior to being CAC'd). The current Collector's Universe value is listed at \$3,750. Cert. Number 9326832 PCGS # 60479 00

FROM THE SEATTLE COLLECTION Ex Lemus Collection. A Rarity 5 die trial, using the regular 1865 Proof dies, struck in copper with a plain edge. Totally original, this GEM has a pleasing patina on that is seen on smooth, flashy fields. Hints of red color are seen mellowing to an even brown, with accents of violet and blue. A pleasing piece from the first year of this obsolete denomination, this coin has an excellent pedigree. PCGS 2, NGC 4. Last sold in the 2009 FUN auction, which featured the extensive Queller/Lemus Collection of patterns, this coin was earlier in the Corrado Romano Collection, sold by Stack's in June 1987, lot 837. This coin realized \$2,760 over a decade ago and none have sold in nearly six years. NONE are graded higher at NGC in the BN category. This coin has a lot to offer the collector, and is worthy of a premium bid. Cert. Number 3124022 013 PCGS # 60594 00

FROM THE SEATTLE COLLECTION Ex Denali Collection. This is a VERY RARE die trial struck in Oroide using the regular Proof dies. Considered R 7+, with perhaps 4-6 known in all grades, which matches the combined PCGS and NGC Population figures which come to 4 graded examples. The Oroide alloy is a blend of 19 parts copper and 1 part aluminum, which gives the metal its distinctive golden tone. Sharply struck, the lustrous Proof surfaces glow brilliantly on both sides. The oroide alloy has delicately toned with an apricot peach hue that is quite delightful to behold. Some scattered flecks, natural to the reactive nature of the metallic blend are noted, but there are no serious flaws. Struck from a cracked and clashed state of the dies. Very cool and VERY RARE. PCGS 1, NGC 0, CAC 1. The last time this coin sold was in March 2012, realizing a record \$8,625. Today, the Collector's Universe value is listed at \$6,500. There is just a single PCGS PR65 finer, a coin that has never sold in auction. Cert. Number 6647056 PCGS # 60595 00

FROM THE SEATTLE COLLECTION Ex Lemus Collection. This is an extremely RARE, R 7+ die trial struck in copper with a plain edge. An estimated 4-6 are thought to survive per the Judd rarity scale, but between PCGS and NGC there are eight in all grades and designations. Flashy, watery mirrored surfaces show ample original mint red color that mingles with a dusting of dappled periwinkle, magenta, and blue hues. The devices are sharply impressed with just a single lint mark to the left of the date, which will forever identify this GEM as the Queller/Lemus coin. From Heritage's 2009 FUN Auction, featuring the Queller/Lemus Collection. Earlier obtained privately from Stack's, ex 1998 ANA auction, lot 5074, ex Kaghan's 50th Anniversary Sale, May 1978, lot 1275; ex Robert Hughes ad, July 1977. PCGS 0, NGC 1. This GEM realized a record price of \$9,200 in the 2009 FUN auction, and no other RB has ever sold in auction. As the FINEST graded example, this coin will fit in beautifully in any advanced set of times, Patterns, or box of 20 rarities. Bidding will be intense, so good luck! Cert. FROM THE SEATTLE COLLECTION This is a wonderful transitional Pattern, that shows the adopted Shield design, dated 1865, and the regular reverse die for the 1866 With Rays nickel. These extremely rare novodels were likely struck in the 1870s for sale to collectors. Struck in copper with a plain edge, J-417 is a R 7 issue, with fewer than a dozen known in all grades; the combined PCGS and NGC Populations are 13, making the R 7 seem very accurate, considering crossovers and resubmissions. Blazing RED mirrors beam brilliantly on both sides. The color is a bold and flaming brick hue with just a few micro flecks noted for the sake of accuracy. The crisply rendered devices are sharp and the eye appeal is exceptional for the assigned grade. PCGS 2, NGC 1, CAC 2. This coin last sold in auction back in September 2007 as an NGC PR64 RD. It was recently submitted for crossover and CAC. We note the following APRs as a guide for bidders: a PCGS PR63 RD sold in April 2017 for \$5,875, this coin brought \$6,900 as an NGC coin, and an NGC PR65 RD sold in November 2006 () brought \$7,763. The current Collector's Universe value is listed at \$6,500 and that level will prove low when the hammer finally falls. A great coin for anyone working on an advanced nickel collection! Good luck. FROM THE SEATTLE COLLECTION Another RARE Pattern Shield nickel, matting an 1865 dated obverse with the No Rays reverse adopted in 1867, these are believed to have been struck in the 1870s for sale to collectors. Rated as R 6+, with 13-20 believed to exist in all grades. Pale, totally original golden hues are dusted over reflective, nickel silver surfaces. The design elements are boldly struck up with a bold definition. It is interesting to note that the reverse die was so heavily polished that several letters are partially effaced at the tops. A very cool and rarely seen Pattern. Housed in an old green tag holder. PCGS 6, NGC 1, CAC 2. This GEM realized \$7,050 in October 2014 and the current Collector's Universe value is listed at \$7,500. Worthy of a great cabinet of Pattern coinage, or a stunning assemblage of Proof Shield nickels. Cert. Number 4504144 PCGS # 60600 00

FROM THE SEATTLE COLLECTION One of the FINEST graded examples of this R 6 Shield nickel pattern, an intriguing variation where the ball at the base of the shield divides the date and the reverse has the "Dutch" 5 in the wreath reverse. Listed as R 6, there are 13-20 estimated to survive in all grades. Flashy, chrome-like reflective fields beam with an exquisite depth for the metal. There is a faint blush of indolent silver white tone that attests to the wonderful originality of the piece. Sharply rendered, all the details stand out wonderfully against the smooth surfaces. PCGS 4, NGC 2, CAC 1. Last sold for \$3,600 in the 2018 FUN auction, prior to that, one sold for \$4,230 in the 2013 FUN auction. The current Collectors Universe value is listed at \$5,600. Sharply struck up, the design types are quite bold. PCGS 2, NGC 2. Long off the market, this is not the one that sold in our July 2018 Regency Auction. FROM THE SEATTLE COLLECTION A GEM example of this R 5 transitional Pattern nickel, pairing an 1866 dated obverse die and the No Rays reverse adopted in 1867. Offering a bold, CAMEO contrast on both sides, the fields show an exceptionally flashy brilliance and seriously deep, clear reflection. The sharply struck up design elements have a great frosty texture that contrasts nicely. There are no serious marks or flecks can be found anywhere, just some minor specks can be seen with the aid of a strong glass, attesting to the originality of this GEM. The eye appeal is very high end! This coin is incorrectly numbered as PCGS # 60703, the # for CAMEO is 860703. PCGS 6, NGC 2, CAC 5. A large 5 in a thin aureole wreath, IN GOD WE TRUST above. Struck on a broad copper planchet with a reeded edge. Rated as R 7+, with just six currently seen at PCGS and NGC in all grades. A wonderfully preserved GEM with light mirrors in the fields. The unstruck areas at the rims have a satiny texture. Nicely struck, the surfaces are mostly red with some iridescent toning distributed over the devices. There are a few old flecks, but the eye appeal is quite nice. PCGS 2, NGC 0. This coin last sold in auction five years ago, and is the finest example that has sold in auction. Five years ago, it sold for \$7,050. Today the Collectors Universe value is listed at \$7,900. The devices are nicely struck. PCGS 7, NGC 6. The last PR65 to sell in auction was back in March 2011 for \$2,300. The Collectors Universe value is \$2,800. FROM THE SEATTLE COLLECTION Though not noted on the insert, this is the Col. Green-Eric Newman coin, the undisputed FINEST KNOWN of this incredibly rare Shield Nickel die trial, struck in aluminum with a plain edge. Fewer than a half dozen examples are known of this R 7+ pattern. Ultra deep, beaming mirrors beam all over on this SUPERB GEM. Thickly frosted devices stand out boldly against the highly reflective fields. They are icy smooth and have only a few mint made die polish lines in the fields. Free of any flecks, lines, or marks of any kind, the eye appeal of this SUPERB GEM is off the hook crazy! PCGS 1, NGC 1, CAC 2. The data represents this one coin. We believe there is just one or two other examples known. This coin most recently sold as an NGC PR67 CAM CAC for \$12,925. Unpriced by Collectors Universe, this is the ULTIMATE J 688, an incredibly RARE Shield nickel pattern. Worthy of placement in any world class pattern collection. Good luck! Cert. Our sister firm, Legend Numismatics, handled the Denali Collection of 1870 Patterns in 2010. Flashy Proof fields offer a lovely watery reflection bringing out an impressive array of totally original toning. The devices are sharply struck up and frosty. The surfaces are totally devoid of any flaws and the eye appeal is exceptional. PCGS 2, NGC 0, CAC 2. Both of these are ex Denali, the other one sold in our May 2018 sale of the Steven Cook Collection, Part 1 for \$6,169. The current PCGS value is \$6,000. Only one PR66 RB is graded finer and is impounded in the Simpson Collection off the market since August 2013, where it realized \$5,875 and the current PCGS Price Guide value is \$6,000. Sold in sets of all denominations from cent to double eagle these "die trial" or off meta coins are really cool. The present coin is one of less than a handful known and second FINEST known. Nicely reflective fields are bold and GEM quality, devoid of any of the issues that often plague aluminum planchets. The eye appeal is wonderful. PCGS 1, NGC 0, CAC 1. Only one other example is graded higher a PR66. This coin sold for nearly \$10,000 in the 2014 FUN auction and the current PCGS Price Guide value is listed at \$9,500. A wonderful and RARE pattern. Struck in nickel with a plain edge, this coin is R 6-. This is the FINEST example extant. Bold, watery reflection in the fields, accented a pale blue iridescent tone that is a true delight. Well struck and very nicely preserved, this coin has a great look. PCGS 1, NGC 3, CAC 2. The last PCGS graded coin sold in February 2003! Unpriced in Collectors Universe, the coin that sold a generation ago brought over \$4,000 and the last NGC coin brought \$3,760 in April 2017. FROM THE SEATTLE COLLECTION Tied for FINEST graded example of this Rarity 6 pattern Liberty Head nickel at NGC. Longacre's Coronet Head of Liberty design, similar to that on the three cent nickel is feature on the obverse, while the reverse has a large V and CENTS in the wreath. V is in retrograde, with the thick arm on the right, rather than the left. Struck on a 100% copper planchet. This is a highly reflective, sublime quality GEM. The hard copper fields are smooth and free of any distracting lines. A lovely iridescent blue overtone mingles with coppery brown hues below. Sharply struck up, the eye appeal is unaffected by the few microflecks we see with a strong glass. PCGS 0, NGC 2. The most recent NGC PR66 BN sold in January 2006, bringing \$3,220. More recently we sold an NGC PR66 BN for \$2,820 in our May 2018 sale of the Steven Cook Collection. Unpriced in the Collectors Universe Price Guide in 66 BN, in 65 BN the value is \$3,500. FROM THE SEATTLE COLLECTION This is a very pleasing GEM example of this R 7 Liberty nickel pattern by Longacre. Struck from the same dies as the J 1051 above, this one struck in aluminum with a plain edge. The planchet had many flaws, including a small lamination on the reverse rim. Highly reflective surfaces shine through a dusting of pale iridescent tone that attests to the originality of this well struck rarity. NOTE: There are a number of scuffs on the holder, not on the coin. PCGS 1, NGC 1, CAC 1. This coin last sold in June 2014 for \$4,700 and the current Collectors Universe value is listed at \$5,500. A single PR66 is finer and it has not been seen in auction for 15 years. This is a rarity worthy of a strong bid. Cert. Number 251137111 PCGS # 61311 00

FROM THE SEATTLE COLLECTION Here is another really cool Longacre Pattern Liberty Head nickel, struck on a nickel planchet, with a plain edge. Listed as Rarity 6+, it is quite scarce indeed. Highly reflective mirrored fields beam wildly all over. While these are not listed as restricks, looking at this one, it appears to have been a later strike from this die pair with some minor rust in the fields, a bulging die, and a spidery die crack connecting UNITED STATES OF AMERICA on the obverse. There is an area of light haze on the obverse field, which is typical of this alloy, and we note a touch of high point weakness on the obverse devices, normal for nickel strikings. Overall, appealing and difficult to locate. PCGS 2, NGC 2. This coin has sold twice in the last decade for about \$1,600 and the current Collectors Universe value is \$3,000. What a great opportunity of any collector of nickels, or patterns. Cert. Number 356495 005 PCGS # 61312

None are finer in the BN category. The only NGC record is from March 2008 where one sold for \$3,105. The current Collectors Universe value is listed at \$3,100. FROM THE SEATTLE COLLECTION The FINEST graded example of this VERY RARE pattern issue, we think this is the one from the March 1981 Bowers and Ruddy auction, lot 618, though the half tone image is hard to match exactly. A HIGH RARITY 7, there are just two graded by PCGS in any grade, and this one is very high end. Struck in aluminum with the regular issue dies, this was part of a copper and aluminum off metal set. GEM quality everything identifies this excessively rare die trial. Deeply mirrored fields are beaming with bold reflection that accents the highly frosted devices on both sides. The eye appeal is simply stunning. PCGS 1, NGC 0, CAC 1. Neither this one, nor the Cat Daddy Bob Simpson PR64 DCAM have sold in auction (the Cat Daddy Collection was sold in Stack's November 2007, and the coin did not make reserve). This one sold for \$5,875 in April 2015. Unpriced in Collectors Universe, this is a very important opportunity for any Pattern specialist! Cert. Number 6647112 PCGS # 800040 00

FROM THE SEATTLE COLLECTION This is an incredibly RARE R 7+ three cent nickel die trial, using the regular issue dies struck in copper. PCGS has graded three in all grades and designations. These were produced for collectors, in both copper and aluminum. Very reflective RED surfaces gleam from below a dusting of minor speckled toning which attests to the originality. This coin is essentially of FULL GEM quality and eye appeal, we are not sure why CAC did not approve it. PCGS 1, NGC 0. This coin has appeared in auction a few times, the most recent in October 2015, realizing \$4,700. The current Collectors Universe value is listed at \$6,500 and this issue is VERY RARELY seen ever, this coin will end up in another great collection of patterns. Good luck! Cert. FROM THE SEATTLE COLLECTION Ex Eric P. Newman Collection, earlier ex Col. Green Collection. This is an incredibly RARE pattern shield nickel, struck from the regular issue dies, in copper with a plain edge. Considered to be RARITY 8. While the population data at both services combined show four coins other than this one, this is the only CAC approved one. Rich red color mingles with mellowing golden brown hues over the satiny surfaces. Interestingly the fields are not mirrored reflective. The details are razor sharp in definition from an exacting impression from the dies. Also adding to the intriguing nature of this coin is the high wire rims on both obverse and reverse, especially so on the obverse. There are no spots or traces of contact anywhere to distract the eye, this coin has a great look and is essentially tied with the Simpson coin for FINEST KNOWN honors. PCGS 0, NGC 1, CAC 1. This coin was last sold in December 2013 for \$9,400 and in the first Newman Collection sale, in April 2013 it realized \$11,163. In PR65 RB, the current Collectors Universe value is \$10,000 and is unpriced in 66 RB. Excessively RARE, this may prove to be a once a decade opportunity to buy this incredibly RARE Judd number. 	146 LESHER 1900 AB BUMS. TYPE 1 HK-788. PCGS MS64 CAC	Estimate 7,000.00 - 8,000.00 USD
	<p>PCGS has misattributed this near GEM Leshor dollar. It is really a Type 2, HK 789 (PCGS # 19002). The difference is the absence of scrollwork to the sides of the fasces on the Type 2. This is a gorgeous, high end example, tied for FINEST graded. Moderately Prooflike luster blooms all over on both sides of this impressive beauty. Light blue and rich rose hues are draped on both sides. Sharply struck up, this example has a great look. Joseph Leshor was a Colorado pioneer and owner of a silver mine. He struck these tokens, which each contained a full ounce of silver, with a face value of \$1.25, which could be redeemed at various merchants in the area. Bumstead, who was a Grocer in Leshor's hometown of Victor, CO was his largest customer, and thus many Leshor dollars are from this issuer. Running afraid of federal authorities, soon after he began striking these "souvenirs", the Secret Service put an end to the issue. Between the two Bumstead types, PCGS has graded five and NONE FINE, CAC has approved 2. Again, this coin is misattributed by PCGS, which is why we include info on both types combined. This piece sold for \$6,463 in the 2017 FUN auction. No Type 1 has ever sold in auction, making this the FINEST available. We love the look of it, and its historic place in numismatic circles makes it a very interesting private issue, popularly collected by specialists in Territorial pieces. Good luck. Cert. 	<p>Miller 43.1 Y, W 4250. This is the only die variety that features the misspelled CONNFC legend. Considered to be R 2 as a variety, this lovely AU coin is likely in the condition census for the variety. Pleasing glossy brown surfaces are smooth and hard, devoid of the typical roughness or issues that plague Connecticut coppers. Both sides are well struck and well centered, imparting a great visual allure. PCGS 4, NGC 0, CAC 1. This coin sold in 2017 for nearly \$2,000. This one is worthy of a very strong bid, it rivals the PCGS MS61 example that sold in the Robert Martin Collection (November 2019), ex Eric P. Newman Collection, at \$3,840. 	<p>C 2, noted by the closeness of ST in STATES on the reverse. A lovely boldly lustrous GEM. Brilliant original mint red accents the violet tinged brown surfaces. Radiating mint blooms all over that swirls with strong cartwheels. Sharply struck with fully rendered devices. Exceptional surfaces devoid of any serious marks or carbon flecks of any kind. Likely from a hoard discovered by Elmer Sears around 1935, which Walter Breen noted to have contained "fiery mint red Uncirculated" coins. PCGS 35, NGC 23, CAC 20. The last two examples sold for \$2,532 and \$2,880 in July and May 2019 respectively. The current Collectors Universe value is \$3,900 and the current CAC CPG value is \$3,120. We sold an example in July 2017 for a then record of \$6,169. What a great type coin or a Gem for any great half cent set. Cert. Number 38397141 PCGS # 1169.00</p>	
	150 1/2C 1854 PCGS MS65+ BN CAC	Estimate 1,200.00 - 1,400.00 USD
	<p>What a lovely GEM example for the Coronet half cent type. Well struck devices stand out against smooth lustrous surfaces that are toned in a soft brown, pale iridescent blue accents and a wealth of golden red that clings to the protected areas of design types. A few tiny ticks keep this GEM in the current grade, but the eye appeal is certainly higher. PCGS 41, NGC 57, CAC 26. There are three graded MS65+ at PCGS and just five finer (all MS66 BN). The current PCGS Price Guide value is \$1,500 and with its great look, we think that level will be exceeded when the hammer falls. A great type coin. Cert. Number 28213193 PCGS # 1230.00</p>	
	151 L1C 1797 REVERSE OF 1797. STEMS. PCGS MS64 BN CAC	Estimate: 14,500.00 - 17,500.00 USD
	<p>A warm, medium chocolate brown toned S 123, an R 4 variety that was one of the three varieties that turned up in the famed Nichols Hoard. Identifiable by the 6 berries on both sides of the wreath, the high position of the final 0 in the denominator, the high placement of the date, and the cut on Liberty's cheek which Breen opened was a piece of another die that fell out and damaged the die. Boldly lustrous with wonderful surfaces, this coin is a delight for any type or early copper collector. Well struck and devoid of any serious marks, there are just a few little imperfections in the planchet, which were mint made. The eye appeal is excellent. Hints of mahogany red brown really pops when rotated in the light. We love CHOICE early large cents, and the present example is high end and borders on the GEM grade. PCGS 38, NGC 5, CAC 16. The current Collectors Universe value is listed at \$20,000 and the CAC CPG value is \$19,400. The three most recent PCGS/CAC examples sold in the \$14,400 to \$17,625. Very scarce any finer, just 14 are graded higher in the BN category, this one is at a great value range for most advanced collectors. We anticipate strong bidding for this beautifully preserved near GEM. Cert. Number 34153495 PCGS # 1422.00</p>	
	152 L1C 1814 CROSSLET 4. PCGS AU53 CAC	Estimate 3,000.00 - 3,400.00 USD
	<p>A very pleasing, lightly worn, CHOICE AU S 294. Deeper, glossy brown patina is evenly distributed over sharply struck and very pleasing quality surfaces on both sides. No serious marks are noted, just a few minor ticks from its brief stay in commerce. Very pleasing for this type which is one of the more difficult to find nice. PCGS 14, NGC 8, CAC 4. The only CAC approved example to ever sell was an NGC graded coin that brought \$3,290 in June 2016. The current PCGS Price Guide value is listed at \$3,900 and the CAC CPG value is \$5,000. Difficult to acquire in higher grades, this one will delight anyone working on a set of large cents. Cert. Number 83711319 PCGS # 1573.00</p>

	<p>A low pop GEM. A blanket of warm brown color kisses satiny surfaces. Fully struck design details with broad rims. Some traces of darker toning are noted around the stars and the letter E of UNITED. No contact marks! A small area is noted where the design was struck through grease in the die on the neck near the lower hair curls. Part of the method of manufacture, not a detracting feature. PCGS 57, NGC 54; CAC 32. We sold a CAC example in September 2018 in our Regency Auction, the Naftzger coin for \$2,174 and another piece sold in January 2019 for \$1,320. Worthy of aggressive bidding! Cert. Number 38690040 PCGS # 1898.00</p>

Among the FINEST graded examples of this variant, just two coins are graded higher. This is a stunning example, featuring a bold, semi Prooflike, flashy red luster on the obverse and a beautiful satiny mint frost on the reverse. Sharply struck on both sides, the obverse devices stand out with a nearly cameo like look at certain angles. The vibrance of the surfaces is captivating and gives this SUPERB coin a great look, especially for a Copper nickel cent, which usually comes with a pale gold, almost washed out look; this one is wonderfully original and naturally toned. What a great looking, it is amazing that there are two graded higher! PCGS 14, NGC 2, CAC 8. There are 4 in MS66+, and two finer. While the most recent sold for \$7,200 in October 2019, we sold one in May 2017 for \$12,000 hammer. The current PCGS Price Guide value is listed at \$11,500 and keep in mind that a 67 will cost \$35,000+ today. Good luck! Cert. Number 6573158 PCGS # 2056.00

Tied for FINEST graded. This is simply a stunning SUPERB coin, even if this coin was RAW, you would easily be able to see that this has to be one of the FINEST. Brilliant, blazing mint red color radiates all over on both sides. Bold cartwheels roll along the smooth, silky red surfaces. Every detail is sharply struck, with full crispness on both sides and the surfaces are essentially pristine. The eye appeal is simply amazing. PCGS 10, NGC 1, CAC 3. There are three reported at MS66+ RD and NONE FINER. None of these have ever sold in auction. There was a regular PCGS MS66 RD CAC that sold in the 2019 ANA auction for \$19,200, and the current PCGS Price Guide value is listed at \$25,000. This SUPERB coin should see very strong bidding when those building the top set duke it out to bring home this prize. Good luck! Cert. Number 38569207 PCGS # 2099.00

The eye appeal is amazing! Housed in an old green tag holder, we cannot find this coin having sold in auction previously. PCGS 11, NGC 7, CAC 6. Within the last year, two other PCGS MS67 RD CAC's have sold, one in our May 2019 Regency Auction for \$14,100 and the other brought \$15,000 in the 2019 ANA auction. Both APRs are well above both the CAC PG value of \$10,000 and the PCGS value of \$9,500. Just two are finer in 67+ RD, neither of which have ever sold in auction. A booming headlight type ORIGINAL luster enhances the absolute GEM ORIGINAL mint blazing RED color. All of the details are lightly frosted and sharply struck. We rarely see pieces graded right and with this kind of flash. The eye appeal is way beyond what is normally seen; it is truly tremendous! PCGS 71, NGC 55, CAC 14. There are 10 graded MS66+ RD at PCGS and just four finer. We sold an example, which did not have the flaming orange red brilliance of this one for \$5,288 in November 2018. WOW! One of the key issues in GEM grades, and in MS66 RD, this coin is a very rare issue that is always in demand from collectors. This is a stunning example in an amazing state of preservation. This cataloger believes this coin has been safely stored since the day it left the bank. The surfaces are of exceptional quality, totally uncommon for this issue. A strong glowing luster beams from all over. Both sides are a bold, original GEM Mint red color devoid of any toning, discolorations, or flecks of any kind. Miss Liberty and the details are fully struck and stand out. The eye appeal is fabulous! An ever popular series, the 09 S has a low mintage, the majority of which saw extensive use in commerce has left very few GEM survivors, especially in this lofty state of preservation for collectors to choose from. PCGS 27, NGC 8, CAC 11. The most recent example realized \$11,750 in our September 2019 Regency Auction, and prior to that, one sold for \$21,600 in the 2018 ANA auction. Just nine coins have ever graded higher, just a single specimen being graded MS67 RD as finest. This amazing PQ GEM belongs in a world class collection of Indian Head cents. We know this one will excite any serious collector, and will end up in a top ranking set. Cert. Number 38588080 PCGS # 2240.00

A spectacular, bank roll fresh SUPERB GEM example of one of the most famous coins in the entire US series. Rich and vivid brilliant original RED color shines on both sides. A fiery copper luster bazes on the obverse and reverse, showing off the varying hues of red. The strike is about as strong as we have EVER seen for the issue. Immaculate quality surfaces abound, indeed, unless you use some ridiculous strong glass, you cannot find a single mark, tick, dot, fleck or spot anywhere on either side. The 25-D cent was struck to the tune of more than 22.5 million pieces, but most examples, like many earlier dates were not kept in roll quantity with brilliant red surfaces, so any full red GEM is truly rare. Fewer than 100 have been graded by PCGS after over 33 years of grading. This example is quite lovely, with rich red color that is enhanced by a lustrous brilliance. The surfaces are free of any distracting marks, and a strong glass reveals nothing but a single tiny fleck in the obverse field. Sharply struck and the eye appeal is high end. PCGS 84, NGC 12, CAC 15. The current PCGS Price Guide value is listed at \$4,000 and the CAC CPG value is listed at \$6,250. **167 1C 1943 BRONZE. PCGS MS61 RB CAC**Estimate 375,000.00 -
425,000.00 USD

Legend Rare Coin Auctions is honored to present this classic 20th century numismatic treasure. This awesome coin is truly legendary and recognized by collectors and dealers alike as one of the most sought after and famous of all 20th century rarities. The 1943 Copper or Bronze cent has been the subject of millions of phone calls to coin shops over the years and a date that had us all digging through pocket change and rolls of pennies from the bank with the hopes that we would be lucky enough to find one! Well luck has shined on us because this presently offered coin is the REAL DEAL, and is truly among the FINEST KNOWN extant specimens. It has been recognized for its quality as the plate coin for the 100 Greatest US Coins. There are 20 enumerated in the combined PCGS and NGC Population data, accounting for upgrades, regrades, crossovers, and the like, perhaps 10-15 distinct examples are known in all grades, mostly circulated, ranging from XF45-AU58. During World War II, various metals, namely copper and nickel were needed for military purposes, including munitions and were therefore commandeered for that purpose, causing the mint to look for other metals that could be used in the production of Lincoln Cent coinage. In 1943, the copper and tin in the bronze planchets used for the ubiquitous cent were needed for war production. Some experimentation took place in 1942, with the silver-colored zinc-coated steel cent of 1943 being issued for circulation. It does seem that some 1942 planchets were left over in the coinage hoppers which were then struck in 1943, and released accidentally. The first one to be discovered was received in change from a school cafeteria in March 1947 by Don Lutz, Jr. That coin recently graded AU53 by NGC and sold in the 2019 FUN auction, see more below. The presently offered MS61 RB is very high end for the grade, and while we make no guarantees, we think this coin is undergraded, the eye appeal is certainly much better than what you would expect for a 61. Additionally, the technical grade is fantastic in all aspects including strike, luster and aesthetic appeal. This sharply struck coin is the FINEST and only coin graded by PCGS in the RB designation. Easily identified as the James Schirnpa Collection coin, with its tiny spot by the L in LIBERTY and small mark next to the C in CENT. Rich orange color mixes with some violet blue patina over smooth brown surfaces. With a coin of this rarity and fame, the numeric grade almost doesn't matter, the opportunity to add such a RARE coin does not come up that often! Do you realize, if you become the proud new owner of this classic rarity, you take your place in history as one of only a handful of collectors throughout the world to have the privilege to do so? This isn't just a coin, this is a national treasure that represents an era in history when the free world defeated the oppression and imperialism of Japan and totalitarianism of Nazi Germany! A time when people came together to save lives, fight for freedom, and advance the good of mankind. In your hand will be the coin that forever symbolizes all of this struggle and triumph, and arguably the greatest generation in American history. PCGS 1, NGC 1, CAC 1. This coin does not have an auction record anywhere. We sold a PCGS AU55 CAC in our May 2014 Regency Auction for a record \$329,000. As the ONLY RB graded, this coin carries a Collectors Universe value of \$425,000. With just a single PCGS MS62 finer, a coin that will not likely be offered anytime soon, as it is impounded in the Bob Simpson Collection, this is the BEST PCGS graded coin available! We KNOW our own record could fall when this important American numismatic treasure crosses the block. Good luck! Cert. Number 50040291 PCGS # 82710.00

This pleasing coin will bring a very strong bid when it crosses the block and the hammer falls. Cert. Number 38476117 PCGS # 2826.00

Worthy of a very high end collection and will see very strong bidding. Cert. Number 84109938 PCGS # 3325.00

	173 1C 1936 SATIN. PCGS PR66 BN	Estimate: 1,500 00 - 1,700 00 USD
	BREATHTAKING ice blue and peach toning accents satiny mirrored fields. This date comes in two types, the Satin and Brilliant finishes. The punchlets were not prepared as they had been in the past, because Mint employees forgot the method of preparation where the surfaces displayed extra brilliant fields, thus the Satin finish was produced. Spot and mark free! One of a mere 5,569 Proofs coined. Note: this coin was not submitted to CAC by us. PCGS 3/ NGC 2. An example sold in May 2019 for \$3,840. A great, eye appealing piece for the collector on a budget. Good luck! Cert. Number 38684605 PCGS # 3330 00

	A magnificent BLAZING red SUPERB GEM Proof example of this date! Its freshness and quality is very high end. Flawless, deeply reflective mirrors beam all over with a flaming red color that contrasts against the sharply defined devices. Devoid of any serious copper spots, we note a tiny patch of iridescent toning on the upper reverse, which adds to the eye appeal. What a great looking example! PCGS 21, NGC 17, CAC 8. Just three examples graded PR66+ RD CAM at PCGS. We sold the last two examples, the most recent in our May 2018 Regency Auction for \$2,938 and prior to that, one sold for \$3,000 hammer in our June 2017 Premier Session. The current Collectors Universe value is listed at \$3,500. There are just four coins graded PR67 RD CAM finer at PCGS, which would bring five figures in auction today! Cert. 	176 1C 1955 PCGS PR68 RD DCAM	Estimate: 4,500 00 - 5,000 00 USD
	A lovely SUPERB GEM that is the epitome of perfection. Intense, deep mirrors beam from all over and are the epitome of cleanliness and clarity. They are bold and flawless contrasting wonderfully against the frosty, sharply struck devices. Brilliant RED is as fresh today as when this PRISTINE GEM came off the dies. It really does look like it was minted just recently rather than 65 years ago! PCGS 14, NGC 9. The current PCGS Price Guide value is \$7,500 and we sold the most recent example for \$5,405 in our December 2019 Regency Auction. With just one PR69 DCAM graded higher, you know this coin will fit in any high ranking set on the Registry. Cert. Number 38521848 PCGS # 93374 00	
	177 2C 1867 PCGS MS65+ RD	Estimate: 2,400 00 - 2,600 00 USD
	UNDERRATED, though generally considered a common date, it certainly is NOT with a red designation. Needle sharp design elements. Fiery orange highlights grace red fields. Free of contact marks. Only under intense magnification can some faint fly specks be seen on the obverse. PCGS 30, NGC 9. Only 4 pieces grade MS 65+. Recent sale prices are \$2,400 in January 2018, \$2,950 in September 2018, and \$2,640 in July 2019. A hefty bid is in order. Good luck! Cert. Number 38521851 PCGS # 3593 00	
	178 2C 1864 LARGE MOTTO. PCGS PR66 BN CAC	Estimate: 3,500 00 - 4,000 00 USD
	Totally original and very high end grade. The eye appeal is amazing. Struck from the first year of this obsolete odd denomination. Delicate iridescent toning is dusted over smooth, glossy, evenly toned brown surfaces. The reflection is bold and very alluring. Sharply struck devices stand out, the eye appeal is great. PCGS 12, NGC 4, CAC 5. Just one PCGS PR66 BN CAC has ever sold in auction, realizing \$3,840 in June 2018. The current PCGS Price Guide value is listed at \$4,250 and the CAC CPG value is \$4,750. VERY RARE any finer in this designation, and in any other color category, this GEM will delight anyone working on a high grade set. Cert. Number 6055744 PCGS # 3621 00	
	179 2C 1866 PCGS PR66 RB CAC	Estimate: 3,000 00 - 3,500 00 USD
	WOW! What a great looking SUPERB GEM Proof! Everything about this beautifully toned example is off the charts! Incredible RED mirrors beam on both sides, dusted by a gentle iridescent blend of orange, gold, rose, and hints of olive patina. The devices are sharply struck and stand out against the icy smooth mirrored fields. Truly a wonderful example for a type or date set. Only 725 Proofs were struck. PCGS 22, NGC 14, CAC 15. Just a half dozen coins have graded finer at PCGS in the RB designation. We sold this beauty as an NGC PR66 RB* for \$3,878 in March 2019, which is more than the last two PCGS/CAC examples. In that same sale, we sold a 66+ RB for \$6,756. This coin will no doubt sell for a very strong bid, certainly in excess of the current PCGS value and CAC CPG values. Good luck! Cert. 	180 2C 1873 CLOSED 3. NGC PR66 RD CAM CAC	Estimate: 20,000 00 - 25,000 00 USD
	Without a doubt this AMAZING coin is among the absolute FINEST known examples of this PROOF ONLY final issue of this short lived series! Gorgeous, highly reflective RED mirrors beam from all over on both the obverse and reverse of this inspiring PQ GEM. The mirrors are brilliant and deep, and offer a bold contrast against the highly frosted reliefs. The eye appeal is exceptional, very rare to do these bronze issues come with full CAMFEO contrast on both sides. This presently offered SUPERB GEM offers high quality and exceptional eye appeal. PCGS 1, NGC 2, CAC 1. This coin has not been in auction, but Collector's Universe has a published value of \$33,000. The non-CAC PCGS graded example sold in our December 2017 Regency Auction for \$31,725. With this impressive GEM's great look and CAC approval, we think we will see very strong bidding from collectors! There is A LOT to love about this coin! Cert. Number 4668703 003 PCGS # 83653 00

A tiny break in luster is noted near the left of the date. PCGS 87, NGC 35, CAC 31. Just 11 pieces have been graded MS66+ at PCGS. We sold an example in December 2018 for \$2,420 and another sold in January 2020 for \$1680. This original piece will certainly garner a hefty bid. Cert. Number 37697766 PCGS # 3667 00

A simply stunning SUPERB GEM, a coin that ranks among the top half dozen examples of this date graded by PCGS and it is always a marvel to look at tiny jewels that have survived in such a stunning state of preservation. The eye appeal and technical qualities do not disappoint! Sharply struck devices, this coin has complete, bold definition to the design types, the dies are gently clashed and the reverse has a bisecting die crack. A soft, delicate iridescence attests to the originality of this SUPERB GEM. Pale blue, light gold, soft peach rose, and other pastel hues blend nicely on the satiny smooth superb surfaces. PCGS 2, NGC 1. No PCGS graded example has ever sold in auction. The only APR data we can provide for this marvelous coin is a PCGS MS66+ CAC that sold for \$9,664 we sold in May 2019 and a PCGS MS68 CAC that sold in June 2014 for \$64,625. The current PCGS Price Guide value is listed at \$21,500, and it would not shock us if this coin hammered at that level or more. Bound for a very high ranked PCGS Registry Set and will delight any specialist collector! Good luck, bidding will be intense for this exceptional coin. Cert. Number 38699529 PCGS # 3670.00

With just a single MS67+ graded higher, this lovely Civil War overdate issue is a SUPERB GEM survivor, tied for second highest graded at PCGS. Beautifully toned with totally original pastel iridescent hues. The reverse is especially vibrant, offering deeper blue and tangerine gold color. Both sides feature great definition to the design elements, and the satiny lustrous fields are immaculate below the rich toned surfaces. Ultra striking, this coin has a classic old collection look that will inspire anyone working on a set of the FINEST Mint State three cent silvers. The eye appeal is great. PCGS 25, NGC 19, CAC 8. The most recent example sold in our September 2019 for \$7,638 and it had a similar look. The current PCGS Price Guide value is listed at \$7,500 and the CAC CPG value is listed at \$7,880. This is an exceptionally high end quality GEM example from this low mintage year. Only 4,000 trimes were produced for circulation. This incredible survivor is bested by just a few examples at PCGS, but few can match this coin's originality and high end visual allure. Semi PL luster reigns on the obverse while the reverse is frosty. Sharply struck on both sides, the smooth and clean surfaces are awash in pastel pinks, greens, blues, and golds, which are particularly vivid when viewed in the light, especially on the obverse. The eye appeal is quite special, a very attractive and beautifully toned little jewel. PCGS 6, NGC 8, CAC 3. The last PCGS/CAC example sold in our December 2016 Registry Auction, where it realized \$13,513. The CAC CPG value is listed at \$14,500 and the current Collectors Universe value is listed at \$15,500. VERY RARE any finer, there are seven higher. Only 1,000 circulation strike trimes were produced in 1872 and they are, unsurprisingly RARE in any Mint State grade. Even in a modest grade like MS63 offered here, only two PCGS graded examples have sold in auction, ever! The present CHOICE example is richly toned with warm pewter lilac hues that are accented by satiny fields and dusted over the sharply struck devices. Graded long ago, this coin remains in an old green tag holder, and we are not sure why CAC did not bear this lovely coin. PCGS 4, NGC 7. The most recent one sold in the 2018 ANA auction for \$4,320 and prior to that, this coin sold way back in 2005! With Gems bringing five figures, this example is a great value for anyone looking for a totally original example. The Collectors Universe value is \$4,500 and we think that level might fall when this one sells. Good luck. Cert. Number 1585370 PCGS # 3693.00

This is a top flight SUPERB CAMEO Proof that ranks among the absolutely FINEST KNOWN examples of this early Proof date! An unbelievably high end GEM that has a great look and will fit in any world class collection! Wonderful, unimpaired, unmoisted watery mirrored fields have a bold, flashy reflection that really pops in a light. The clean, clear mirrors contrast against the devices on both sides and give life to the delicate gold and blue shades that adorn the essentially FLAWLESS surfaces. Only 800 Proofs were struck. PCGS 3, NGC 0, CAC 3. The current PCGS Price Guide value is listed at \$7,500. There is just a single coin graded finer in the designation, which is graded PR66+ CAM and has never sold in auction. This little jewel will certainly be at home in any world class set of Proof 3 cent silvers (we would know, our founder built the #1, #2, and #3 Registry sets, including the all time #1, the Legend Collection)! TERRIFIC EYE APPEAL. Blushes of peach and sky blue toning accent mirror like surfaces. Of the 600 Proofs coined this year, it's hard to imagine many that are prettier than this one! A tiny lint mark is noted near the 1 of the date and is only seen under strong magnification. PCGS 2, NGC 0. No recent auction records for this issue. Good luck on this one. Cert. This spectacular coin is a near miss Cameo as well as being VERY HIGH END! Above average mirrors beam boldly from all over. The mirrors are exceptionally clean save for a few strong die polishing lines (Mint made). The clarity and flash of the mirrors are way above average. There is some decent contrast. Miss Liberty and the details are frosted and are sharply struck. The eye appeal is fabulous! ONLY 700 were minted. PCGS 4, NGC 1, CAC 2. The other PR67 CAC sold back in August 2013 for \$8,8518. The current PCGS CAC Value is \$7,500. The coin offered here is totally fresh to the market. We do NOT see ANY examples of this date in any suffix ever offered. This coin will be a terrific addition to any GEM PR 3CN Set. Our sister company Legend Numismatics believes MS and PR 3CN's have sunk to levels too low. There is no guarantee they will go back up, but look at what you get: A GEM example of an obsolete coin that is over 100 years old for UNDER \$10,000 (in many cases UNDER \$5,000)! Cert. Tied for FINEST graded at PCGS, this is a beautiful PR67+ that is essentially pristine and in the finest possible state of preservation. The ultra smooth fields show off a bold, watery reflection on both sides. Light pastel iridescent toning accents both sides, and gives this a wonderful visual appeal as well as being of excellent technical quality. PCGS 2, NGC 0. NONE ARE FINER! Five years ago an NGC graded coin brought \$5,405 as part of the Gene Gardner Collection. The PCGS Price Guide value is listed at \$7,250. A top pop beauty that is the sole FINEST PCGS graded Cameo Proof 3CN for the entire series and a coin that is the definition of sheer, brilliant perfection! Stunning quality and eye appeal begins with the flawless mirrored fields and wonderfully frosted devices. The mint brilliance beams all over giving this SUPERB GEM a look that is peerless. WOW! PCGS 1, NGC 1. This does not appear to be the NGC graded coin that sold for \$9,600 in the 2019 ANA auction. The PCGS Price Guide does not list a value in this lofty state of preservation, so all bets are off. Good luck and prepare for intense bidding if you want to bring home this amazing coin! Cert. 	191 <u>3CN 1883 PCGS PR68 CAM CAC</u>	Estimate 8,000 00 - 10,000 00 USD
This is an old friend, a coin we sold as part of the Bubbabells Collection in December 2017, where we described it as: Here is a real prize for any collector of Proof 3 Cent Nickels or Proof type coins! This is the sole HIGHEST 1883 graded by PCGS (there are a handful of PR68s without CAM designation, and there are no PR68 DCAMS graded). Deep flashy mirrors are a marvel to behold. They are as sleek and smooth as a freshly polished piece of glass and even using a strong loupe they appear flawless. Every detail in Ms. Liberty's portrait is crisply embossed by an exacting, precision strike from the dies, and all the details are frosty. The devices really do stand out against the mirrored fields. The eye appeal is simply SUPERB and amazing! PCGS 2, NGC 7, CAC 1. This coin realized \$9,694 in December 2017 and the current PCGS Price Guide value is \$12,750. 	192 <u>5C 1867 NO RAYS. PCGS PR66 CAM CAC</u>	Estimate 3,500 00 - 4,000 00 USD
Truly a SUPERB GEM Cameo Proof example of this first year of the No Rays reverse type. One casual glance at this marvelous survivor and you know it has to be one of the FINEST graded, looking at the Population Report confirms your natural instincts! Deeply beaming mirrors are clean, clear, and sleek with a bold liquid reflectivity on both sides. The untuned surfaces gleam with a brilliance very rarely seen on Shield nickels, and the eye appeal is SUPERB. The razor sharp devices stand out with a thick frostiness that contrasts brilliantly against the depth of the mirrors. The eye appeal is off the charts! Only 600 Proofs were ever struck. PCGS 17, NGC 10, CAC 6. This one sold in the 2017 FUN auction for \$4,935, a price that confirms this coin's outstanding quality. You can disregard the other APRs, they are for inferior coins and note that just a single PR67 CAM is finer at PCGS in the designation. Worthy of a WORLD CLASS set. Cert. A pleasing dusting of pale, pastel iridescent toning over the satiny mirrors. Pristine quality on both sides, this coin has a beautiful eye appeal. Only 700 Proofs were struck. PCGS 24, NGC 4, CAC 5. There are just 2 graded PR67+ at the very top of the Population. The current PCGS Price Guide value is listed at \$5,000 and with only a non-CAC example having sold nearly four years ago, which was for a coin that did not have this coin's great looks. Boldly lustrous with full, swirling cartwheel luster that rolls smoothly and uninterrupted on both obverse and reverse. The brilliance highlights the vivid gold, rose, pink, teal, and orange hues that are truly a delight to behold. While Proofs with this kind of toning can be found from time to time, Mint State examples are extremely RARE. WOW! PCGS 8, NGC 5. A high condition census example of this very popular date. With the scarcity of Mint State 1886 nickels, many collectors of the past put Proofs into their sets, which increased the demand for them, especially for GEMS. This one is a gorgeous example, truly superb in every way, with deep watery reflective mirrored fields that have a lovely contrast with the frosty devices. There is a pale golden overtone dusted over the surfaces and the eye appeal is exceptional. PCGS 5, NGC 4, CAC 6. WOW! This coin is a BLAZER! Ultra deep black and white contrast is unbelievably strong, dazzling the eye! The depth of the mirrors is like looking at a midnight, starless sky. Additionally, there is tremendous clarity and cleanliness. The question comes to mind, what does PCGS want in order for a coin to merit a Deep Cameo designation, because this piece is as close as you can get. Eye popping eye appeal is credited not only to the amazing fields but also to the depth and breadth of the mint frost on the razor sharp devices. With just two coins graded higher in the designation, this is a superlative example worthy of a world class set. PCGS 23, NGC 11, CAC 21. There are 12 graded 67+ CAM at PCGS, but that number likely includes duplication. STRIKE LOVERS UNITE! Collectors of Buffalo nickels know, strike is everything! This coin delivers, big time! Needle sharp details on the Indian coupled with a bold date and LIBERTY fully separated from the rim, are only surpassed by the crispness of detail on the reverse. The hair on the bison's head and back and the fully split tail display all of the design elements to full advantage. If that weren't enough, the coin sports stunning mint bloom and luster. Subtle, but truly beautiful champagne gold, baby blue and soft rose toning accents add to the appeal. PCGS 173, NGC 53, CAC 25. A CAC approved example sold in August 2019 for \$1,620. What a great looking, totally original CHOICE Mint State example of this ever popular rarity. Scarce in all grades, it is RARE in any Mint State grade, and prohibitively so any finer. The peripheries are toned with gold, framing the shimmering silvery blue hued centers. For the variety, the strike is bold on both sides with sharp overall definition. The surface quality is very high end for the assigned grade, were it not for a few tiny flecks we would not flinch if it was housed in an even higher grade holder. For the specialist collector this is an amazing opportunity. PCGS 15, NGC 14, CAC 6. The most recent example sold in the 2018 FUN auction for \$45,600 and before that, this one sold for \$47,000 in November 2016. The current PCGS Price Guide value is \$47,500 and the CAC CPG value is listed at \$48,400. Remarkably rare any finer, we know this high end example will see for a strong bid. From our sale of the Maybach Collection, January 2019, lot 103, where it was described as: "This is a very eye appealing GEM example of this classic Buffalo nickel issue - one of the most famous issues in all of American numismatics. Highly lustrous surfaces beam from all over with a wonderful multi-colored iridescent pastel toning seen on both sides, especially on the obverse. Generally well struck, there is just a touch of the typical weakness known for the date, as the reverse die was worked over to take off some clashmarks. Indeed that is how this variety was created, when an overzealous filing with an emery board took off some of the clashmarks, as well as the Buffalo's right front leg. Generally visible only with a strong glass is a tiny cut and a few minor ticks on the reverse." PCGS 55, NGC 54. The current PCGS Price Guide value is listed at \$24,000 and this coin brought \$20,563. WOW! You have heard the term "moose" to describe amazing looking SUPERB GEM coins, well this is one of those where a buffalo is certainly a moose as well! Everything about this rainbow-toned monster is off the charts! While not a rare date, even in the ultimate grade, as they were saved in quantity as the last Buffalo nickel issue, rarely do they come with such a stunning array of color. Everything about this coin is special. Sharply struck and vibrantly lustrous, the surfaces are awash in a bold, seductive mix of pinks, golds, blues, greens, and oranges. Mother Nature really did some amazing art here. The color is really off the charts. PCGS 39, NGC 34, CAC 7. Monumental quality for this early Proof Buffalo. Only 1,514 pieces were struck and this stellar example is tied with the absolute finest known today. The currently offered PR68 is tied for FINEST graded at PCGS and it is a beautifully toned coin that is totally worthy of its lofty designation. The eye appeal is exceptional and it is a perfect combination of nickel blue to the centers and framed in varying shades of gold, yellow and crimson on both sides! The strike is bold throughout, as expected for a Proof, and this is the second style issued in 1913, with the straight and level ground. The original design was altered slightly after Mint officials realized the Type 1 with raised ground allowed the letters FIVE CENTS to wear down quickly, and vending machine owners believed the original design may be deemed a counterfeit by their machines. Thus as has been the case with several newly designed coins, changes quickly came about to appease various groups. The Buffalo Nickel design was created by James Earle Fraser, an artist from outside the Philadelphia Mint. Fraser took images of three aging chiefs and developed a composite portrait. The chiefs used were Iron Tail (Custer's opponent at Little Bighorn), Two Moons, and John Big Tree. The desired result was a Native American that could not be attributed to any one tribe. For the reverse Fraser used an American bison named Black Diamond, then living at the Central Park Zoo in New York City. PCGS 11, NGC 5. The most recent example sold for \$30,000 in October 2018, and the current PCGS Price Guide value is listed at \$35,000. NONE ARE GRADED FINER, making this a superb example for any set. We have long said that the Proof Buffalo nickel collection is a really neat project, a small number of coins that do come nice, in various grades, up to and including PR68. With some effort a world class set can be built. Let this be your Type 2 1913! Cert. Number 38670454 PCGS # 3990.00

One look at the provenance of this coin, and you know it has to be amazing. Previous owners of this coin include Gerry Forsythe, and Tom McCarroll, both of whom had/have insane Buffalo sets. It would not be wrong if this coin were to ever be in a PR69 holder (WE MAKE NO PROMISES). Killer deep mirrors beam intensely all over. You need Ray-Bans on to view the coin. A full MONSTER ring of neon like violet/green/gold hugs the peripheries and opens into sizzling lilac centers. Mother Nature could not have done any better. There are ZERO spots or imperfections to be found even using a strong glass. All of the details are sharply struck. The eye appeal is both memorable and jaw-dropping! PCGS 45, NGC 60. PCGS has graded only 2 in PR68+. There are actually 2 PR69's both of which are impounded in major collections. NO PR68+'s have ever been sold via auction. Folks, this is a masterpiece sent directly from numismatic heaven! If you LOVE toning or the VERY best quality, here you go. This coin has been to CAC. We do not know why it did not bean (we think it should have). We believe there will be an all-out bidding war here. See this coin in person, it is one of the ultimate Proof Buffalos! Cert. With the millions that were coined, one would expect more GEM specimens than the current population reports indicate! What we're saying is, this is a highly UNDERRATED issue and worthy of careful attention. Blazing, blast-white luster and brilliance. Flawless surfaces. PCGS 2, NGC 22. Here you have a 160-year obsolete coin in the nearly the ultimate condition. We doubt there are a dozen beamed in MS67+. Its not like you can go to every show or auction and buy one. We think the opportunity and potential here are amazing. Why sit with junk? This coin is well worth dumping the stuff for! Everything about this jewel is SUPERB. The surfaces are "beyond pristine" and stand up to the test of being examined with a strong glass. The obverse has a slight trace of semi-proof like mirrors. There is a decent luster that beams from all over. Both sides are a GEM original mix of moderate olive/reddish gold/pewter colors. Miss Liberty and the details are so sharply struck up you do not even need a glass to see them. The eye appeal is fantastic! PCGS 32, NGC 12, CAC 14. There are 18 graded MS67+, which we sold the last two, one in May 2019 for \$5,288 and the other in May 2018 for \$5,405. We love SUPERB GEMS like this! It is amazing that such a small coin can pack so much coin into such a tiny package. Boasting vivid, beaming mirrors on both sides, the surfaces are essentially as brilliant and flashy as the day it came out of the mint. Unimpaired by any kind of mishandling, this beauty has just a tiny touch of color at the reverse rim. Sharply impressed with a great frosty texture. The eye appeal is sheer perfection. Only 960 Proofs were struck. PCGS 3, NGC 6, CAC 7. The most recent example to sell in auction realized \$3,840 in October 2019. Bluntly struck on both sides about as sharp as the MS64 we sold in December 2019. The eye appeal is exceptional. PCGS 9, NGC 7, CAC 3. There is a wealth of blue/gray toning, similar shades to the uniforms that would fight over the city where this coin was minted just two years later. PCGS 13, NGC 2, CAC 4. Looking just at the obverse you would think that it is a blazing Proof striking with tons of pizzazz. Both sides are untoned, sharply struck and stand out with great quality. The heavily polished obverse die shows mint-made die polish lines. There is a single, solitary mark in the obverse field below the F in OF, the single post-mint flaw that we can find, even with the help of a strong glass. With an impressive visual allure, this GEM ranks among the absolute HIGHEST graded. PCGS 4, NGC 2. The only other example to sell was the Bob Simpson Collection coin which brought \$4,313 back in September 2010. The current Collectors Universe value is listed at \$5,500. BEAUTIFUL CAMEO contrast between razor sharp, thickly frosted devices and radiant, highly mirrored fields. A small mark on Liberty's thigh and one on the reverse are all that keep this coin from a higher grade. SUPERB. Just 800 Proofs were coined this year. Shrouded in numismatic interest, 1859 represents a transitional year for both the half dime and dime when the UNITED STATES OF AMERICA legend was replacing the stars obverse and new wreath design for the reverse was employed. An awesome error of a tough San Francisco Mint issue. STRUCK 20% OFF CENTER but retaining the full date and mintmark which collectors love to see! Thick, frosty luster is graced with some honey gold overtones. A faint scratch on the reverse above the E of DIME is noted for accuracy. An off center strike, measuring 10-30% is defined as a coin that was struck only partly between the dies and was struck either above or out of the collar. The struck part will show a partial strike and the unstruck area will amount to up to 30% of the overall planchet area. Generally the unstruck area will be strated which resulted from the sideways displacement of the planchet caused by the force of the strike. A prize for the error specialist! Cert. Tied for second FINEST graded at PCGS, it is a SUPERB example of this important KEY date! While a key date in all grades, it is also a major condition rarity! Boasting a brilliant, snow white luster, surfaces are exquisite and offer virtual perfection in preservation. Not even the tiniest ticks can be found to distract the eye, and the luster is full and fresh. The devices are sharp, the central band is fully split and rounded and Liberty's hair details are fully rendered with full, crisp definition. Essentially untoned, there is just a touch of very light iridescent, silver white tone attesting to its originality. The American economy took a short but sharp stumble in 1921 as the businesses converted back from producing war goods to peacetime activities. Farm prices fluctuated downward. These economic machinations dropped the demand for new coins so several dates saw much lower mintages than commonly seen in this era. This Denver Mint 1921 dime is destined to be a major highlight of an advanced collection and will certainly well represent this elusive issue as close to perfection as can be imagined. PCGS 28, NGC 13, CAC 9. There are a half dozen graded MS66+ FB. The last PCGS/CAC MS66+ FB sold in the 2019 FUN auction for \$50,400. The current PCGS Price Guide value is listed at \$32,500. This is a beautifully and UNIQUELY toned marvelous GEM 100% original, this pristine coin sat undisturbed in an old holder where it was able to acquire its delightfully rich mélange of color. Aside from the central band on the reverse, the details are sharply struck up. Bands of green, pink, gold, and other natural hues blend all over, giving this beauty a totally original and unique look. PCGS 8, NGC 7, CAC 8. The most recent example had a similar pallet of color, though in a different pattern, realizing \$1,020. Disregard the current PCGS Price Guide value, and bid according to the eye appeal and quality. Good luck! Cert. Number 38701520 PCGS # 5034 00		
	268 10C 1942/1-D PCGS MS63 FB CAC	Estimate 6,000 00 - 7,000 00 USD
This is a lovely CHOICE + example. Brilliant silvery surfaces on both sides accentuate the strongly defined devices on both sides. A bold, radiant on both sides enlivens a glowing, brilliant luster. Sharply struck design elements were keenly impressed from the dies, including the all important central bands. A couple of scattered contact marks confirm the grade, but the eye appeal is of a very high end example. PCGS 27, NGC 11, CAC 5. Imagine this, since its inception in 2007, not a single MS63 FB CAC has ever sold in auction. The Collectors Universe value is listed at \$7,500. Rare finer, this CHOICE Mint State example is bound for a great set. Good luck! Cert. Number 6621887 PCGS # 5041 00		
	269 10C 1938 PCGS PR67+ CAC	Estimate 650 00 - 750 00 USD
A piece that looks like it came directly from the original packaging and made it's way to PCGS for grading. RAD, ANT mirrored fields show a myriad of pastel indescent hues under magnification. There is an area of darker toning on the reverse in the right field. Devoid of marks. Just 8,728 Proofs were struck this year. PCGS 248, NGC 261; CAC 135. Recent transactions are \$676 in our October 2019 Regency sale and \$660 in January 2020. Could this coin grade PR68? Perhaps. Good luck with the bidding. Cert. Number 83768465 PCGS # 5073.00		
	270 20C 1875-S/S PCGS MS66	Estimate 3,800 00 - 4,000 00 USD
SECOND FINEST GRADED. Only an MS66+ beats out this coin for top prize. Scarce in this choice state of preservation, but additionally desirable due to the intriguing die variety. Remnants of the top of an 8 can be seen in the dentles beneath the 7. Additionally the mintmark is double struck. Undulating luster caresses silky smooth surfaces enhanced by wisps of golden color. Above average strike with full neck and wing feathers present. A couple die lines and striations are noted for accuracy. PCGS 1; NGC 0. No auction records for this grade at PCGS, just one NGC piece sold last year in February for \$4,320. A prize for the variety specialist. Bid liberally, they don't come much finer than this beauty! Cert. Number 38588203 PCGS # 5298 00		
	271 25C 1806 PCGS AU50 CAC	Estimate 4,000 00 - 4,500 00 USD
A lovely B-9. Totally original and of great collector grade quality, this AU has a bold eye appeal. Identified by the advanced die crack that crosses the obverse from the rim at the 1 in the date through to the base of F in LIBERTY. Dove gray silver surfaces show an underlying mint gloss that accents a delicate indescent tone. Sharply struck on both sides, the devices are bold and have a wonderful original look that will delight any type collector. PCGS 32, NGC 8, CAC 8. It has been nearly a DECADE since the last PCGS/CAC AU50 sold in auction. That coin sold for \$4,888. The current PCGS Price Guide value is \$5,250 and the the CAC CPG value is \$5,940. Worthy of a wonderful early type set, lots of collectors would love to build a set of coins that look like this! Cert. Number 5732252 PCGS # 5314 00		
	272 25C 1837 PCGS MS64 CAC	Estimate 8,000 00 - 10,000 00 USD
A condition census B-4b, defined by its dramatic obverse die crack. This boldly lustrous, semi reflective near GEM has a sensational, classic old collection look that is totally original and very high end. Sharply struck, the mint luster boldly radiates all over. A few light traces of contact under the obverse tone, light gold, olive, and tan hues come out in a light. What a great looking coin. Very high end, PCGS 28, NGC 27, CAC 8. Similar in visual allure to the AJ Vanderbilt coin, which was the most recent PCGS MS64 CAC to sell. That coin brought \$15,600 in March 2018. This appears to be the Gene Gardner Coin that sold for \$11,163 in October 2015. The current PCGS Price Guide value is \$10,000 and this one should bring that when it finally hammers. Good luck! Cert. Number 38675280 PCGS # 5356 00		
	273 25C 1859 PCGS PR65+ CAC	Estimate 4,000 00 - 4,500 00 USD
This is a totally original GEM Proof example. Early Proofs like this are usually seen in lower grades, and are rarely seen so fine. The fields of this beauty are wonderfully watery with a bold reflection that comes out from below a dusting of dappled azure and rose on the obverse. The devices are sharply struck up and frosted, the reverse shows a delicate band of gold at the rims, blast white mirrors and a near CAMEO look. Old lines are seen with the aid of a glass, but they are totally appropriate for the assigned grade and do not impact the amazing eye appeal. Only 800 Proofs were struck. PCGS 12, NGC 22, CAC 2. This is the ONLY PR65+ graded by either service and there are just seven coins graded finer. NO PCGS CAC PR65 has ever sold in auction. Indeed the only comp we can find is an NGC PR66 CAC that sold nearly five years ago for \$7,638. The current PCGS Price Guide value is listed at \$5,000 and this is a coin that would be at home in any exceptional set of Proof Seated Liberty quarters. Cert. Number 36777546 PCGS # 5555 00		
	274 25C 1883 PCGS PR67+ CAC	Estimate 5,000 00 - 6,000 00 USD
WOW! What a stunning looking SJPERB GEM that is tied for the FINEST graded at PCGS. Stunning bands of electric blue, rich purple, and golden tones are bathed on both sides. Flashy, highly reflective mirrors beam all over with a bold, watery texture that offers seductive clarity. Sharply struck on both sides, the devices are boldly defined. The eye appeal is exceptional, as you would expect for the FINEST of known specimens. There were 1039 Proofs struck. PCGS 13, NGC 14, CAC 9. There are 2 in PR67+ and NONE finer at PCGS. The other one is being offered on the market for \$9,750 and the color is clearly not as vibrant as the one on this one. The current PCGS Price Guide value is \$6,000 and This one has sold for as much as \$8,050 (back in 2010 when it was not a "+"). This is a very special coin and will see very strong bidding when it hammers down. What a GREAT type coin! Cert. Number 16753789 PCGS # 5584 00

UNDERRATED and a coin that needs to be seen in hand to fully appreciate the color and surface quality! Highly mirrored fields are richly toned in undulating hues of ice blue, dusty rose, tangerine and lemon yellow. No noteworthy marks, just a few small breaks in luster are noted. Just 972 Proofs were coined this year. PCGS 23, NGC 40, CAC 4. Just 4 pieces have received the coveted CAC designation out of 63 coins graded PR66 at NGC and PCGS combined! An example sold in March 2018 for \$2,040. If you want a CAC designated piece, this is your opportunity. Bid generously! Cert. Number 38160722 PCGS # 5680.00

This is another Barber quarter date in Proof that RARELY appears at auction, a coin that the population data makes seem way more common than it is. Glassy, watery mirrors gleam and are perfectly icy and smooth. Sharply struck and deeply toned, the eye appeal is wonderful and we cannot understand why CAC didn't sticker this one. Only 650 Proofs were struck. PCGS 22, NGC 24. The most recent PCGS graded examples to sell in auction were all CAC approved, with the last one to sell bringing \$3,643 in April 2017. None have sold since, and 2.5 years had passed since the one before that sold. The current PCGS Price Guide value is \$3,250 and only 11 have graded finer, and this one will truly delight any collector. Cert. Number 38709862 PCGS # 5695.00

This is not a date that often comes with bold contrast. Those that appear on the market are often "just made it" Cameos that you sometimes have to imagine the contrast. The present example is NOT one of those. Sharp, thickly frosted devices stand out against the deeply mirrored fields, that have a bold clarity, cleanliness and reflection. The eye appeal is sumptuous! Only 380 Proofs were struck. PCGS 11, NGC 11, CAC 10. There are six graded PR66+ CAM at PCGS and just six finer. We sold the last three of these in 2019, selling between \$5,170 and \$5,405. The current PCGS Price Guide value is listed at \$5,750 and the last PCGS PR67 CAM CAC sold in our October 2019 Regency Event for \$9,694. What a great coin for any high end set! They do not appear as frequently as you might think! Cert. Number 38588084 PCGS # 85700.00

A top shelf example that is TIED FOR FINEST GRADED. About 80% of a Full Head is present. MONSTER COLOR. Deep eggplant toning begins at the borders and gradually lightens to rings of aquamarine, violet, orange, and yellow. The luster is original and undisturbed and is graced by thick mint frost. Even with a loupe we could not see any contact marks or abrasions. PCGS 28, NGC 16, CAC 5. Only 5 pieces have been graded MS 67+ at PCGS. Auction prices for pretty toned examples are \$5,875 in April 2016, \$3,995 August 2016 and \$3,760 in February 2017. **279 25C 1924-D PCGS MS65+ FH CAC**Estimate: 5,500.00 - 6,000.00
USD

This is an ultra high end GEM example! We think PCGS was just a tad tight on this one, and it has a shot to go MS66 FH (no guarantees). Exceptionally sharp devices stand out boldly from a crisp, exacting strike. The radiating luster beams with a wonderful satiny glow throughout. Iridescent icy blue and soft, clear gold pastel tones give this stunning GEM a superlative look. The 24-D quarter is a striking rarity, rarely seen in the Full Head designation, especially in GEM or finer grades. Keep in mind that CAC is ultra tight on these! PCGS 62, NGC 29, CAC 5. There are just two MS65+ FHs graded at PCGS, neither of them have sold in auction. The most recent CAC approved MS65 FH was an NGC coin that brought \$8,700 in September 2019. There has not been a PCGS MS66 FH CAC sold since November 2014, which realized \$10,869. Ignore the price guide values, the quality and eye appeal speak loudly for themselves with this GEM and you will be delighted to add this one to your set. Cert. Number 38438426 PCGS # 5749.00

What a great looking example of this conditionally rare quarter! This one is a very high end and beautifully preserved SUPERB GEM. Tied for second FINEST graded by PCGS and is the highest graded that is endorsed by CAC. The 27-D is a well known condition rarity in the series, especially with fully defined head details. Shimmering, satiny luster glows in the fields and recesses of the design. The luster brings out the subtle touches of color that grace both sides, the reverse offering a very delicate pastel iridescent toning. The devices are wonderfully and deeply embossed by a forceful impression from the dies. Indeed, only a couple of the brads on the shield are not fully rendered. A strong glass fails to reveal any significant marks or lines. The eye appeal of this SUPERB GEM is amazing! PCGS 20, NGC 11, CAC 8. There are three in MS66+ FH and just a single MS67 FH finer. The current PCGS Price Guide value is listed at \$32,500 and the APRs are at \$32,900 and \$31,200 in May 2019 and April 2018 respectively. Bound for an amazing set of this beautiful and challenging series! Every time we look at it we just say WOW, and you will too! Cert. Number 38588083 PCGS # 5763.00

REFRESHINGLY beautiful! This date is often encountered with milk spots, dark, splotchy toning or other issues that inhibit the eye appeal. We can't stress how much this example is the complete opposite of those issues! Creamy luster and mint bloom accent well preserved surfaces. A tick on Washington's chin and one on the eagle's right shoulder are noted under powerful magnification. Faint hints of honey gold tone add to the eye appeal. Underrated in this lofty state of preservation. PCGS 331, NGC 97, CAC 74. Recent auction records are from July 2019 where an example sold for \$1,260 and another in December 2019 for \$1,417. A big spread in price to MS67 and this coin could see that grade, so bid liberally! Cert. Number 38301260 PCGS # 5790.00

Stone original and sporting UNSPOILED LUSTER. Toned in a pretty rainbow hued crescent on the obverse, with slight amber and soft gold reverse patina. A tiny tick on Washington's nose is noted under strong magnification. Of the 12.3 million coined, it is significant that this is one of the finest extant! PCGS 77; NGC 131; CAC 29. Of the 77 PCGS graded specimens, only 17 are MS67+. Recent sales of CAC approved coins were \$2,040 in August 2019 and \$1,320 in November 2019. A battle among Registry Set contenders is sure to ensue on this great coin! Cert. Number 37675852 PCGS # 5828.00

	283 25C 1945-S PCGS MS67+ CAC	Estimate: 1,500.00 - 1,600.00 USD
FATHOMLESS depths of luster are accented by a vibrant halo of fiery orange, sky blue and lemon yellow hues which graduate to a softer gold tone centrally. Immaculate surfaces. A companion piece to the 1945 D in the same grade, also offered in this sale. In fact, they look like they came from the same mint set. PCGS 86; NGC 160; CAC 33. Of the total population, PCGS has only graded 16 pieces as MS67+. Two auction records are noted June 2019 for \$2,650 and November 2019 for \$1,680. A generous bid will be required to secure this beauty! Cert. Number 37476774 PCGS # 5829.00		
	284 25C 1950-S PCGS MS67+ CAC	Estimate: 1,300.00 - 1,500.00 USD
This coin is MOOSE! The color is enough to make even the heartiest soul swoon! Intense crimson, royal blue, neon orange, lemon yellow and baby blue toning graduate across the surface in lovely rings of fire. The luster is spectacular and is not diminished in spite of the richness of the toning. Under careful inspection a mark is seen on Washington's cheek bone and a couple of ticks can be seen in the left wing detail. PCGS 144; NGC 230; CAC 56. Only 28 coins have been graded MS67+ at PCGS. We sold a pretty toned example in our September 2019 Registry Sale for \$2,703. Another piece sold in November 2019 (white) for \$1,080. The winning bidder will have to pay up in order to procure this beauty! Cert. Number 25236238 PCGS # 5844.00		
	285 25C 1951-D PCGS MS67+ CAC	Estimate: 4,000.00 - 4,500.00 USD
Among the absolute FINEST graded 51 D quarters, this frosty lustrous SUPERB GEM is sharply struck up and offers virtually untoned (we note a touch of color at the rims) and unmarked surfaces. Virtually perfect, the fields show no marks, flecks, or any other flaw to the naked eye. True Set Registry quality! PCGS 87; NGC 139; CAC 31. PCGS has graded 31 in MS67+ inclusive of duplicate submissions trying for the ultra rare 68 grade (pop 2). The most recent example with CAC approval sold in April 2019 for \$4,800 and we sold one in September 2015 for \$7,344. The current PCGS Price Guide value is \$5,000 and though neither MS68 has ever sold in auction, the Price Guide value is listed at \$15,000. This coin is a worthy contender for any top tier Registry Set. Cert. Number 38276893 PCGS # 5847.00		
	286 25C 1954-S PCGS MS67+ CAC	Estimate: 925.00 - 1,000.00 USD
Totally original and wonderfully toned, this 54 S quarter ranks among the FINEST, with just a single coin graded higher at PCGS. A stunning blend of color is brought out by a vivid mint luster. Ultra high end eye appeal, we love the look and quality. PCGS 119; CAC 292; CAC 57. PCGS has graded just 22 in 67+ and a single MS68 finer. The most recent examples sold in the \$840 - \$960 range and the current PCGS Price Guide value is listed at \$825. The MS68 sold for \$11,400 in June 2019. This is a great looking coin for any collector, whether those of toned coins or those putting away the best Washington quarters. Cert. Number 37223230 PCGS # 5857.00		
	287 25C 1957 PCGS MS67+ CAC	Estimate: 900.00 - 1,200.00 USD
Tied for FINEST PCGS graded, this exceptional quality SUPERB GEM stands out with an intriguing mélange of blue, violet, olive, rose, gold, and apricot hues that bathe both sides. Clearly this coin was lovingly cared for since it likely came from a Mint Set, where the original holder married with Mother Nature to impart the awesome palette of color. Sharply struck and magnificently preserved, the lustrous surfaces bloom all over! PCGS 300; NGC 471; CAC 80. NONE ARE FINER at PCGS. Two sold in December 2019 for \$960 and the current Collectors Universe value is listed at \$2,000. This one is truly exceptional and will realize a very strong price when the hammer falls. Good luck! Cert. Number 38699536 PCGS # 5862.00		
	288 25C 1959 PCGS MS67 CAC	Estimate: 1,200.00 - 1,400.00 USD
This coin looks like it came straight from an old time mint set, was handled with kid gloves, and sent directly to PCGS to be graded! The toning is STONE ORIGINAL and is intermingled in varying shades of amber, fiery orange, gold and ice blue over undiminished luster. A couple of tiny, well concealed tick marks are only noted under the power of a strong loupe. PCGS 28; NGC 76; CAC 15. A piece sold for \$1,440 in November 2018. Only 7 coins grade finer! Looking at the price jump to an MS67+ and knowing how nice this example is, we feel this coin will fetch a handsome price! Cert. Number 38710020 PCGS # 5866.00		
	289 25C 1964 PCGS MS67	Estimate: 800.00 - 900.00 USD
This SUPERB GEM has more to offer than just high grade, indeed, the assigned grade is nearly meaningless when the toning on both sides is viewed and admired. Beautiful colors dominate the obverse, offering a blend of deep purple and shades of gold and pink, while the reverse is framed by concentric bands of rainbow color. There is a single tiny mark on the obverse field that we are noting for the sake of full disclosure. PCGS 36; NGC 50. The current PCGS Price Guide value is listed at \$900, but with its absolutely stunning color this one will far exceed recent prices realized and published values. Good luck! Cert. 	290 50C 1794 PCGS VF35 CAC	Estimate: 16,000.00 - 18,000.00 USD
O-101. This is a very pleasing example of this first year of issue. Perennially popular in all grades, the 1794 half dollar represents the only larger silver coin obtainable by most collectors (any problem free, collector grade 1794 dollar is a six figure rarity). Evenly toned, with wonderful original dove and pewter silver gray hues over just moderately circulated surfaces. A few tiny ticks are seen scattered, mixed in with some minor planchet adjustment marks, none of which have any serious impact on the visual allure. Of the 23,464 half dollars struck in 1794, experts estimate approximately 600 survive in all grades, most of which show serious problems, extensive circulation, or a combination of the two. Attractive VF or finer examples, especially with CAC approval are always in strong collector demand. PCGS 25; NGC 21; CAC 8. The current PCGS Price Guide value is listed at \$22,500 and the most recent example sold in the 2020 FLN Auction for \$19,200. This very pleasing coin will see active and spirited bidding, and find itself in a fantastic type or half dollar collection when the bidding ends. Good luck! Cert. Number 25668134 PCGS # 6051.00		

	291 50C 1795 O-102. PCGS XF40 CAC	Estimate: 7,500 00 - 8,500 00 USD
This is a very pleasing CHOICE example for the grade. Pleasing and original with a rich olive-gray in the fields and a lighter silver-gray at the highest points. Sharply struck with bold central definition remaining despite the circulation, the surfaces are free of any flaw obtained during its use in early federal period circulation and the eye appeal is truly a delight to behold. PCGS 67, NGC 34, CAC 16. Going back to 2009, only a half dozen PCGS/CAC examples have ever sold, ranging from \$9,120 to \$12,925, the most recent selling for \$10,200. While the Collectors Universe value is held down by the non-CAC examples, listed at \$6,500, the CAC CPG value is \$11,900. This is an exceptional XF, fully choice for the grade and will be a real delight for any collector. Cert. Number 37215802 PCGS # 6052 00		
	292 50C 1806 POINTED 6. NO STEM. PCGS XF40 CAC	Estimate: 1,250 00 - 1,500 00 USD
This distinct Red Book variety is represented by just a single die pair, O-109, which happens to be the most common variety of the year. A great fact for anyone working on a set of Red Book varieties. The present coin was struck from a clashed intermediate die state, where some die cracks are noted, but the milling about the reverse is still intact. A pleasing example that shows light to moderate wear on both sides, and traces of original glossy luster that remains in the protected areas of the design type. Soft blue and dove tan patina on both sides. Cool die cracks are seen by the date and the stars are drawn to the edge. PCGS 59, NGC 13, CAC 17. The most recent example sold in a December 2019 Online Only Auction for \$1,600. The current PCGS value is listed at \$1,650 and the CAC CPG value is \$1,750. Pleasing, original examples are a ways in demand. Cert. Number 25030115 PCGS # 6073 00

An earlier die state of the O-109 than the coin above. Both sides have a wealth of remaining luster that has just a touch of friction in the fields and just a touch of wear on the high points. Well struck, the eye appeal is very nice for the grade. PCGS 34, NGC 7, CAC 8. The current PCGS Price Guide value is \$3,000 and the CAC CPG value is listed at \$3,750. The average APR for the four examples that have sold in auction is \$3,706. This coin is worthy of a neat type or date collection. Cert. Number 8720681 PCGS # 6073 00

O-107a. This is a very scarce, Rarity 4+ Overton number. Wonderfully russet pewter surfaces show just some light, problem-free circulation. Sharply struck overall, this is a very scarce 1806 variety that will delight any collector of Draped Bust half dollars. PCGS 21, NGC 2, CAC 6. Most recently selling for \$1,680 in February 2019, this coin should bring more today. The current Collectors Universe value is \$2,250 and the Knob 6, Small Stars is RARE any finer at PCGS. Cert. What a neat coin! It is an old friend we sold back in 2016, where we described it as: "Truly the definition of GEM AU! A beautiful super sder, a coin that in a previous generation would have likely been called 'BU'. A soft satin luster swirls on both the obverse and reverse. A swath of rich pewter slate blends with untuned silver and tinges of champagne proving originality." PCGS 22, NGC 21, CAC 9. This marvelous coin sold for \$5,640 in September 2016 and the current PCGS Price Guide value is listed at \$6,250. RARE any finer, especially in an totally original state of preservation. Cert. What a handsome near-GEM example! We have had the pleasure of selling this beauty once before, selling in our May 2016 Regency Auction, where it was described as: "A lustrous and well-preserved example of this easily identifiable O-103 die marriage. A bold strike, pleasing cartwheel luster shows an awesome champagne patina over both sides. This marriage is identified by three small die lumps on the reverse. Well struck and truly outstanding from an eye appeal standpoint." PCGS 68, NGC 69, CAC 14. This one brought \$5,875 and the most recent PCGS/CAC sold for \$10,800 in April 2019. The current CAC CPG value is \$6,250. Difficult to find any finer, there are just about three dozen graded finer, which like it includes duplication. This is a great type coin worthy of a strong bid! O-102. With just a touch of friction on the surfaces, this CHOICE AU early Capped Bust half dollar is a great representative of this popular overdate. Pleasing olive-tan, russet silver, and tinges of gray-gold are dusted across the generally problem-free surfaces. Accents of original luster come through the patina in the protected areas of the design. The visual allure will please any collector of this popular series. PCGS 19, NGC 9. The last non-CAC PCGS AU58 sold in auction back in the 2017 ANA auction, realizing \$3,290. Prior to that, one sold in April 2016 for \$3,878. The current PCGS Price Guide value is listed at \$4,000. This issue is quite rare in Mint State, adding demand for this neat overdate in high AU grades. Good luck! Cert. Number 3711043 PCGS # 6101 00

Ex D. Brent Pogue Collection; earlier ex James Bennett Pryor Collection. An outstanding, marvelous quality GEM that offers as distinguished a pedigree as it does technical and visual qualities. Bold mint luster radiates with a rolling cartwheel on both sides. The brilliance accents lovely toning in shades of gold, violet, and teal toward the periphery and an apricot-peach hue in the centers. Sharply struck up on both sides, the definition is bolder than usually seen for the type, full and crisp details are a delight to behold. A few tiny marks on the reverse will forever serve to identify this beautiful GEM. Among the FINEST KNOWN of the date, it ranks with the Eliasberg, Hawn, Queller, and McClure specimens that have been described as or graded GEM. PCGS 3, NGC 5, CAC 5. This coin sold for \$21,150 in the March 2017 sale of the D. Brent Pogue Collection and the current PCGS Price Guide value is listed at \$16,500. This is a beautiful GEM that we have had the pleasure of selling once before, as part of the DW Collection, sold in our October 2017 Regency Auction, where it was described as: "Love peripheral toning? Then you will LOVE this GEM! Rich mirrored fields superbly beam in the light and can be seen from across the room. Both sides are framed by a wonderful halo of original toning in rainbow hues. Well struck devices are highly frosted and provide a beautiful contrast against the rich mirrored fields. The eye appeal is high end and totally original." Only 800 Proofs were produced. From an original mintage of less than 750 thousand pieces, this borderline GEM Mint State 93 S ranks among the top dozen examples graded by PCGS. Offering an old-time collection look with brilliant satiny lustrous surfaces that have a blush of dappled toning that yield to an untuned silver center, indicative of storage in an old album. Indeed, all we see that keeps this coin from grading MS65 is a small side mark. This lovely, original album-toned coin will excite anyone working on a high ranking set, precious few are graded this high or better. PCGS 23, NGC 10, CAC 5. There are two coins graded MS64+ and just 9 coins graded higher. Neither MS64+ graded by PCGS has ever sold in auction, and no CAC approved MS64 or MS65 has sold in auction since 2016. The MS64 CAC sold in April 2016 for \$6,463 and the MS65 CAC sold in the 2016 ANA auction for \$15,275. 304 50C 1896 PCGS MS66

Estimate: 10,000.00 - 12,000.00
USD

A very intriguing GEM 1896 Barber half that ranks highly on the PCGS Population Report. The 1896 half dollar, despite a mintage of 950,000 is quite rare in MS65 or finer grades. At first glance, the highly reflective fields, especially on the obverse suggest a Proof striking. Indeed, the devices are sharply struck and the rims show a wire "fin", similar to that on Proofs. However, we have compared this coin to actual Proofs, and the definition of the central details on the obverse are clearly softer, the depth of strike in the hair curls, aureole leaves, and facial details are not as crisp. The reverse details likewise show some softness in the feather details. Both sides are richly toned and the eye appeal is truly special. The lustrous surfaces show full Prooflike reflection on the obverse, and semi-PL luster on the reverse. There are a few minor lines and ticks under the toning, none of which have an impact on the naked eye appeal and are only visible with the aid of a glass. PCGS 2, NGC 3. The last non-CAC PCGS MS66 sold nearly a decade ago, realizing \$9,775 and the current PCGS Price Guide value is listed at \$17,500. Just five coins have graded higher, three in 66+ and two in 67. This high grade and visually stunning example offers a lot to the advanced collector. We anticipate strong bidding on this beautiful coin. Cert. Number 38557441 PCGS # 6474.00

This extremely eye appealing Premium Quality GEM Barber half dollar is one of the very FINEST known of the date. A glowing, pearlescent luster blooms under a dusting of coppery orange gold color that is mixed with an earthy tan olive on the obverse. What a wonderful looking coin that has a sharp strike and very clean surfaces. This is truly a great example of the date or type. PCGS 4, NGC 0, CAC 3. There is just a single MS66+ finer at PCGS. The most recent example to sell in auction was the Formula 1 coin that we sold in the January 2019 Regency Auction, which brought \$8,519. A truly special modern rarity. One of the greatest non-error modern issues of the U.S. Mint and its greatness comes from the mystery of its creation. After the assassination of President Kennedy, officials at the mint rushed to create a numismatic tribute to him, thus ending the Franklin half dollar and the beginning of the Kennedy half dollar. Since the Franklin half dollar had not been in use for the required 25 years, an act of congress authorized the redesign. Indeed, just a few days after the events in Dallas, mint director Eva Adams had Gilroy Roberts, the Chief Engraver, to prepare models depicting the slain president. In January 1964, the first 1964 JFK halves were struck, amounting to a total production of over 429 million circulation strikes between Philadelphia and Denver and nearly four million Proofs. Somewhere along the line about a dozen specimen strikings were produced. These are clearly different in style to either those struck for circulation or Proofs. The devices on these specimens are sharply struck, with exceptionally bold definition in the hair and the rims are high up and fully squared and the fields show extensive die polishing marks in the reverse fields. The obverse details include a small line off the crossbar of the 4, a feature that has never been observed on any other 1964 half dollar, Mint State or Proof, showing that these dies were used for this small production and that is it. Whether these are die trials for the new design, or a bridge to the Special Mint Set pieces struck 1965-67, we do not know for sure. The first example of these specially produced half dollars appeared in Stack's June 1991 auction, where a full 1964 set with special prepared dies was offered in lot 591. What is suspected is that these sets were made special for Eva Adams for distribution as gifts or for herself, and were sold to New York dealer Lester Merkin sometime shortly before her death in August 1991 and his in June 1992. The remaining sets that he had purchased were sold in Stack's auctions from 1991 to 1995; a total of 9 sets made their way into the market that way. Today about a dozen Specimen 1964 half dollars are known, making this the RAREST of all JFK half dollars, and the rarest non-error modern coin of the U.S. series. Between PCGS and NGC there are 23 examples graded, which no doubt include crossovers, upgrades, resubmissions, etc. This spectacular coin is one of the two graded SP67+ at PCGS, the same grade as the D. Brent Pogue Collection coin, and is the median grade for PCGS graded specimens. The surfaces are brilliant with its unique satiny texture that sets these wonderful rarities apart from their Mint State and Proof counterparts. The eye appeal is exceptional, as evidenced by the QA GOLD sticker, which signifies the coin is undergraded in their opinion. There is a single minor mark on the ST of STATES, which will forever identify this important coin. PCGS 2, NGC 1. In the past couple of years, these have taken off, as Registry collectors have fiercely gone after the precious few that have appeared in auction. A PCGS SP67 sold in April 2019 for \$108,000 and an SP68 sold in the 2019 ANA auction for \$156,000. The current PCGS Price Guide value is listed at \$115,000, and it would not shock us if this SUPERB coin brought that or more when the hammer falls. Cert. Number 38574690 PCGS # 6844.00

What an amazing 1873-CC! Our sister company Legend Numismatics has handled the very best of these and they have viewed this magnificent FRESH coin and told us, for an MS63 there can be NONE finer. Virtually perfect surfaces do not reveal even the tiniest scrapes or problems. Even if you use a glass, you will find a few widely scattered microscopic ticks. A moderate luster beams all over (which is typical for the date). Both sides enjoy a totally original deeper pewter color. Miss Liberty and the details are well struck. We believe the reverse is what keeps this coin from a full MS64 designation. There are Mint-made adjustment marks on the Eagles' lower left leg. Overall, the eye appeal is fantastic. PCGS 22, NGC 7, CAC 2. PCGS has graded possibly 9 higher while CAC has beamed 3 higher. The last PCGS CAC MS63 to sell in auction brought \$32,900 in November 2014. The current PCGS CAC value is \$30,200. Legend Numismatics has seen the majority of 73-CC TD's that have been graded and have taught us well about the series. We would definitely recommend this coin over a few MS64's we have seen (NO CAC of course). A true quality 73-CC TD is VERY rare! SUPERB quality defined! This is a very high end example, worthy of the lofty PCGS grade and CAC endorsement. Sharply struck and fully frosted throughout the devices. Brilliant mint luster blooms with an exceptional vivid vibrance. Liberty's cheek is clean and smooth, free of distracting marks, and the fields show only a single minor tick or two. A pale golden blush over the reverse adds to the visual appeal. PCGS 405, NGC 599, NGC 177. There are 57 in MS67+ and just five currently graded finer. The current Collectors Universe value is listed at \$3,250 and the most recent example to sell as of this writing was in our December 2019 Regency Auction, a coin that realized \$3,173. Prior to that, two sold in November 2019 for \$2,640 and \$2,520. Only a single PCGS MS68 has ever sold, a CAC approved coin that brought \$37,600 five years ago in the 2015 FUN auction. This is a wonderful coin, worthy of placement in any advanced Morgan dollar set. Cert. Number 37812903 PCGS # 7162.00

High end and very brilliant. A frosted, satiny lustrous example of this common date dollar in an uncommon grade. Sharply struck devices stand out with a wonderful cleanliness. Just a minor tick on the cheek keeps this SUPERB example from an even higher grade. PCGS 656, NGC 947, CAC 316. There are 101 graded MS67+ at PCGS and just 15 finer. The most recent example to sell in auction realized \$1,704 in our December 2019 Regency Auction, and the current Collectors Universe value is listed at \$2,500. Note that in MS68, the Price Guide value jumps to \$19,500. This wonderful coin is worthy of a great set and will delight even the pickiest collector. Cert. Number 38263553 PCGS # 7166.00

This is tied for FINEST graded of this very popular overdate, a Top 100 VAM and important coin for any advanced Morgan dollar collection! Blazing brilliant mint luster blooms vividly on both sides. Untoned surfaces size with a radiating cartwheel that enlivens the top notch surface quality and superior visual allure. The devices are very sharply struck, with just a few minor ticks and traces of contact that can be seen with the aid of a powerful loupe. The eye appeal is very high end. PCGS 0, NGC 2. The other coin has been sold a few times since March 2018, realizing between \$8,100 and \$16,800. That coin is mottled, offering uneven toning on both sides. Since there are NO PCGS graded coins, there is no Collectors Universe value assigned, but the CDN bid is \$12,000. If you are working on the FINEST Morgan dollar set at NGC, you need this coin, don't let it slip away! Cert. Number 2671818.009 PCGS # 7174.00

This marvelous SUPERB GEM is tied with just one other coin, the famed Mills Clapp Eliasberg coin, as FINEST graded at NGC, and there is just a single coin graded this high at PCGS. Truly a MAGNIFICENT coin, this 88 O offers an impressive, swirling cartwheel luster that rolls brilliantly across both sides. Sharply struck up, the details are wonderfully rendered for a New Orleans mint Morgan, with just a touch of weakness just above Liberty's ear, a blush of rainbow iridescent toning crosses the obverse from about 9 o'clock to 2 o'clock. Pale blue and peach russet mingling with gold giving this coin a great, bag fresh look. Pale toning is dusted across the reverse, again attesting to the wonderful originality and adding much to the absolute SUPERB eye appeal. Nary a mark can be found anywhere, even with the aid of a very strong glass. A real prize for any Morgan dollar collector, while otherwise available, the 88 O is truly a MAJOR rarity so fine! We challenge you find another anywhere close to the eye appeal and grade of this important Morgan dollar. PCGS 1, NGC 2. Only the Eliasberg coin has ever sold in auction, appearing multiple times since it first sold raw in 1997, most recently bringing \$10,575 in April 2014. Since NO others have ever appeared in auction, we can state that this SUPERB coin is the FINEST currently available, and will see very strong bidding from anyone working on a world class Morgan dollar Registry Set. Good luck! Cert. Number 3754123 020 PCGS # 7184 00

**357 \$1 1894 PCGS MS65 CAC**Estimate 32,500.00 - 35,000.00

1894 is one of the most underrated dates in the Morgan Dollar series. Do not be fooled by the pops, these are hard to find in TRUE GEM, let alone SUPERB GEM. There are NO MS67's. We unhesitatingly rank this coin as SUPER HIGH END! Both sides are extremely clean, satiny, and smooth. There are NO marks of any significance. As an added delight, the surfaces are also boldly semi prooflike. You do not have to imagine the mirrors. A full booming luster brings out the silver white surfaces that have the faintest splash of gold. Miss Liberty and the details are fully struck and have light frost. The eye appeal is fabulous! PCGS 27, NGC 5, CAC 8. The last one to sell in auction brought \$36,000 in January 2020. Some lucky Morgan Collector now has an opportunity to add a very special coin to their collection or box of 20 Morgans. Good luck! Cert. Number 37664637 PCGS # 7228 00

A very pretty and colorful double sided toner. This lustrous and well struck example clearly sat in a paper envelope, which imparted subtle gold, rose, olive, and powder blue that coats both sides. Vibrant accents of magenta and aquamarine burst from near the rims in spots, adding much to the eye appeal. PCGS 246, NGC 66, CAC 80. The most recent example to sell was an untuned satiny Gem that brought \$1,998 in our December 2019 Registry Auction. This coin has previous auction records that go up to \$3,055. A very PQ coin that will fit nicely in any collection of toned dollars. We expect strong bidding for this beauty. Cert. Number 25282269 PCGS # 7240 00

A PQ SUPERB GEM that is tied for second FINEST graded! Incredible quality for the date, which is rarely seen in MS67 or finer grades. Despite a large mintage, compared to other dates, the population is quite low. Fewer than three dozen have graded MS67 or finer, just two are graded higher than this one, both MS68. Brilliant, satiny mint luster radiates boldly over the ultra smooth, clean surfaces. Totally original, there is a pearlescent luster in the centers, framed by gold, blue, and rich orange color at the obverse periphery. Nicely struck with just a touch of typical softness to Liberty's curls above her ear. Clearly this coin has been cared for since it left the mint. Boasting a classic, old time collection look, the eye appeal is excellent! PCGS 33, NGC 12, ACAC 7. Only 3 are graded MS67+ and there are 2 MS68s graded higher. The last MS67+ was a white coin, selling for \$20,400 in September 2019. The current PCGS Price Guide value is listed at \$22,500 and the last MS68 sold well over a decade ago. This is about as fine as you will ever hope to own and will see very strong bidding. Bound for a very high end and high ranking PCGS Registry Set. Cert. Number 38032773 PCGS # 7250 00

A gorgeously brilliant SUPERB GEM that is dripping with mint luster, radiating cartwheels swirl over both sides. Sharply struck devices have a nice frost and stand out against the lustrous surfaces. Some soft white iridescence can be seen at certain angles in the fields. The surfaces are clean, free of any distracting marks of any kind that can be found anywhere, even with the aid of a powerful glass. VERY RARE finer. PCGS 116, NGC 18. Going back over the last year, a dozen examples have sold in auction, realizing between \$1,680 and \$2,880. The current Collectors Universe value is listed at \$3,000. Just 18 coins have graded finer at PCGS, all MS67+, and keep in mind that little "+" nearly triples the Collectors Universe value. This SUPERB coin will see strong bidding. Good luck. Cert. One of the most common dates in the Morgan dollar series thanks to treasury releases in the 1950s and 1960s, it remains quite challenging to find in MS67, and there are NONE graded finer than MS67+. Sharply struck, unlike many of this date seen, the details are all wonderfully rendered, with Liberty's curls fully and sharply formed; her cheek smooth and delightfully rounded. Certainly original, the reverse has a blush of iridescent pewter silver with pale silver and gold accents. A high grade coin that boasts nice eye appeal. PCGS 122, NGC 77. Over the last year, ten examples have sold in auction, averaging at \$2,387 and the current PCGS Price Guide value is listed at \$3,250. Just nine coins are graded MS67+ finer, on only one of which has ever sold in auction and the Price Guide value is \$12,000! This coin has a lot to offer the collector who wants one of the highest graded. Cert. Number 25657552 PCGS # 7266 00

Ex NFL Set as noted on the holder. This is a sharply struck example of this conditionally elusive date. Every detail is crisply rendered, the hair curls fully separated, the eagles' feathers nicely defined. The surfaces are generally clean, free of all but the most insignificant scattered tick or line that can be found anywhere. The cheek is nicely frosted and is exceptionally clean. A light dusting of iridescent tone is all that keeps this SUPERB coin from being untuned. The eye appeal is very nice. PCGS 64, NGC 20. While the most recent example brought only \$4,320 in December 2019, we sold one in May 2019 for \$6,756. The current Collectors Universe value is listed at \$5,500. Just four MS67+ examples are graded finer, making this coin great for any Morgan dollar set. Cert. Number 13664004 PCGS # 7278 00

	363 \$1 1903-O PCGS MS67	Estimate: 3,700.00 - 3,900.00 USD
	Pristine fields are accented by stunning brilliance and a pleasing satin texture. A SUPERIOR GEM with blazing white luster and a razor sharp strike. Close scrutiny exhibits no marks of significance. At one time this date was considered one of the rarest in Mint State condition, prior to the release of a hoard by the US Treasury in the 1960s, PCGS 120, NGC 55. Two recent auction records have an example selling in our Regency Auction 32 in April 2019 for \$2,703 and another in June 2019 for \$4,800. Cert. Number 38709869 PCGS # 7286.00

	Thick as frosting MINT FROST graces not just the razor sharp devices, but the satiny textured fields as well. Housed in an old green label holder. Nicer than most pieces grading MS65+ or 66. Just a couple of minute contact marks on Liberty's face that you need a strong loupe to see are noted for accuracy. PCGS 381, NGC 107, CAC 41. We sold a CAC example in our Regency 35 sale in December 2019 for \$2,115. Expect aggressive bidding on this conservatively graded piece! Cert. Number 2393520 PCGS # 7290.00	
	365 \$1 1904-S PCGS MS64 CAC	Estimate: 4,000.00 - 4,400.00 USD
	Here is a lustrous CHOICE example of this conditionally challenging issue. While over 2.3 million were struck, very few survive in GEM grades, putting strong demand on MS64 examples. Nicely struck overall, with frosty details and just a smattering of contact seen on either side. Strong, swirling mint luster with bold cartwheels on both sides. Brilliant and pleasing, this is a great example for the date. PCGS 461, NGC 226, CAC 76. The most recent PCGS/CAC example sold for \$4,888 in November 2019; prior to that, one sold for \$5,760 in July 2019. The current PCGS Price Guide value is listed at \$4,850 and the CAC CPG value is \$6,000. Quite scarce any finer, and downright RARE above MS65, this MS64 with CAC approval is a great coin for any Morgan collector. Cert. Number 38160194 PCGS # 7294.00	
	366 \$1 1898 PCGS PR67+ DCAM CAC	Estimate: 36,000.00 - 40,000.00 USD
	This coin is a real highlight of a SUPERB GEM! Absolutely one of the highest graded examples we have offered in auction, and the eye appeal is very bold. It looks like a modern reproduction rather than an original, deeply reflective, essentially perfect 122 year old Proof! This coin is spectacular! This coin is awesome in every possible way. The mirrors are endlessly deep and beam relentlessly from all over. The mirrors are incredibly clean and clear. The flash nearly blinds you. When you twirl the coin, the mirrors roll like fresh liquid mercury. Miss Liberty and the details look like they were sculpted from a fresh block of ice. Every minute detail stands out. We think one incredibly tiny line is all that kept this coin from a bean and/or a higher designation and a bean. There really is nothing wrong here. The eye appeal is out of this world! Only 735 Proofs were minted. PCGS 18, NGC 16, CAC 6. There are 4 graded PR67+ DCAM and just three finer. The last PCGS/CAC example sold in our February 2016 Regency Auction for \$39,950. The current PCGS Price Guide value is listed at \$40,000. None finer have ever sold in auction, making this about as fine as you can ever hope to find in auction. Terrific eye appeal. PCGS 918, NGC 1,408, CAC 293. One of only 89 coins graded MS66+ at PCGS. We sold a CAC example in our September 2019 sale for \$1,351 and another example sold in January 2020 for \$1,680. Expect aggressive bidding on this pretty, toned piece. Cert. 	368 \$1 1926-D PCGS MS66+ CAC	Estimate: 9,000.00 - 10,000.00 USD
	Impeccable and unimpeachably high end! This borderline SUPERB GEM is razor sharp in strike and the surfaces are uber smooth. Brilliant and lustrous, this lovely coin is blast white and offers only the most amazing eye appeal; we love the look. PCGS 319, NGC 104, CAC 81. PCGS has graded 33 in MS66+ and a mere eight finer. As of this writing, the most recent example brought only \$7,261 in the 2020 FUN auction, while the month earlier we sold one for \$11,750. The current PCGS Price Guide value is listed at \$13,500. Keeping in mind that nearly five years ago the last PCGS MS67 CAC sold for \$47,000, this exceptionally well preserved and PQ 26-D seems a bargain in comparison! Cert. Number 38338907 PCGS # 7368.00	
	369 \$1 1926-S PCGS MS65+ CAC	Estimate: 1,200.00 - 1,500.00 USD
	This is a brilliant, untoned, lustrous GEM example of this popular date, sharply struck up and the surfaces are quite smooth and clean. The vivid luster beams all over. PCGS 806, NGC 382, CAC 131. There are 50 in MS65+ at PCGS. The two most recent examples to sell in auction realized \$1,380 and \$1,320 and the current PCGS Price Guide value is listed at \$1,500. Take note: the last PCGS MS66 CAC sold for \$5,288 in our December 2019 Regency Auction. The eye appeal is excellent and this one should bring a strong price. Cert. Number 25247642 PCGS # 7369.00	
	370 \$1 1928 PCGS MS65+ CAC	Estimate: 5,500.00 - 6,500.00 USD
	The 1928 is the lowest mintage in the series, and the key date in all grades. Though available in all grades to MS65, it becomes quite difficult to find in MS65+ or finer. Sharply struck and stark brilliant silver white surfaces have an impressive satiny bloom that delights the viewer. A tiny tick on the reverse is the only flaw we can find, and only using a strong glass. Wonderfully eye appealing, this coin would fit into any wonderful Peace dollar set. PCGS 417, NGC 104, CAC 76. There are 35 in MS65+ and fewer than two dozen graded higher. The most recent example to sell in auction (at the time of this writing) brought \$6,463 in our December 2019 Regency Auction. The current Collectors Universe value is listed at \$8,500 and this one with its excellent eye appeal will sell for a strong bid. Sharply impressed from a crisp, bold strike, the surfaces are satiny with a rich frost. The eye appeal is high end. PCGS 360, NGC 74, CAC 106. There are 90 graded MS66+ and NONE FINER. There is a wide range of APRs, the ten most recent brought from \$3,643 to \$8,225, for an average of \$5,713. What an important coin for anyone working on a top tier set. Cert. A truly brilliant, exceptionally well-preserved GEM example of this final year of the Peace dollar series. A full, rolling cartwheel luster flows brilliantly over the magnificently preserved surfaces. The fields are satiny smooth and virtually flawless and the sharply rendered devices are frosty and have a likewise essentially pristine look. The eye appeal is high end and this is tied for second finest graded. PCGS 221, NGC 63, CAC 54. There are 28 in 66+ and just 3 finer. The current Collectors Universe value is \$12,000 and the average APR for the 6 PCGS/CAC examples that have sold in auction is \$11,186. Also, none of the MS67s have ever been approved by CAC, so if you demand all CAC approved coins, you will not find one numerically higher. The bidding will be as intense as the luster for this one! Good luck. Cert. Number 38580663 PCGS # 7379.00

This is the ULTIMATE copper nickel clad like dollar that exists! Despite being a modern series, this is the ONLY MS68 example graded by either service of ANY date, 1971-78. These were struck from shallow, low relief dies, which have many wide open expanses of open space in the design, which were open for many contact marks. While 40% silver clad like dollars are plentiful in lofty grades, thanks to being struck and placed in collector packaging, those struck for commercial use were not. Even in MS67 most dates are either unknown or extremely rare, making this the FINEST for type purposes. Lustrous, clean surfaces beam with a brilliance that enhances gorgeous toning on both sides. Sharply struck devices stand out boldly. The eye appeal is SUPERB. As this series is about to celebrate its half-centennial next year, we suspect interest will grow and this exceptional quality coin will elevate any type or specialized set to another level entirely! PCGS 0, NGC 1. There are no comparable prices or price guide values, to the collector who demands the absolute FINEST, bid away! YOU WILL NOT FIND ANOTHER! Good luck! Cert. An impressive GEM Cameo Proof Indian cent that makes us scream WOW. This coin really pops, both sides are exceptional in every way. Deeply beaming copper mirrors have a deep, beaming flash that captivates the eye from across the room. The contrast is bold, visually stunning, imparted by thickly frosted and sharply defined design elements. A dusting of iridescent toning can be seen at certain angles, and a tiny fleck or two can be detected with a strong glass, but none of this impacts the excellent eye appeal. Only 600 Proofs were struck. PCGS 1, NGC 0. There are just five coins graded finer. The most recent PCGS graded PR65 CAM had a CAC sticker and sold for \$6,600. In 65+ CAM, the Collectors Universe value is listed at \$7,500. It would be hard to find another that comes close to the eye appeal of this impressive coin, regardless of price. Cert. We love this coin! It is an old friend, having sold in our May 2018 Regency Auction, lot 376, where we described it as: "This is a SPECTACULAR GEM Proof! Extremely deep mirrors beam with a superb mint RED brilliance. Sharply struck with fully frosted devices that contrast wonderfully against the ultra deep mirror reflection!" Only 600 were struck. PCGS 5, NGC 0, CAC 5. This is the ONLY PR65+ RD CAM, selling for \$10,869. The current PCGS Price Guide value is listed at \$12,500. What a great looking GEM! Flashy reflective mirrored fields are toned with a lovely olive green, and blue-tinged pewter silver that shimmers with light golden. Sharply struck with nicely frosted devices that stand out against the watery texture of the fields, the eye appeal is excellent. Only 600 Proofs were struck. PCGS 20, NGC 5, CAC 8. This is the coin that was in Gardner IV, October 2015, lot 98069, earlier ex Stack's October 1995, lot 160. In October 2015, this coin sold for \$3,525, the same as we sold one for in June 2019. What an incredible quality SUPERB GEM, tied for FINEST graded at PCGS, and comparing with the other examples, this one may well be the FINEST. Deeply mirrored fields reflect brilliantly and vividly with a bold clarity, which contrasts wonderfully against the thickly frosted and well struck devices. A bush of pale golden tone gives this coin a depth and character to the eye appeal that is unbeatable. Truly a marvel of the issue! Only 600 Proofs were struck. PCGS 15, NGC 4, CAC 13. There are a total of 6 on the PCGS Population Report in PR66+ DCAM and NONE FINER. The last one we sold brought \$4,465 in our May 2018 Regency Auction. Shortly after another sold for \$3,360 in the 2018 ANA auction, the present coin has a better visual quality than those two, and should bring a strong price. What a high end quality and visually wonderful SUPERB GEM example of the date, one of the FINEST three examples graded. The mirrored fields are deeply beaming with bold nickel silver, almost chrome-like reflection. Razor sharp, thickly frosted devices provide a high end cameo contrast, which ranks on the borderline DEEP CAMEO classification. The eye appeal is off the charts and it would be impossible to find a FINER example! Only 600 Proofs were struck. PCGS 19, NGC 18, CAC 16. There are 3 graded PR66+ CAM and NONE HIGHER at PCGS. The most recent example to sell in auction was the Trzaska Collection coin that brought \$11,163 in our December 2019 Regency Auction. What a beautiful and stunning GEM Proof! Intensely deep mirrors beam boldly from all over. The mirrors are crystal clear and are super clean. Even when using a strong glass at most all you can see is a partial line. When you twirl the coin, the mirror have that "watery" roll. The contrast is incredible! There is some gorgeous original reddish gold colors hugging the rims only. Miss Liberty and every detail are pinpoint sharp in strike and are bathed with frost. The eye appeal is jaw dropping! PCGS 2, NGC 0, CAC 2. The last one of these sold for \$4,500 and had NO CAC bean back in 2015. We strongly disagree with all published prices for this coin. We'd bet looking like this there will be strong bidding by multiple bidders be prepared! Cert. Number 32486816 PCGS # 94451 00

What a splendid GEM Proof dime! Deep blue and rose toned dominate the highly reflective surfaces giving this coin a great look. High end quality is exemplified by essentially PRISTINE surfaces that lack any hairlines or any issue. The colors are bold and vibrant, not dark to obscure the amazing mirrored fields. Every detail is sharply struck up with a nice frost that contrasts against the fields. Clearly one of the FINEST graded. Only 600 Proofs were struck. PCGS 6, NGC 4, CAC 6. This is the ONLY PR66+ CAM graded at either service, and just three have ever graded higher. This coin has been sold twice before, realizing \$4,465 in its June 2016 (most recent) appearance. The current PCGS Price Guide value is listed at \$5,750. Keep in mind that the last time a PR67 CAM sold it brought nearly \$13,000! Good luck. Cert. Number 29608930 PCGS # 84761 00

Amazing contrast! One of just two coins that PCGS has assigned the DCAM designation to! Deeply, boldly reflective mirrored fields are wonderful to behold. They really have an essentially GEM quality clarity and smoothness that really needs to be seen in hand to fully appreciate! Both sides display a few minor lines, none of which are distracting to the overall eye appeal. Only 60 Proofs were struck. PCGS 1, NGC 0, CAC 1. This coin has never sold in auction, and is unlisted in the PCGS Price Guide value. The only other DCAM is a PR66 DCAM that sold for \$12,925 in April 2016. Ex Simpson Collection. This magnificent GEM previously resided in the Simpson Collection, one of the finest coin collections ever built. Its incredibly deep mirrors boom from all over with tremendous clarity and blinding reflectivity, revealing only the lightest of lines visible only at certain angles with a strong glass and bright light. There are subtle bands of deep royal blue/violet by parts of the upper rims. Miss Liberty and the details are fully struck and have thick, booming indolent white frost. Hypnotic eye appeal, expect to get lost in the deep, glassy mirrors! Only 600 were struck. PCGS 3, NGC 0. We had the pleasure of selling this coin back in December 2015, where it realized \$5,758. More recently one sold in November 2017 for \$6,600 and the current PCGS Price Guide value is listed at \$12,500. Just two are graded finer at PCGS, neither have sold in nearly a decade. One of the FINEST of the date with a fantastic pedigree! Cert. Number 25643155 PCGS # 86426 00

What a stunning, original, GEM Proof 1868 silver dollar. This PR65+ is worthy of its high grade and CAC approval. Strong, bold, reflect on has a bold, watery texture in the fields, smooth and without any serious flaws of any kind. Sharply struck devices stand out. A lovely opalescent toning blends with indolent hues on both sides which give this impressive, beautiful coin a stunning look. One of the FINEST seen at PCGS, there are only five graded higher. Only 600 Proofs were struck. PCGS 16, NGC 22, CAC 4. This is one of three so graded. The last PCGS/CAC PR65+ sold in August 2015. Keep in mind that a PCGS PR66 CAC sold back in the 2010 ANA auction for \$25,300. Cert. Number 28172713 PCGS # 7016 00

**384 1884 Proof Set (7 coins)**Estimate: 10,000.00 - 11,000.00
USD

Legend and Legend Auctions have always had a deep love for matched original Proof sets. We consider them to be the final frontier of numismatics. To have an original matched set that has been together for over 100 years is incredible. This is the epitome of a matched set. You do not have to have to imagine if the colors match, they clearly do. The overall quality is HIGH END while the eye appeal is pretty. We cannot say we see this date at all. We do not remember handling one in years. The mintage of this set is 875. We'd guess maybe 10-25 sets if even still exist intact. 1C PCGS PR65BN CAC. A GEM original coin. While its mostly brown you can see other colors when you twirl the coin. CAC pop 17. CAC value: \$455. 3CN PCGS PR66 CAC. Technically this coin should be a PR66+. All we can find is one old small tick. The rest of the coin is perfect. This has a golden brown hue. CAC pop 45. CAC value: \$598. 5C PCGS PR65 CAC. Lightly toned in a golden brown hue. The mirrors are clean and still have some flash. No problems here. CAC pop 31. CAC value: \$500. 10C PCGS PR65 CAC. Only one old lint mark visible. The services are pretty much perfect. Like the others this coin is evenly toned. CAC pop 12. CAC value: \$975. 25C PCGS PR66 CAC. Very clean and flashy mirrors. The toning is equal to the other coins. This is a really nice GEM! CAC pop 10. CAC value: \$1,880. 50C PCGS PR64+ CAC. We think just a few light lines robbed this coin from being a PR65. It sure has the look. The color matched to the others. CAC pop 8. Collectors Universe Value: \$2,150 (CAC does not have values for + grades so we'll use regular PR64). \$1 1884 PCGS PR64 CAMEO CAC. We will not allow a coin like this to be plucked from a set like this. It is really high end and have some really cool eye appeal. This coin also offers the most powerful mirrors (they do have that killer watery roll) of any coin in the set. NO question this coin is part of the set. CAC pop 9. CAC value: \$4,500. The total CAC value is \$11,058, but this is with no published value for the 50C 64+ (we used a regular PR64). You can go offer \$25,000 and you most likely will NOT find another matched original set as nice as this. Both Legend Auction and Legend Numismatics fee strong the potential of a set like this is unlimited! Congratulations in advance to the winning bidder! PCGS # 0

**385 GS1 1903 LOUISIANA PURCHASE. MCKINLEY. PCGS MS67+**Estimate 4,000.00 - 4,500.00
USD

Tied for second finest graded at PCGS. Clearly a high end and fabulous quality SUPERB GEM. Brilliant golden luster oozes all over the surfaces on both sides. Every tiny detail is struck up with full precision and is exacting in its definition. Even the tiny mint made die polish lines are visible in the fields, suggesting an early striking before they wore off the surface. Although 125,000 were initially authorized, the reported net mintage is listed at 17,500 and the remaining pieces were melted due to poor sales. PCGS 17, NGC 6. Just three are graded finer at PCGS, all MS68. There is a wide range of APRs, from the \$4,000 to \$8,000 range and the Collectors Universe Price Guide is listed at \$7,000. Just a single MS68 sold in auction, nearly four years ago, realizing \$25,850. Be prepared for strong bidding. Good luck. Cert. Number 38393501 PCGS # 7444 00

386 \$50 1915-S PANAMA-PACIFIC ROUND. PCGS MS64 CAC

Estimate: 100,000.00 - 110,000.00 USD

What an impressive coin. When you hold it and feel its weight while checking out its great qualities you probably will have tingles running down your spine. Yes, this coin is HIGH END! Immaculate surfaces are super impressive. The ONLY fault we could find (and it took a strong glass and lots of looking) is a small possible thin line or even cut (?) on the head. It is invisible to the naked eye. The surfaces are smooth. A very decent and easy to see luster beams from all over. Both sides are a GEM original Pan Pac gold color. There are NO spots or discolorations. All of the details are very well struck. The eye appeal is super! PCGS 98, NGC 151, CAC 39. The current PCGS CAC value is \$145,200 (which we think is too high as they seem to sell between \$105,000 and \$120,000 in auctions). Do NOT be fooled by the pops, PCGS CAC Rounds in MS64 do not pop up in any frequency. Opportunity knocks loud if you always wanted one! Cert. Number 38150977 PCGS # 745100

387 \$50 1915-S PANAMA-PACIFIC OCTAGONAL. PCGS MS64 CAC

Estimate: 105,000.00 - 115,000.00 USD

This is a terrific example of one of the most popular coins in all of numismatics. The quality here is HIGH END and undeniable. There are no serious issues to be found anywhere. Overall, the surfaces are clean and smooth. It's really a lot of fun to look over these big beautiful coins. The luster is typical and is decent. Both sides are a totally original Pan Pac gold color. There are NO spots or discolorations. The details are well struck. The eye appeal is very nice! JUST 645 are minted. PCGS 134, NGC 157, CAC 49. The last PCGS CAC piece to sell in auction brought \$120,000 in April 2018. In that same sale, another brought \$117,000. The current (and NEW) PCGS CAC price guide shows a weird number of \$119,200 for its value. The popularity of these big coins never seems to fade. Be prepared, we expect multiple strong bidders here! 388 \$G\$1 1922 GRANT, NO STAR. PCGS MS67+ CAC

Estimate: 7,000.00 - 7,500.00 USD

Only 5,000 Grant gold dollars without the star were struck and this one ranks as one of the FINEST graded, just a single MS68 has ever graded finer at PCGS. Stunningly original and boldly lustrous, this SUPERB coin is the quintessential example of the type. Radiant satin luster gleams with a vibrant sheen on both sides, which glows around the sharply struck up devices. Creamy golden surfaces are especially clean and pristine with a wonderful deeper orange-rose hue that attests to the complete originality of this ultra high end example. VERY RARE at this lofty state of preservation and UNIQUE any finer. PCGS 191, NGC 132, CAC 63. PCGS has graded just a dozen in MS67+ and a single MS68 finer. It has been three years since the last PCGS/CAC example sold in auction, realizing \$8,225 in the 2017 FUN auction and another sold for the same amount in April 2016. The one 68 has never appeared in auction and would bring \$20,000 or more if it did! Good Luck! Cert. Number 38393413 PCGS # 745800

389 \$G\$1 1855 PCGS AU55 CAC SSCA

Estimate: 2,800.00 - 3,200.00 USD

EX U.S. CENTRAL AMERICA. From the second recovery of gold coins from this famed shipwreck. While in this second round many double eagles were salvaged, small gold coins, many of which were earlier issues appear to have been what the ill-fated passengers and crew were carrying with them. LRCA is pleased to have been consigned a trio of coins from this second recovery encapsulated with a pinch of California gold dust. This Type 2 gold dollar had quite the adventure in its existence. It went from the mint in Philadelphia and made its way around, either to California, Panama, or Cuba before being in someone's pocket when the S.S. Central America hit a massive hurricane, flattered and sank to the bottom of the ocean. Light circulation is seen on the surfaces, but there is a wonderful surviving mint luster that glows on both sides. Free from any serious abrasions, we just see some minor lines from its brief time in commercial channels. A very historic piece and would make a very cool addition to any collection of gold coins, or a specialized collection of shipwreck coinage (this is a very interesting pursuit). Cert. Number 35398740 PCGS # 97072900

390 \$G\$1 1880 PCGS MS68 CAC

Estimate: 12,000.00 - 13,000.00 USD

We love these late date gold dollars. They began rare, only 1,600 1880 gold dollars were struck, but thankfully, they were saved in some quantity, allowing today's collectors to be able to acquire SUPERB GEM examples like the one here. Deep, beaming, fully Prooflike luster is broadcast all over the fields. The sharply struck devices stand out against the reflection, with a thick, creamy frost that gives this little jewel a cameo-like appearance. Aside from some delicate toning and a few minor imperceptible mint-made ticks, this coin is AS STRUCK! Virtually pristine and the eye appeal is simply amazing. PCGS 27, NGC 21, CAC 22. The most recent one to sell in auction realized \$13,200 in March 2019. The last one we sold was back in December 2017 for \$12,338 in our sale of the Bubbabellis Collection. Unpriced in the CAC CPG and the Collectors Universe value is listed at \$12,500. There are a remarkable four examples graded finer, we sold a 68+ in our December 2019 Regency Auction for \$24,675! This coin will delight anyone who wants to add a simply SUPERB gold dollar to a type set, or a great coin for your gold dollar short set. Cert. Number 25394236 PCGS # 758100

391 \$G\$1 1889 PCGS MS68+ CAC

Estimate: 17,500.00 - 20,000.00 USD

We have seen and handled MANY SUPERB GEM Gold Dollars in our time. This coin unquestionably ranks among the very FINEST! Extraordinary surfaces are satiny smooth and are super clean. There is one small Mint grease spot on the reverse (which is what we think keeps this stunner from a MS69)! A bold vibrant luster beams from all over. Both sides are bathed in a stunning and totally original mix of yellow/orange gold colors. Miss Liberty and the details are frosted and are needle sharp in strike. The eye appeal is totally gonzo! PCGS 10, NGC 15, CAC 4. This is the ONLY MS68+ graded. This coin clearly will be a treasure/lead coin in any great collection it is placed in. If you are building a box of 20, a Type set, or a Gold Dollar set, this coin is an easy fit. Good luck! Cert. Number 32601847 PCGS # 759000

392 \$2.50 1902 PCGS MS67

Estimate: 1,550.00 - 1,850.00 USD

A lovely high grade late date Liberty Head quarter eagle. A glowing satiny luster beams through a pinkish-orange tinged gold surface. Sharp struck on both sides, the surfaces have a great look and strong technical quality. PCGS 52, NGC 63. The most recent example to sell in auction realized \$1,920 in October 2019 and prior to that, one sold for \$2,400. The current Collectors Universe value is listed at \$2,250. Very few are graded finer, there are a mere 16 graded higher combined between PCGS and NGC and this coin is a real 67. Cert. Number 38574684 PCGS # 785400

**393 \$2.50 1907 PCGS MS67+ CAC**Estimate 5,500.00 - 6,000.00
USD

This is what a SUPERB GEM is supposed to look like! Tied for second FINEST graded at PCGS, this beautiful 67+ boasts a rich satiny luster that gleams with a wonderful frosty overtone. A light straw gold hue dominates, but there are deeper orange gold and rose gold accents adding to the strong visual appeal. Sharply struck and clean surfaces add to the amazing eye appeal. PCGS 133, NGC 138, CAC 27. There are a dozen in 67+ and just two finer. There has not been a PCGS/CAC example sold in auction since June 2018 where one sold for \$7,200. Prior to that, you have to go back to April 2012 to find a PCGS/CAC MS67+ sold in auction! Even a regular MS67 CAC sold for \$4,920 in the 2020 FUN auction. This stunning coin will bring a strong bid when it crosses the block especially for someone who doesn't want to spend \$30,000 for a non-CAC MS68. Good luck! Cert. Number 38569042 PCGS # 7859 00

**394 \$2.50 1872 PCGS PR65 DCAM**Estimate: 40,000.00 - 44,000.00
USD

All Proof gold coins struck prior to the mid 1880s are major rarities, even more so in GEM states of preservation. In 1872, only 30 Proof quarter eagles were struck, of which, John Dannreuther estimates that perhaps 12-14 are known in all grades. Among those are the Smithsonian and ANS specimens, likely impounded for all time. This leaves perhaps 10-12 examples for collectors. The combined PCGS and NGC populations are 22 pieces graded, which includes coins that were never taken off the populations, as coins gained the CAM and DCAM designations. The present GEM is among the FINEST graded at PCGS in any designation, and is tied at the Top of the Pop in the DCAM designation. Deep, beaming golden mirrors are the epitome of flashy vibrance. Aside from a tiny mint made planchet flake and a tiny lint mark or two, the surfaces are exquisite and devoid of any post mint issues. The razor sharp devices have a thick frost that creates a SUPERB cameo contrast, deep and beamy. The eye appeal is simply amazing, we are not sure why CAC did not bestow this beaming GEM. While we cannot find a pedigree to this example, famous collectors who have owned examples include, Harry Bass, Louis Eliasberg, John J. Pittman, Amon Carter, Garrett, and Ed Trumpeter. Your name can now be added to that roster of collectors who have owned one. Only 30 were struck. PCGS 3, NGC 1. The only PCGS PR65 DCAM to sell in auction brought \$38,400 in the 2020 FUN Auction. This is a different example. The current Collectors Universe value is listed at \$55,000. With none graded higher, this piece is bound for one of the greatest collections of proof gold ever. Good luck! Cert. Number 37211834 PCGS # 97898 00

**395 \$2.50 1908 PCGS PR67**Estimate 35,000.00 - 40,000.00
USD

One of the VERY FINEST graded by PCGS and this coin is a SPECTACULAR quality GEM! A deep, orange-gold hue is evenly distributed over the sheer perfection of surfaces of this immaculate PR67. Sharply impressed incuse design elements. The color is incredible and the surfaces do not reveal any imperfections seen on either side, even with the aid of a strong glass. The matte surface is completely different from anything done at the Philadelphia Mint before. Up until this time proof coins had always been "shiny", with the fields offering mirror reflectivity and the devices offset by frosted texture. Here on this 1908 Quarter Eagle the fields and devices were completely uniform in color and texture. A strong loupe reveals minute interlocking facets that create the "sandblast" texture and appearance. When examined under a light, these facets flash and twinkle like a galaxy of stars! Of course this radical change, introduced at other world mints soon after 1900, was met with stiff resistance in America, as collectors had grown used to the bright and flashy proofs of the past. Hence sales declined year after year starting in 1909 through the end of Proof production. Today with the benefit of time and artistic appreciation, modern collectors highly covet these exceptional matte proof coins, especially when they are found so perfectly preserved! Representing the first major Quarter Eagle design change since 1840, only 236 Proofs were struck in 1908. The surfaces on this SUPERB GEM are virtually perfect, with the classic mustard hue and finely granular matte surface undisturbed! A high fin or wire edge is seen around most of the coin, both obverse and reverse. An absolutely extraordinary example of this rare Proof coin. PCGS 8, NGC 30. The most recent example to sell in auction realized \$40,800 in the 2020 FUN auction, prior to that, we sold one for \$58,750 in the November 2018 Regency Auction. The current PCGS value is listed at \$60,000 and NONE are graded finer at PCGS. This rarity is bound for a great set! Good luck! Cert. Number 38670453 PCGS # 7957 00

**396 \$2.50 1910 PCGS PR66 CAC**Estimate 38,000.00 - 44,000.00
USD

A simply impressive GEM example of this very popular Proof Indian \$2.50. The quality is off the charts, and the eye appeal is simply stunning. Ranking near the top of the PCGS Population Report, this coin has the initial visual appeal of a SUPERB GEM! The delicate satin finish is totally intact, uninterrupted by any surface disturbance or flaw that we can see with our powerful loupes. Every detail is fully embossed in the surfaces, and crisply defined throughout the incuse design. The rich, totally original yellow-gold color is as fresh and pleasing as the day it came off the dies. We note just a single tiny mark hidden on the reverse for the sake of full accuracy, but it does not impact the bold visual allure. The mintage of 1910 Proof quarter eagles was reported at 682, a whopping sum for any Proof gold coin. It is said that many of these may have been spent by their owners as no 1910 circulation strike quarter eagles were produced until the end of the year. Obviously the number of coins that went into circulation, or melted as unsold, were never taken out, or there could have been a mistake in reporting. The current combined PCGS and NGC populations come to about 200 pieces, and the recent Proof Gold reference by John Dannreuther suggests that 90-110 survive. PCGS 11, NGC 29, CAC 13. The most recent example to sell in auction realized \$40,800 in November 2019. The current CAC CPG value is listed at \$51,400 and the PCGS Price Guide value is listed at \$48,000. RARE any finer, just four have been graded higher by PCGS. Worthy of a strong bid and a coin that will be at home in any great cabinet of 20th century gold. Cert. Number 34886539 PCGS # 7959 00

Only 5,959 \$3 gold pieces were struck as the Civil War began in 1861, and this is a delightful AU53, lightly circulated with boldly defined devices and ample surviving luster in the fields. A few stray lines are seen, but the eye appeal is wonderfully original and high end for the AU53 grade. Most have been conserved, as evidenced by the tiny CAC approval rate. PCGS 33, NGC 32, CAC 4. No CAC approved example has ever sold in auction, and the most recent NGC graded coin brought \$4,406 in March 2014. Both the CAC CPG and Collectors Universe values are listed at \$4,500 and this coin will bring close to that. The eye appeal is great! Cert. Number 37681810 PCGS # 7982 00

**398 \$5 1834 CLASSIC. PLAIN 4. PCGS MS64+ CAC**Estimate 28,000.00 - 32,000.00
USD

About as fine as you can ever realistically ever hope to obtain for your collection, this borderline GEM Classic Head half eagle ranks high up on the PCGS Population Report and there is just a single CAC approved coin finer. This coin has a stunning, totally original look. Brilliantly lustrous with a thick, satiny frost that glows majestically on both the obverse and reverse is distinctly Prooflike with a bold flash. Both sides are a killer original brilliant yellow gold color with some deeper gold hues that come to life when viewed in a light. There are NO spots or discolorations, and even using a strong glass all you can find are a few tiny microscopic ticks. The Classic Head series is an oft overlooked transitional series that connects the early, old tenor gold coins of 1795-1834 and Christian Gobrecht's Liberty Head or Coronet design. Starting in the 1820s, the bullion value of the gold content exceeded the \$5 face value. While there were a relatively large number of early fives struck, most of these never circulated, rather exported for its metallic content, melted down, and returned as specie, making a tidy profit for the owner. In 1834, the weight was reduced, and William Kneass's Classic Head design was introduced. These charming coins were issued at a time when the first branch mints opened and saw extensive circulation. High grade examples are rarely seen. PCGS 43, NGC 42, CAC 12. There are seven graded MS64+ and just seven finer. The most recent example to sell was the Coronet Collection coin we sold in October 2019 for \$37,600 (this is NOT that coin). The current PCGS Price Guide value is listed at \$32,500 and remember how RARE these are any finer, a CAC approved GEM would approach high five figures in today's market. Perfect for type this coin will see intense bidding. Good luck! Cert. Number 35090641 PCGS # 8171.00

Exceptional and HIGH END quality for the grade! This is a fully CHOICE and beautiful example of this early type. Visually stunning, this lovely coin has a rich golden luster that has a radiant flash on both sides. Sharply struck up devices are fully frosted and show crisp, complete definition on both sides. Aside from a few microscopic ticks and a line or two that are widely scattered across the surfaces, the eye appeal is off the charts for the assigned grade. Wonderfully original, this early type is difficult to find so nice! PCGS 16, NGC 25, CAC 3. Only 3 are graded MS63+ at PCGS. Let the population data sink in, it just proves how tough these are to find nice and unmolested. This coin sold as a regular MS63 CAC for \$16,450 in February 2013. The only other MS63+ sold for \$14,400 in June 2018. Keep in mind that we sold an MS64 for \$27,025 in November 2018, so there is a wide spread between grades. Good luck, this is a great coin for type or date purposes and we anticipate it going into a great cabinet. Cert. Number 21643551 PCGS # 8174.00

OMG! This coin is so the real deal. We'd rank it MS648+++ every time! In full MS65, these are so exceedingly rare. Outstanding surfaces are smooth and clean. Only on the reverse is there a small scuff/frost break that you can see with a glass (which is all that we can find that keeps it from MS65). This coin oozes with as much originality as we have ever seen. It looks like it was carefully stored for a very long time. A moderate glowing luster beams from all over. Both sides enjoy a rich and totally original deep gold with pale greenish gold highlights. There are NO discolorations or spots. The eye appeal is terrific! PCGS 9, NGC 5, CAC 4. This is one of just two graded MS64+ by PCGS. PCGS has possibly graded only 4 coins higher. There is NO record of this MS64+ selling in a major auction. The current PCGS Price Guide value is \$57,500 and it is critical to note: an MS65 (NON CAC) sold for \$100,625 way back in 2010. ALL posted numbers for this coin are incorrect. The rarity of this date and higher in this grade is extreme. If a PCGS CAC MS65 were ever to show up, it would sell for \$125,000+ today. If you are trying to build a GEM set, this coin is a perfect fit. Cert. Number 25502003 PCGS # 8175.00

We are pleased to have been consigned an exciting piece that is tied for FINEST graded (and deservedly so). We fully agree this coin is a borderline MS65! Tangy surfaces are clean overall. Only when using a strong glass can you find some tiny scattered ticks. Nothing is serious. Hints of faint semi-prooflike mirrors can be seen when the coin is tilted. A booming luster beams from all over. Both sides are a brilliant deeper yellow gold color. There are NO spots or discolorations. Miss Liberty and the details are fully struck. The eye appeal is fantastic! PCGS 7, NGC 9, CAC 3. The current Collectors Universe Value is \$30,000 while the PCGS CAC Value is \$31,500. This is the only appearance in auction since 2015. Though generally common in grades up to MS64, CAC approved MS65s are truly quite RARE! This example is totally original, offering a "dusty/crusty" tannish gold color that matches coins from old time no dings, like European banks and old collections housed in paper envelopes. Sharply struck and satiny, this very pleasing looking coin will delight anyone who loves totally original gold coins for their set. PCGS 35, NGC 79, CAC 11. We sold the most recent example in our December 2019 Regency Auction, realizing \$2,056. The current PCGS Price Guide value is \$2,250 and the CAC CPG value is \$2,620. Only a dozen coins are graded finer at PCGS, only 4 of which have attained CAC approval. Worthy of a great gold type set or date set. Cert. Number 28297064 PCGS # 8394.00

Very high end for the assigned grade, this lovely Choice AU 91 CC eagle has a look that is suggestive of a higher grade. We would not have flinched if it was graded AU58 (no guarantees). Nearly full mint luster gleams all over on the barely worn surfaces. We note just the lightest touch of friction. Every detail is razor sharp in strike and the eye appeal is great! PCGS 339, NGC 231, CAC 6. Just two PCGS/CAC examples have sold in auction, the most recent bringing \$1,560 in the 2018 ANA auction. The CAC CPG value and the Collectors Universe value are very similar, \$1,940 and \$1,950 respectively. Housed in an OGH, this coin will delight any gold type or \$10 eagle collector. Cert. This is a lovely 91 CC in an old green tag holder. Boldly lustrous surfaces abound with sharply struck devices and just a trace of circulation on both sides, manifesting itself as just some minor traces of contact. Totally original this coin has a great look. PCGS 444, NGC 559, CAC 30. The average APR for CAC approved PCGS AU58s is \$2,235, based on nine that have sold in auction between 2013 and 2019. We sold the two most recent examples, one for \$2,350 and the other for \$2,530, well above both the PCGS and CAC CPG values listed at \$2,000 and \$2,120 respectively. This is a totally original and lustrous GEM example of this date. Sharply struck with a bold radiating cartwheel luster that accents a rich, orange-gold tone overall with areas of deeper reddish-copper. The surfaces are exceptionally clean, with just a few stray contact marks noted on either side, none of which detract from the excellent eye appeal. PCGS 1343, NGC 1340, CAC 158. There are 91 graded in MS65+. VERY scarce any finer, the most recent PCGS/CAC example sold for \$3,290 in our December 2019 Regency Auction and the CAC CPG value in MS65 (no +) is \$3,720. What a great coin for any type set or date run of this long lived series, it is high end and very visually appealing. Cert. Number 34194413 PCGS # 8749.00

**406 \$10 1930-S PCGS MS64+ CAC**Estimate: 70,000.00 - 80,000.00
USD

One of the RAREST dates of the series. A combination of lower mintage (96,000) and mass meltings later in the decade, make this a very tough date for collectors in any grade. Interestingly, there is a cluster of examples graded MS64, which makes us believe that there have been a number of resubmissions of the same coin in hopes of getting a "+" or a 65 grade. The present borderline GEM is PQ, a REAL MS64+, truly deserving of its + status and CAC approval. Rich, frosty satin luster glows and gleams all over with a velvety texture on both sides. The golden color is thick and original with deeper honey hues in the reverse fields. Intense examination with a powerful loupe reveals a tiny tick or two, but none are individually distracting to the eye. Indeed, this coin is extremely eye appealing and has a really bold look. PCGS 45, NGC 25, CAC 7. There are 9 listed as MS64+ on the PCGS Population Report, none of which have ever sold in auction. A regular (non +) PCGS MS64 CAC sold in the 2019 FUN auction for \$72,000. The MS64 CAC CPG value is \$87,100 in MS64 (no +), and the current PCGS Price Guide value is listed at \$85,000 and in MS65 the value jumps to \$100,000. A great coin for anyone working on a set of Indian Head eagles. Cert. Number 6579508 PCGS # 8883.00

**407 \$20 1854 LARGE DATE. PCGS AU58 CAC**Estimate: 18,000.00 - 20,000.00
USD

Of the two date variants struck in 1854, the Large Date is the rarer, and regardless, this early date Type I double eagle is conditionally challenging in this fine a grade and VERY RARE in Mint State. This is an impressive, "GEM" AU example that is totally original. A "crusty" original, deep, orange-gold patina. The hues are pleasing and brought out by a soft, satiny luster that can be seen in a light. The surfaces show just a touch of friction and some minor contact marks on both sides. The eye appeal is very pleasing. PCGS 15, NGC 22, CAC 10. The current PCGS Price Guide lists a value of \$23,500 and the CAC CPG value is \$23,000. The most recent PCGS-graded CAC approved AU58 realized \$19,200 and that was six years after the other most recent example sold. Clearly these do not appear with frequency. There are half a dozen examples have ever graded finer, only one MS61 has ever sold in auction. Since most examples are NOT original and have been dipped, stripped, and conserved this is a real numismatic endangered species and should bring a strong price. Cert. Number 38454770 PCGS # 98911.00

**408 \$20 1857-S SPIKED SHIELD. PCGS MS66+ CAC SCA**Estimate: 65,000.00 - 75,000.00
USD

EX S.S. CENTRAL AMERICA What an unbelievably superb 57-S! We absolutely rank this coin an MS66.9+! Considering this was covered with muck, the conservators did an incredible job. If it was not in a Ship Wreck holder we assure you, it would be impossible to know it was under the sea for 155+ years. The surfaces shame all other coins; they are borderline perfect. Only when you use a strong glass can you find a minor frost break or tiny tick. You'd still expect that on a huge coin like this. A full booming intense luster can guide in the Space Shuttle! Both sides are a GEM Yellow gold color. There are NO spots or discolorations. Miss Liberty and the details are sharply struck and offer generous frost. The eye appeal is spectacular! The Shipwreck pop for this coins is 9 with only four higher. The regular NON Shipwreck pop in MS66+ 0! CAC has beamed a total of 53 pieces in MS66. (They do not separate out + graded coins or Ship Wreck coins.) If you are building a GEM Type set, you know until this wreck surfaced, there was no such thing as a choice or GEM \$20 1857-S. In MS66+ and MS67, its pretty much still that way. We can not stress enough the MONSTER quality of this SUPERB GEM. It is also \$110,000 less than the MS67, even though it is that close to being one! In the 2014 dive (the final dive) 3154 coins were salvaged. All the coins are now graded and accounted for. This is a magnificent \$20 as well as being a genuine historical piece of treasure! Cert. Number 35151219 PCGS # 670713.00

**409 \$20 1860 PCGS MS62+ CAC**Estimate: 13,500.00 - 16,500.00
USD

This stunning piece is not only SUPER HIGH END, but looks like the sun in a PCGS holder! Sensational original "skin" can be seen all over. The surfaces look clean, but do have some visible light frost breaks and a tick or two. This coin is much closer to a 63 than an MS62. Even when using a strong glass, nothing stands out. The luster is really strong and glows hard from all over. Mother Nature could not help herself here, she gave this coin a magnificent layer of orange gold by the peripheries and regular gold in the centers. There are NO spots or discolorations. Miss Liberty and the details really stand out with full strikes and lots of frost. The eye appeal is tremendous! PCGS 18, NGC 11, CAC 4. There are 4 in PCGS MS62+ and fewer than a dozen examples have graded finer at that service after 34 years of operations. No MS62+ has ever sold in auction, but the only PCGS/CAC MS62 to ever sell in auction sold in April 2018 for \$20,400. Clearly the Price Guides are not accurate for this coin! No MS63 has sold in 15 years! Needless to say, this date is VERY RARE in such a lofty state of preservation or finer. Expect strong bidding here! Cert. Number 37372975 PCGS # 8929.00

**410 \$20 1869 PCGS MS61 CAC**Estimate: 15,000.00 - 16,000.00
USD

A lovely, original Mint State example that has distinctive claims to an even higher grade. This is NOT a just made it MS61, or a 58 in a 61 holder, this coin is the real deal! Glowing, radial mint luster glows with a strong satiny brilliance. The reverse has a full rolling cartwheel. Sharply struck up, the devices are bold and crisp which is accented by the wonderful color on the surfaces. The eye appeal is excellent. PCGS 16, NGC 2, CAC 2. There have been no CAC approved examples sold in auction; that's right, NO MS60, MS61, or MS62 CAC has ever sold in auction. The current CAC CPG and PCGS Price Guide values are both listed at \$17,500. A lovely Type II Double eagle and worthy of a strong bid. Cert. Number 38675301 PCGS # 8955.00

	411 <u>\$20 1911 PCGS MS65</u>	Estimate: 8,250.00 - 9,250.00 USD
	The 1911 had a lower mintage, only 197,200 were struck and these are quite rare in GEM quality. PCGS has graded only 85 in MS65 or finer grades. Offering a bold strike for the date with all devices crisp and clear. Surfaces glow with frosty mint luster and are relatively free of the contact marks that are the norm for these large gold coins. A strong glass reveals just a few minor ticks, and that is it! The eye appeal is great. PCGS 52, NGC 42. The last two sold for \$10,200 in 2019 and prior tot that, one sold for \$13,200. The current PCGS value is listed at \$15,000 and keep in mind that any MS66 is going to be \$35,000+. Good luck! Cert. Number 38569034 PCGS # 9157.00	
	412 <u>\$20 1926-S PCGS MS65+</u>	Estimate: 30,000.00 - 35,000.00 USD
	A lustrous GEM example of this key date Saint. Sharply struck and nicely preserved surfaces, both sides are generally clean and free of any serious marks. Well struck, there is no weakness in any of the design elements. The color is pleasing and this coin has a good eye appeal. The double eagle issue of 1926-S suffered from the usual indignities of its brethren from the Denver and San Francisco Mints of this period. Most of the production struck ended up housed in United States Treasury vaults awaiting eventual orders. The commercial orders for these coins never materialized and after 1933 the coins were gathered up and shipped off to Fort Knox to be melted into gold bricks. So, despite a mintage of 2,041,500 pieces this is today a rather scarce issue, with the total numbers certified just under 1,500 pieces in all grades between the two major grading services. Virtually all of the known surviving examples of this date and mint are Mint State, or very close to it. PCGS 2, NGC 0. There are just four examples graded finer at PCGS. Neither MS65+ has ever sold in auction and the last MS66 sold a decade ago for \$69,000. Recent MS65 examples have sold in the \$15,600 to \$22,800. In 65+, the Collectors Universe value is listed at \$43,000. This is a very rare coin that is worthy of a strong bid from anyone still missing this late date Saint in their set. Cert. Number 36182258 PCGS # 9185.00	
	413 <u>50C 1935-S ARKANSAS. PCGS MS67 CAC</u>	Estimate: 1,500.00 - 1,750.00 USD
	Among the highest graded examples from an original, low mintage of 5,506. Beautifully preserved and awesomely toned, this MS67 is tied for second highest graded at PCGS and we suspect that there is duplication, looking for an MS67+ grade. Lovely pale blue and coppery-gold comes to life over the ultra satiny surfaces. Well struck and devoid of any traces of contact, this is a commem collector's dream coin. PCGS 27, NGC 19, CAC 13. There was an example that sold in June 2019 for \$1,920 and the current CAC CPG value is listed at \$1,880. Only nine coins are graded finer, all MS67+ and only one of which has ever sold in auction. This is a great looking SUPERB GEM that will fit in any important collection of classic commemoratives. Cert. Number 38709989 PCGS # 9235.00	
	414 <u>50C 1935-S ARKANSAS. PCGS MS67+ CAC</u>	Estimate: 5,000.00 - 5,500.00 USD
	Tied for FINEST graded, this is an absolutely amazing quality GEM Arkansas half dollar. Bold, satiny luster blooms vividly all over both sides, accenting a pale dusting of the most delicate pearly gold patina. Both sides show off full definition and the surfaces are impeccable! PCGS 35, NGC 22, CAC 13. This is one of 9 graded MS67+ at PCGS and NONE ARE FINER at either service. Only one has ever sold in auction, bringing \$5,520 back in March 2018. This one should bring about that or more. The current PCGS Price Guide value is \$7,000. With none finer, anyone working on a complete, top tier set needs to bid on this beauty. Cert. Number 81888075 PCGS # 9235.00	
	415 <u>50C 1935/34-D BOONE. PCGS MS67 CAC</u>	Estimate: 1,300.00 - 1,400.00 USD
	Such a CHOICE example of this UNDERRATED issue, especially in this lofty state of preservation. Most Boone's have irregular color or a lackluster appearance. This coin is a welcome exception. Hues of champagne gold toning accent satiny, textured surfaces. Just about perfect! PCGS 72; NGC 47; CAC 18. Three pieces sold last year. An example fetched \$1,200 in March, while another brought \$1,440 the same month and the third sold in April for \$1,200. Good luck! Cert. Number 38000213 PCGS # 9263.00	
	416 <u>50C 1936 BRIDGEPORT. PCGS MS67 CAC</u>	Estimate: 950.00 - 1,100.00 USD
	With a soft blush of iridescent toning on both sides, the satiny silver surfaces have a lovely cleanliness, devoid of any marks of any kind that would distract the viewer or impinge on its exceptional eye appeal. PCGS 105, NGC 34, CAC 32. The most recent PCGS/CAC example realized \$1,560 in October 2019. The current PCGS Price Guide value is \$1,100 and the CAC CPG value is listed at \$1,750. Only 10 examples are graded MS67+ as finest, making this MS67 a great coin for any carefully chosen set. Cert. Number 38709987 PCGS # 9279.00	
	417 <u>50C 1936-D COLUMBIA. PCGS MS68 CAC</u>	Estimate: 4,000.00 - 4,500.00 USD
	This is the epitome of perfection on a Columbia, SC half dollar. An exquisitely preserved and totally original Columbia half. The eye appeal is very high end-the definition of a SUPERB GEM. Well struck devices, satiny smooth surfaces, frosty luster and pleasing antique toning combine on this high grade example. Every detail is crisply rendered, and as one of the FINEST seen at either service, it is very high end. PCGS 32, NGC 21, CAC 16. The most recent PCGS Price Guide value is listed at \$5,000 and the CAC CPG value is listed at \$6,250. The most recent sold in auction for \$4,230 in June 2019. Only six have graded MS68+ finer, only one of which ever sold in auction, bringing \$15,863 in our May 2019 Regency Auction. This beauty is a great coin for a great commem set! Cert. Number 36174717 PCGS # 9292.00	
	418 <u>50C 1936-S COLUMBIA. PCGS MS68 CAC</u>	Estimate: 4,500.00 - 5,000.00 USD
	This is a match to the 36-D Columbia offered above and we suspect these two were preserved together since 1936. Lovely satiny mint luster blooms all over the pristine surfaces. An antique pewter-silver with pale, pastel iridescent gold, icy blue, and pearly silver radiates around the sharply struck devices throughout. PCGS 14, NGC 14, CAC 9. The most recent example realized \$5,280 in July 2010 and we sold one for \$6,169 in September 2018 Regency Auction. The current PCGS Price Guide value is listed at \$6,250 and the CAC CPG value is listed at \$6,880. Only two MS68+s have EVER graded and none have ever sold in auction. Worthy of the greatest of classic commem sets. Good luck, bidding will be intense! Cert. Number 37813345 PCGS # 9293.00	

	419 <u>50C 1937-D OREGON. PCGS MS68+ CAC</u>	Estimate: 5,500.00 - 6,000.00 USD
What a SUPERB GEM! This coin is the epitome of absolute perfection! Use any kind of powerful device (neutron microscopic, etc) to view this coin with. You can look 100X and find ZERO impairments of ANY size. Clearly, for its entire 83 years history, this coin has been perfectly saved and stored. Obviously it was taken out of its envelope early. The luster is strong and glows from all over. A smaller crescent of totally original reddish gold hugs the right obverse. There is no question to us this coin has never been dipped or messed with. The eye appeal is terrific! PCGS 67, NGC 84, CAC 35. PCGS has graded 9 in MS68+ and 2-WOW in MS69! The last MS68+ to sell in auction was a NON CAC piece. It brought \$5,800 in the 2019 ANA auction. The current Collectors universe value is \$6,000 (CAC Value does not do + coins). As time goes on we can see the values of top Commens like this (especially now that there is a PCGS CAC registry) only growing. Cert. Number 38097387 PCGS # 9347.00

A marvelous, beautifully toned SUPERB GEM. Stored for ages in the original tab style holder, this coin has a bold apricot-rose gold patina on the obverse and satiny silver center on the reverse. The eye appeal is bold and the quality is high end. PCGS 153, NGC 126, CAC 66. There are 24 graded MS67+ and just five graded higher. What a beautiful, SUPERB GEM example of this popular type that is rarely encountered with such beautiful toning. Peripheral toning shows a blend of variegated blues, reds, gold, violet and lime green that complement the exceptionally lustrous satin surfaces. Sharply struck on both sides with some very minor ticks. The eye appeal is amazing for a Pilgrim half. PCGS 386, NGC 174, CAC 95. There are 32 graded MS66+ at PCGS. Very scarce finer. This coin is worthy of a very strong bid indeed! Good luck! Cert. Number 20254048 PCGS # 9360.00		
	422 <u>50C 1921 PILGRIM. PCGS MS67+ CAC</u>	Estimate: 4,000.00 - 4,500.00 USD
Among the FINEST KNOWN, this is a simply SUPERB and totally original example of this popular early commemorative half dollar type. Radiant, satiny luster blooms and glows vividly in the fields, accenting razor sharp devices. Lovely and totally original toning is suggestive of long term storage in an old album. Coppery gold, tan, and pearly-silver toning is a delight to behold. The eye appeal is simply outstanding! PCGS 62, NGC 28, CAC 9. There are 10 graded MS67+ and just a single MS68 graded higher. Only three PCGS/CAC examples have ever sold in auction, the most recent bringing \$5,040 in April 2019 and the record price for the type was realized by a non CAC MS67+ which realized nearly \$10,000 in April 2017. We think this one will find itself bringing a price higher than the current Collectors Universe value of \$5,000. A coin destined for the FINEST of sets. Good luck! Cert. Only 10,008 were struck, and this SUPERB MS67+ is bested by just eight coins at PCGS. Vibrant mint luster blooms all over with exceptional quality, satiny smooth surfaces. Sharply struck, the design elements stand out nicely and the eye appeal is very high end. PCGS 211, NGC 120, CAC 67. There are 32 in MS67+ and just 8 in MS68 finer. Both sides have a beautiful peripheral tone, shades of blue and gold come together, especially on the obverse, giving this truly SUPERB Vancouver half dollar a marvelous look! PCGS 78, NGC 50, CAC 38. The most recent example to sell in auction brought \$1,880 in our June 2019 Regency Auction 33. As nice as that one was, this one is much nicer! Indeed it is closer in look to the one that sold in June 2019 for \$2,880. The current PCGS Price Guide value is listed at \$2,500 and the CAC CPG value is listed at \$3,000. **428 \$1 1838 J-84. RESTRIKE. PCGS PR64 CAC**Estimate: 70,000.00 - 80,000.00
USD

Of the three Gobrecht dollar dates, 1836, 1838, and 1839, the 1838 is the scarcest. A very small number of Originals were struck, the dies then stored away until the late 1850s where they were then restruck for collectors. Struck in Die Alignment III, like the majority of the known examples. For the design, the obverse has Gobrecht's name removed from the rocky base although faint traces remain when closely examined. The obverse now has thirteen stars surrounding Liberty, representing the original colonies, and the starry field with 26 stars of the reverse has been removed, and the eagle flies in the open field surrounded by legends and the denomination below, with the eagle flying level. The restrike J-84s are listed as Rarity-5 with an estimated mintage of 31-75 pieces. This is a very impressive borderline GEM. Every detail is razor sharp in definition, standing out against watery reflective mirrored fields. Both sides are awash in a gorgeous blend of blues, golds, and peach hues, with teal and lilac accents. A single microscopic line can be seen in the field with effort by Stars 4 and 5, the only thing that keeps this from an even loftier grade. Part of the fun of owning these coins is the potential to help discover new pieces in the puzzle. Over the years, many different theories surrounding the many variations of Gobrecht dollars have been offered. Extensive research has been done on this particular issue to determine where it was produced in relation to the other Gobrecht Pattern Dollars. Two major beliefs have developed. One camp of experts (Walter Breen and Robert Julian) believe that the die alignment I pieces were the originals, followed by die alignment IV and III being the Restrikes of the J-84 pattern. Another camp (John Dannreuther, Craig Sholley, Saul Teichman, Jim Gray and Mike Carboneau) believe the originals were first struck in die alignment IV. Research continues, and with each passing year, further examination of these rare coins shed a little more light with each opportunity to compare different pieces. One famous example of this pattern in the Simpson Collection shows clearly the undertype of an 1859 silver dollar being used to strike the 1838 J-84 Pattern! PCGS 9, NGC 11, CAC 2. The most recent PCGS PR64 CAC example to sell in auction realized \$88,125 in the 2017 FUN auction (a coin that is now on the market listed at \$110,000). The current Collectors Universe value is listed at \$72,500 which seems very cheap for a CAC approved coin. We believe that this marvelous coin offers a lot for any advanced collector, and this coin will spark lots of bidding activity. Keep in mind that this high end coin ranks among the FINEST examples, behind a handful of coins graded PR65, including: The Amon Carter; TradeDollarNut; Simpson Collection example; The Blue Moon Collection coin, sold Stack's Bowers March 2017; The Ed Rector Collection coin, last sold at the 2018 ANA Auction; The Bruce Morelan Collection coin, which sold for \$146,875 in our October 2019 Regency Event; The example that sold in August 2009 Bowers & Merena, lot 1699 for \$126,500. The Norweb-Gardner Coin was graded NGC PR65, and realized a record for the variety when it sold in April 2008 for \$149,500. Cert. Number 35366313 PCGS # 11352.00

Deeply toned on both sides, the fields smooth, but only mildly reflective. The devices are sharply struck and the surfaces are surprisingly smooth for the assigned grade. PCGS 29, NGC 12. The current PCGS Price Guide value is \$2,500 and a similarly graded, also OGH example sold in our July 2018 Regency Auction brought \$2,174. Very scarce any finer, this CHOICE example is a very affordable pattern dollar. Cert. Number 4337352 PCGS # 62004.00
